COMENIUS REGIO ASSOCIATION  
2013-1-FI1-COM13-12845

## ICT IN USE

## CONNECTED TO ICTs

**EXCHANGING AND DEVELOPMENT OF WORKING PROTOCOLS TO IMPROVE THE USE OF ICT AT SCHOOLS AND THE LOCAL AREA IN OUR TWO REGIONS.**

Lifelong Learning Programme

## 1- WHAT DOES COMENIUS REGIO CONSIST OF?

The aim of Comenius Regio Associations is to promote the development of cooperation activities among local and regional authorities that are active in education world in Europe and to contribute this way to improve their education offer. They allow cooperation of regional institutions, education centers and other relevant actors in education field to jointly work in common interest subjects.

## 2- WHAT ARE OUR AIMS?

1. To improve innovation and education quality around ICTs with the exchange of persons and ideas among the institutions involved in the project;
2. To explore, with the exchange of persons, ideas, activities and work models, as well as to promote the basic competences of our students using the ICTs;
3. To start up the multidisciplinary learning at the participating centers of every region with short-term exchanges of responsible ICTs staff at the centers;
4. To develop stable ICTs organization and evaluation documents at the associated institutions that are incorporated into usual working protocols;
5. To develop a web platform for family training and the start-up of the Family Schools;
6. To develop preventive and informative actuations with the families of the centers that facilitate the ICTs access and reduce the risks linked to them;
7. To create and start up a web space for exchange of ICT experiences with our students that will allow innovation and good practices linked to the ICTs at our centers.

## 3- WHAT BENEFITS DO WE OBTAIN?

- They will get a higher training level about many different aspects related to the work subject;
- We will get a higher commitment of families regarding education of their children with a responsible use of social networks and Internet;
- They will increase their participation at school and their involvement in the education process of their children using the digital platform;
- A communication channel will be established among parents and centers using the ICTs.

### For students:

- They will increase their knowledge of the European reality, they will Exchange experiences with other students of other countries that facilitate the future Exchange of persons and ideas in the EU;
- Through innovation and Exchange of experiences, the teacher practice and motivation of the students will be improved.
- The education practice will be more motivating for a generation linked to new technologies, and it will also allow a more individualized development of personal capacities.

### For teachers:

- Due to this inter-regional Project, teachers will be able to know the work of other colleague in the associated schools, to restart their experiences and to discover other teaching methods, what can be innovating sources for their future school work.
- Innovation and development of the ICTs;

- Greater teacher innovation with regard to ICT use with students;
- To know education system of the associated regions;
- To enlarge their cultural and professional experiences;
- To go into detail about their linguistic competences.

### For institutions:

- For the Project of the participating institutions, they receive ideas and suggestions to consolidate the European education dimension;

- They have the opportunity to have contacts with experts, to work and discuss issues with them, to develop different concepts;
- Collaboration among local and regional institutions is improved.

## 4- WHAT ARE THE ACTIVITIES TO BE CARRIED OUT?

- Educational activities for the staff of the institutions involved in the Project about new technologies and their application at school, in families and local authorities;
- Development of training workshops about ICTs for educational staff;
- Development of a study about the needs and problems

- linked to ICTs at the involved institutions and at different levels: institutional, families, students and teachers.
- Campaigns directed to educational community regarding promotion of a safe and correct use of new technologies;

- Development of activities with our students that promote the European dimension: Comenius Regio Corner, exchange of e-mails, ...;
- Exchange, through the web platform, of working models and innovating experiences with the ICTs among our educational centers and Finland centers;
- Training and informative activities with families through a Family School about ICTs.

## 5- WHAT PRODUCTS WILL BE DEVELOPED?

- Leaflets and Project diffusion presentations;
- Manual and informative webpage for families;
- Website of the Project with a platform for exchange and diffusion of innovating activities with the ICTs;
- Manual of good use of ICTs at the classroom;
- Evaluation tools;
- Shared documents at the communication platform of the Project.
