## Course assignment

### ✧ **Planning the teaching through ICT:**

Plan and if possible, carry out and evaluate some teaching topic (at least 5 lessons), during which you and especially your students use ICT often and in many ways. You can work with your pair but you have to have at least 8 lessons in this case.

✧ Just the plan is not enough. You have to prepare some material by yourself (e.g. instructions for editing images or videos or PowerPoint or if you want students to search information from the internet, give some urls). Remember also the goals and evaluation of the session.

✧ **The principle: the teacher who doesn't know the topic (or ICT) well, should be able to carry out his/her teaching using your plan and your material.**

✧ You have to tell also the context; so, tell how you could use your material with your students.

✧ If possible, combine this with your teaching practise or or temporary post.

✧ Return by 5.5.

## *Preparation for next time*

- ✧ Make yourself an Excel sheet that is something that you need you will need now or something that you think you will need in the future.
  - For example sheet from pupils grades, test results, budget...
  - Make sure there is two columns where is numbers
- ✧ Think about how you would teach excel? Make a new Excel sheet about something you would teach Excel to pupils.
  - You can decide about what it is or how old pupils are
  - This is an example from a table that pupils would do
- ✧ What would you need to learn from Excel? What is the hardest thing to you in it? Questionnaire in Peda.net

## *Tutorials*

- Week 3 introduction and discussion
- Week 5 Excel
- Week 6-8 Computational thinking
- Week 9 Antti Lokka: iPads and drawing
- Week 10 Google services, sertificate
- Week 11 Useful apps and software

*Always homework  
before next week!*

## *Course assignment*

- ✧ Advices in course sites
- ✧ You need to plan some teaching

## *Discuss with person beside you*

- ✧ What kind of ICT-skills do pupils need today?
- ✧ How about in 10 or 20 years?
- ✧ What is the most important skill for the teacher at the future?
- ✧ You are going to be working still on year 2060 😊

# *Course sites*

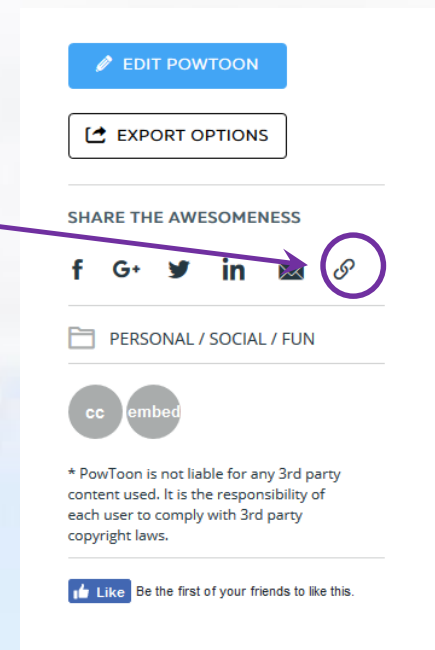

# Introductions

- ✧ Make an introduction video of yourself:
  - <https://www.powtoon.com/>
  - Use Firefox!
- ✧ Who are you?
- ✧ Where are you coming from?
- ✧ What are your hobbies?
- ✧ What do we have on year 2060?
- ✧ What is answer to your homework? What is the software or app you want or need to learn? Why?
- ✧ You have 45 minutes 😊

## When it is ready

- ✧ Choose from up right Preview and export
- ✧ When your animation is ready choose export
  - Give name and choose categories
  - Then choose Create
  - Then copy link
  - Put link into Peda.net

*Thanks!*

See you in two weeks!
