

Careers advice in schools - Orientierung an den Schulen- A Report of the teachers - Short exchanges

My Name and a short introduction of myself *

Jarosław Burchardt ,
former IB teacher in a bilingual system, currently a history and social studies teacher at a high school in Poznań as well as a journalist at Radio Poznań

The report of the methods used during the exchanges *

At the school in Lamballe, teachers used different teaching methods: lecture / history /, presentation / languages / and work with exercises / physics, geography. Each of them activated students to activity. The most interesting lesson was given by Andre Koehler german language teacher presenting a fragment of the film and then discussing the language forms used during the conversation.

Something else interesting *

An interesting thing at the Lamballe school is the student absence control system. The teacher conducting the lessons does not mark the absence, there is another person from it. The teacher focuses only on the lesson. Another interesting fact is directness in relations between the headmaster and teachers

The best things I have seen *

What positively surprised me was the invitation by the host receiving our student for dinner. It happened to me for the first time while participating in the Erasmus program. It was a very nice experience. After that, it was worth taking advantage of the suggestion of a local coordinator and get to know the beautiful surroundings of Brittany in his company
