<b>DESCRIPTION OF THE EXPERIENCE</b>	The experience starts with the development of a rap in the Area of English. Later a former student hip hop amateur fan adapted the text to a musical base and he was the students' musical director. After several rehearsals we recorded the rap with the voices of the students. The last step was the elaboration of video. We used a chroma done with an Ikea green shower curtain. Before filming students rehearsed some parts and movements to be performed. It was filmed lip-synching with the song recorded. During the filming two students were cameramen and the final editing was done by a teacher.
