

Students - Careers advice in schools - Orientierung an den Schulen- A Report of the teachers - Short exchanges

My Name and a short introduction of myself *

Hello, my name is Rana and i'm 16 years old. I'm from Frankfurt am main, Germany and made my first exchange to Poland.

The report of the methods used during the exchanges *

In Math and Polish the only method I saw was, that the students worked with workbooks and books, that the teacher explained something and gave tasks, which they evaluated at the end of the lesson.

in English the teacher worked with different methods, the students had workbooks and books with tasks, the students had also to work in groups of four and prepared a dialog.

in PE the students were seperated in girls and boys and had at first of all a worm up and some stretching after that they practised some methods for playing volleybal and at the and of the lesson they played basketball.

Something else interesting *

\

The best things I have seen *

I liked a lot the methods, which IT teacher used because she showed every step (with the beamer), and after that gave some tasks whit wich you could practise that what you learned before.
