

Avaruusseikkailu

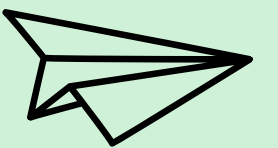

Seuraa tähteä! Aloita vihreästä lipusta.

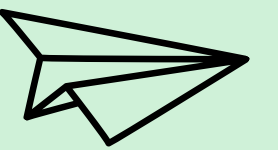

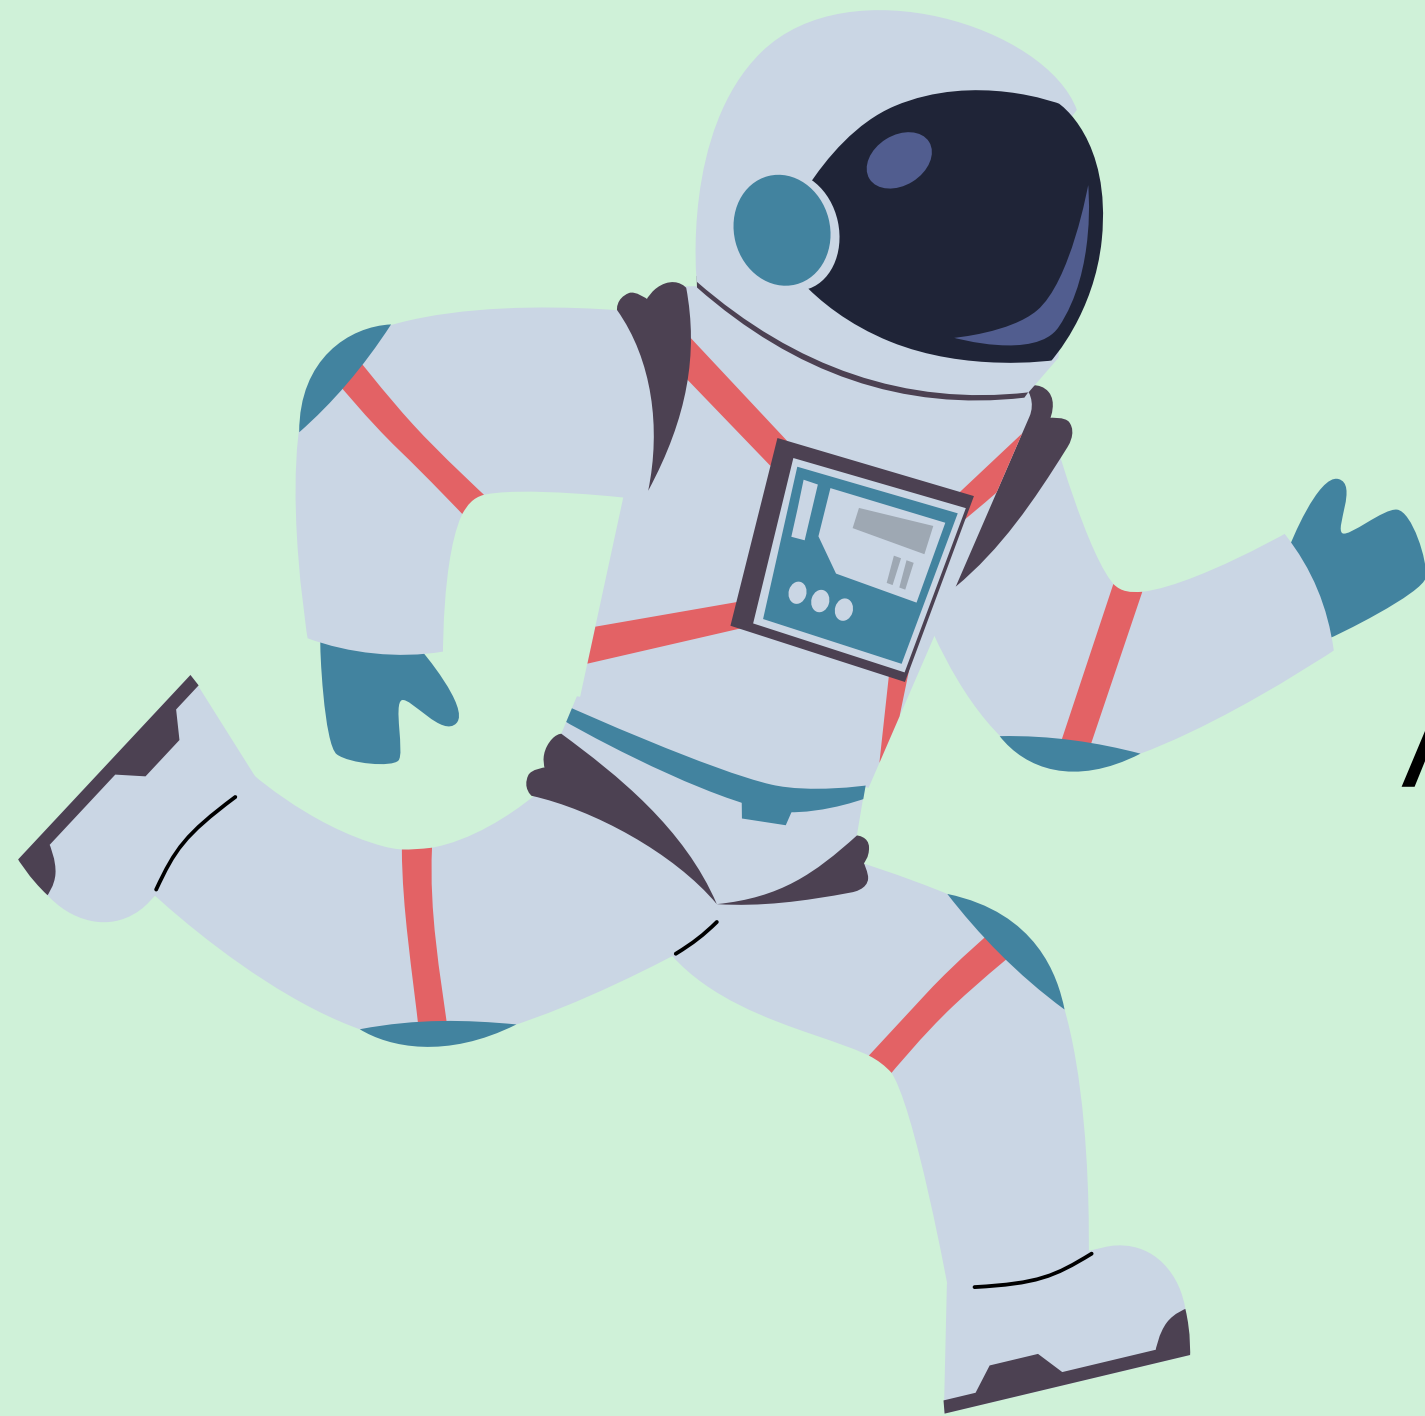

Raketti valmiina lähtöön

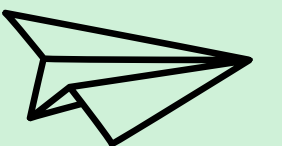

Mene kyykkyyyn. Laske kymmenestä takaperin yhteen 10,9,8.....2,1,0. Nollan kohdalla nouse ylös, nosta kädetkin ylös ja hyppää niin korkealle kuin pystyt. Kuin raketti lähtisi avaruuteen.

