

Students - Careers advice in schools - Orientierung an den Schulen- A Report of the teachers - Short exchanges

My Name and a short introduction of myself *

Karolina Michalak, Student from Poland (last year of high school in Poznań)

The report of the methods used during the exchanges *

teachers use beamers to show clearer something to the students. They are trying to stay in touch through all lesson with them. They walk around classrooms and ask if everything is clear. They are also take students to show their homework and to find out possible mistakes.

Something else interesting *

Teachers are always there for students. They are trying to keep conversation between those two sides. In my view it is really important to talk with students but with no pressure on them.

The best things I have seen *

The best thing i have seen was the organization of the school. Connection between students and teacher and of course big canteen with delicious food for everyone. Great thing is also classrooms which are made for special lessons for example, room which is made for the ones who wants to be nurses. Big advantage is also a big library with lost of books and materials. It is a great place to get some rest or to learn and be focused.