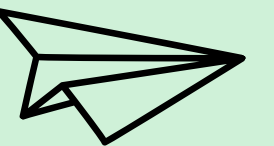

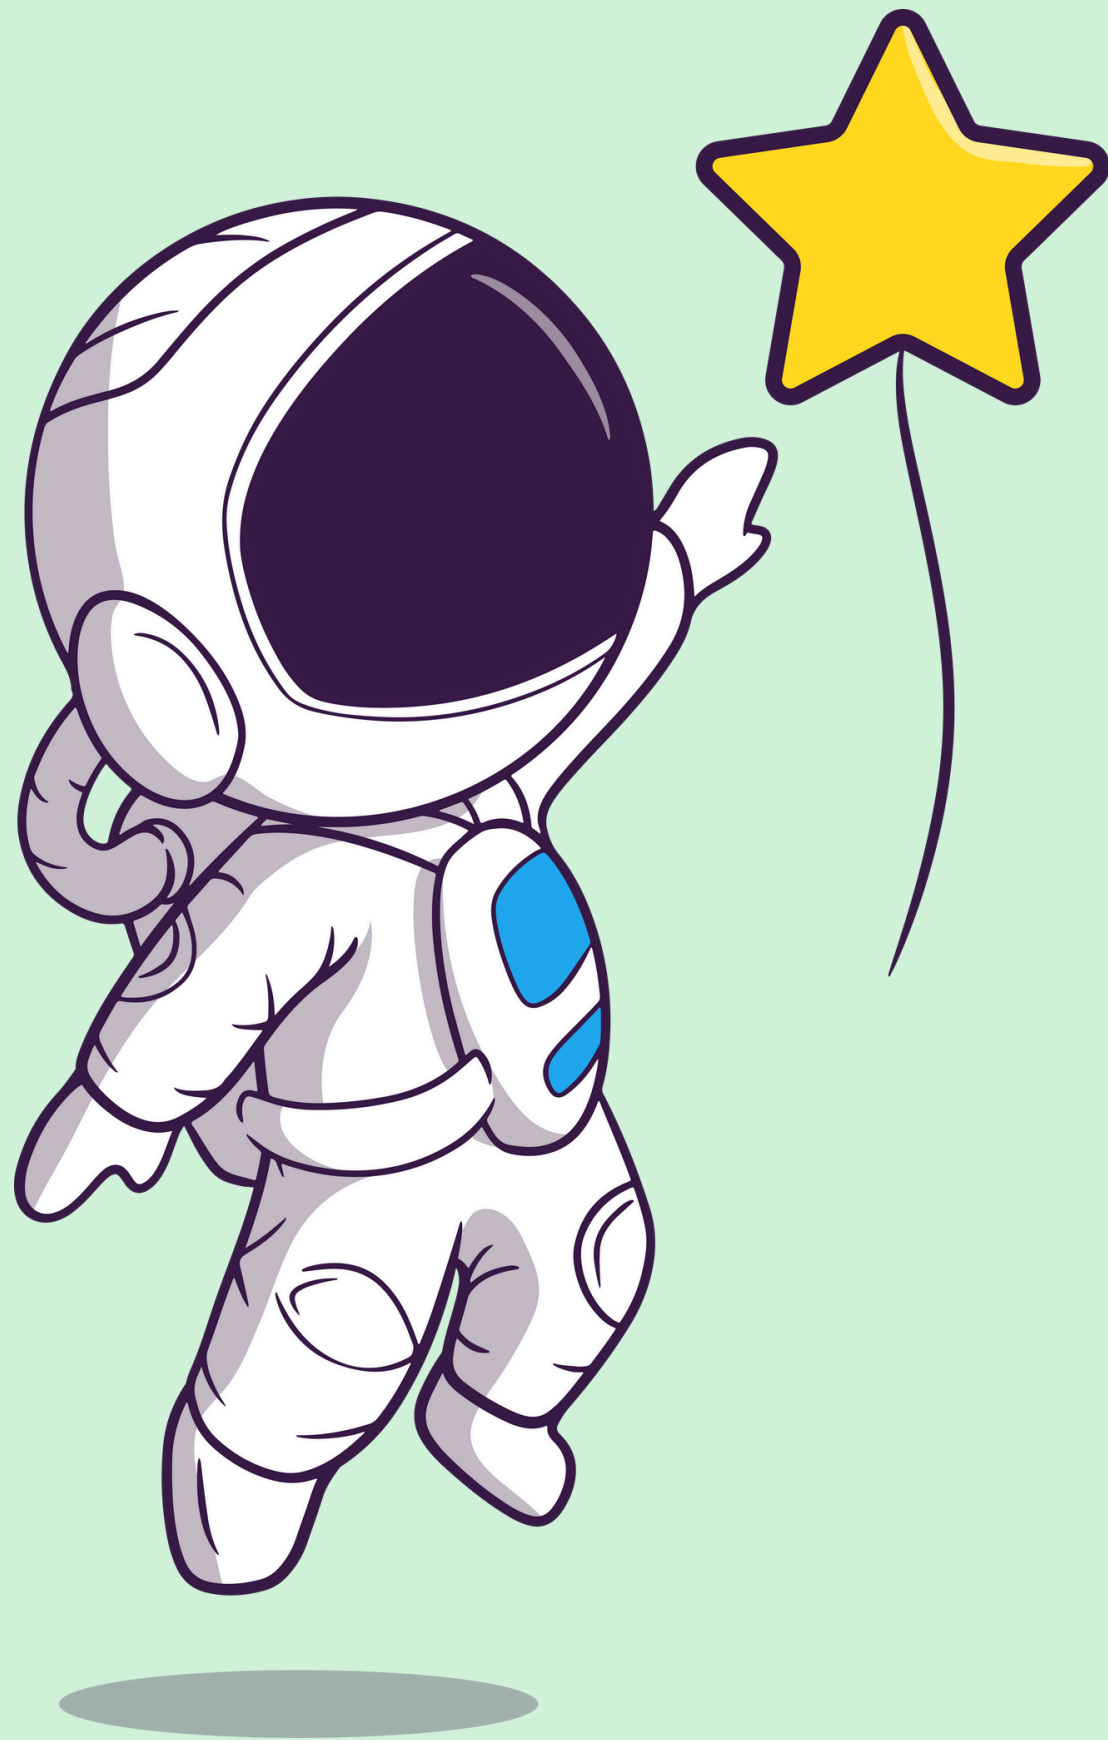

Nyt ollaan avaruudessa.
Kokeillaan, miten astronautti
juoksee avaruudessa?
Astronautin juoksu näyttää kuin
hidastetussa elokuvassa.
Osaatko sinä juosta
hidastetusti?

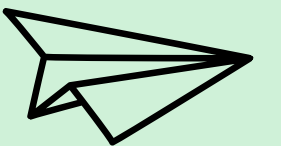

Nyt tasapainoillaan. Kuvittele, että olet astronautti ja sinun pitää pysyä raketin päällä. Avaruudessa ei ole maan vetovoimaa, joten siellä leijuu. Miten voi tasapainoilla, jos leijuu? Kokeile.

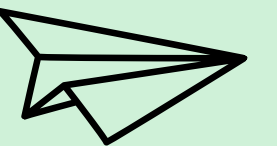

Avaruudessa on paljon tähtiä ja planeettoja. Kurkota tai hypi korkealle ja yritä napata niitä käsilläsi. Saatko kiinni Marsin tai Jupiterin?

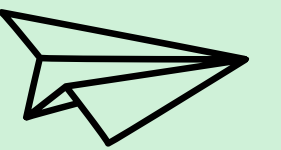

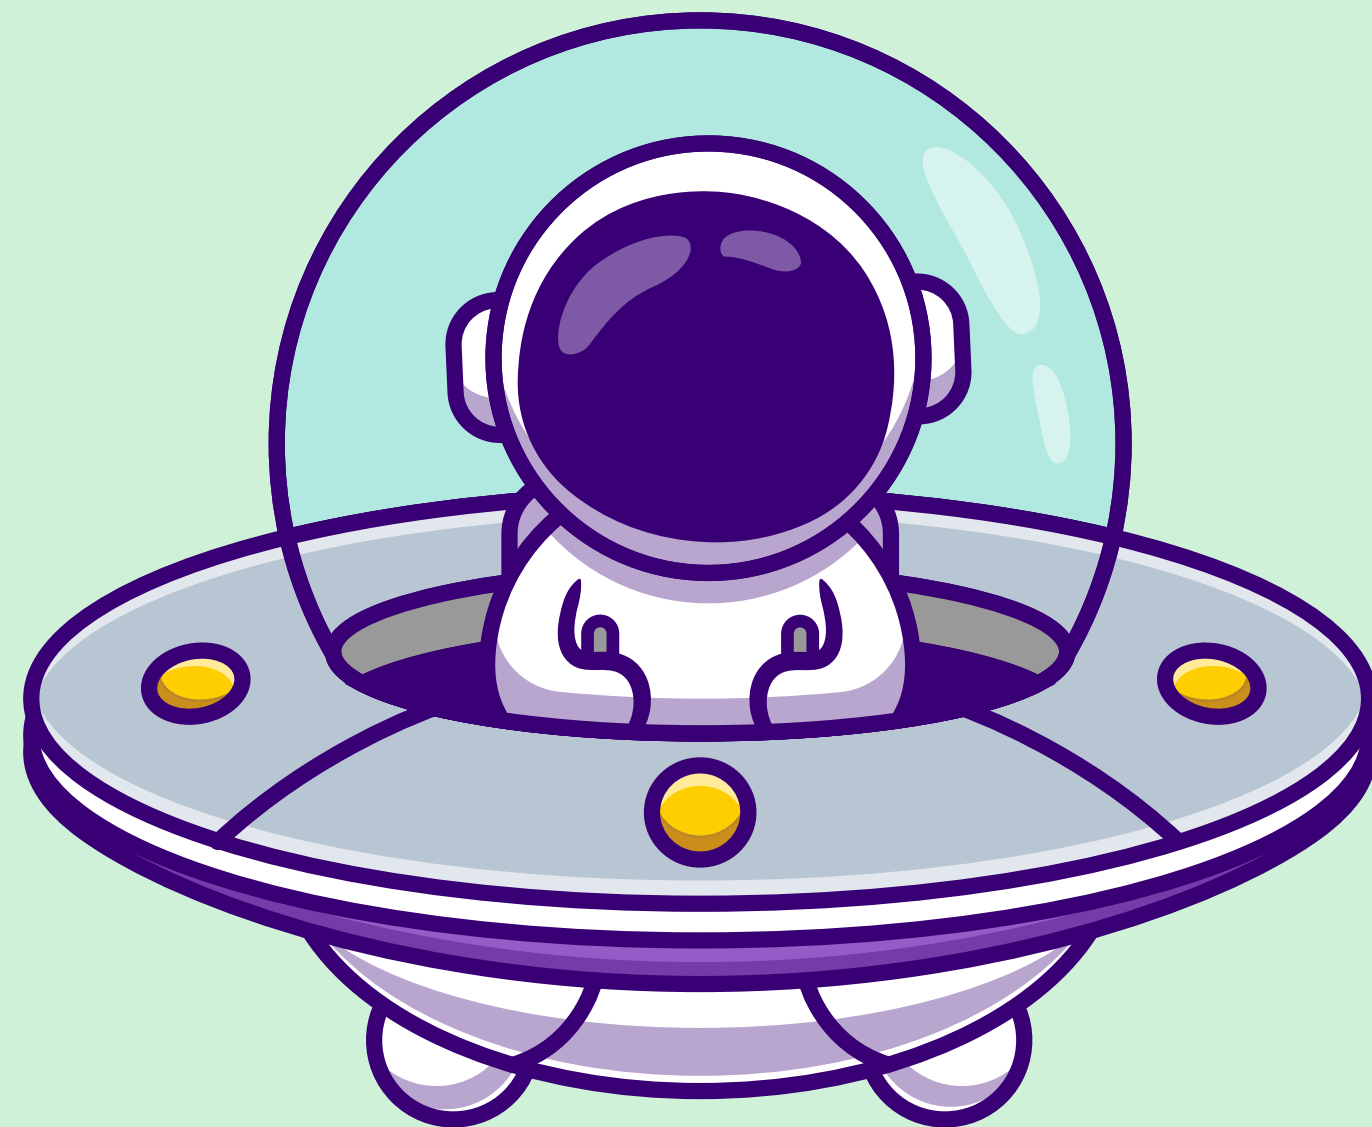

Hui, nyt pyöritään.
Takaisin raketin kyytiin ja
pyöritään ympäri
planeettoja.

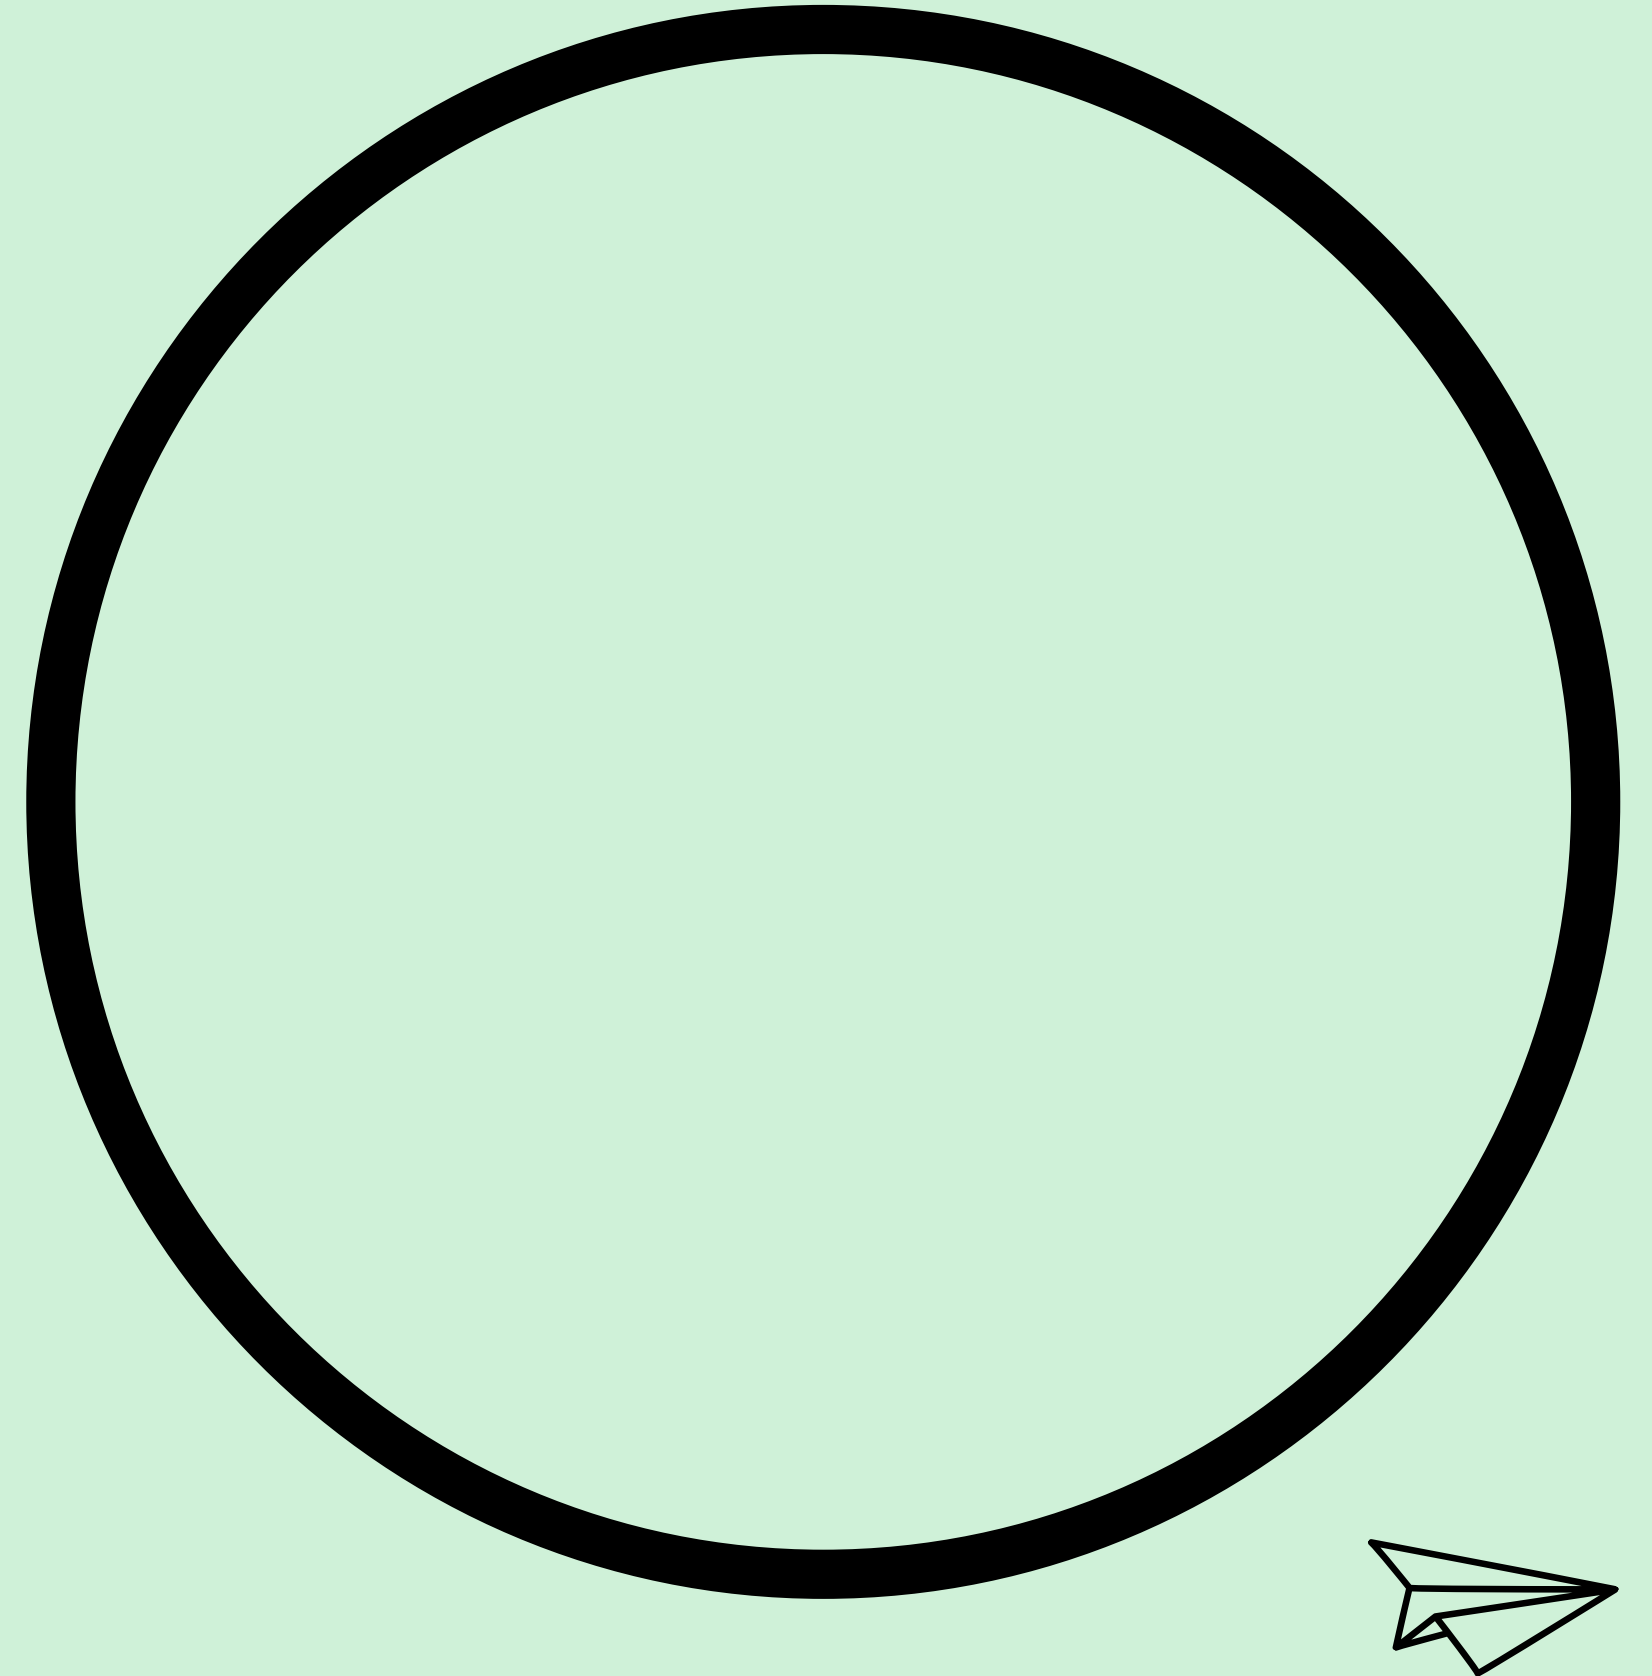

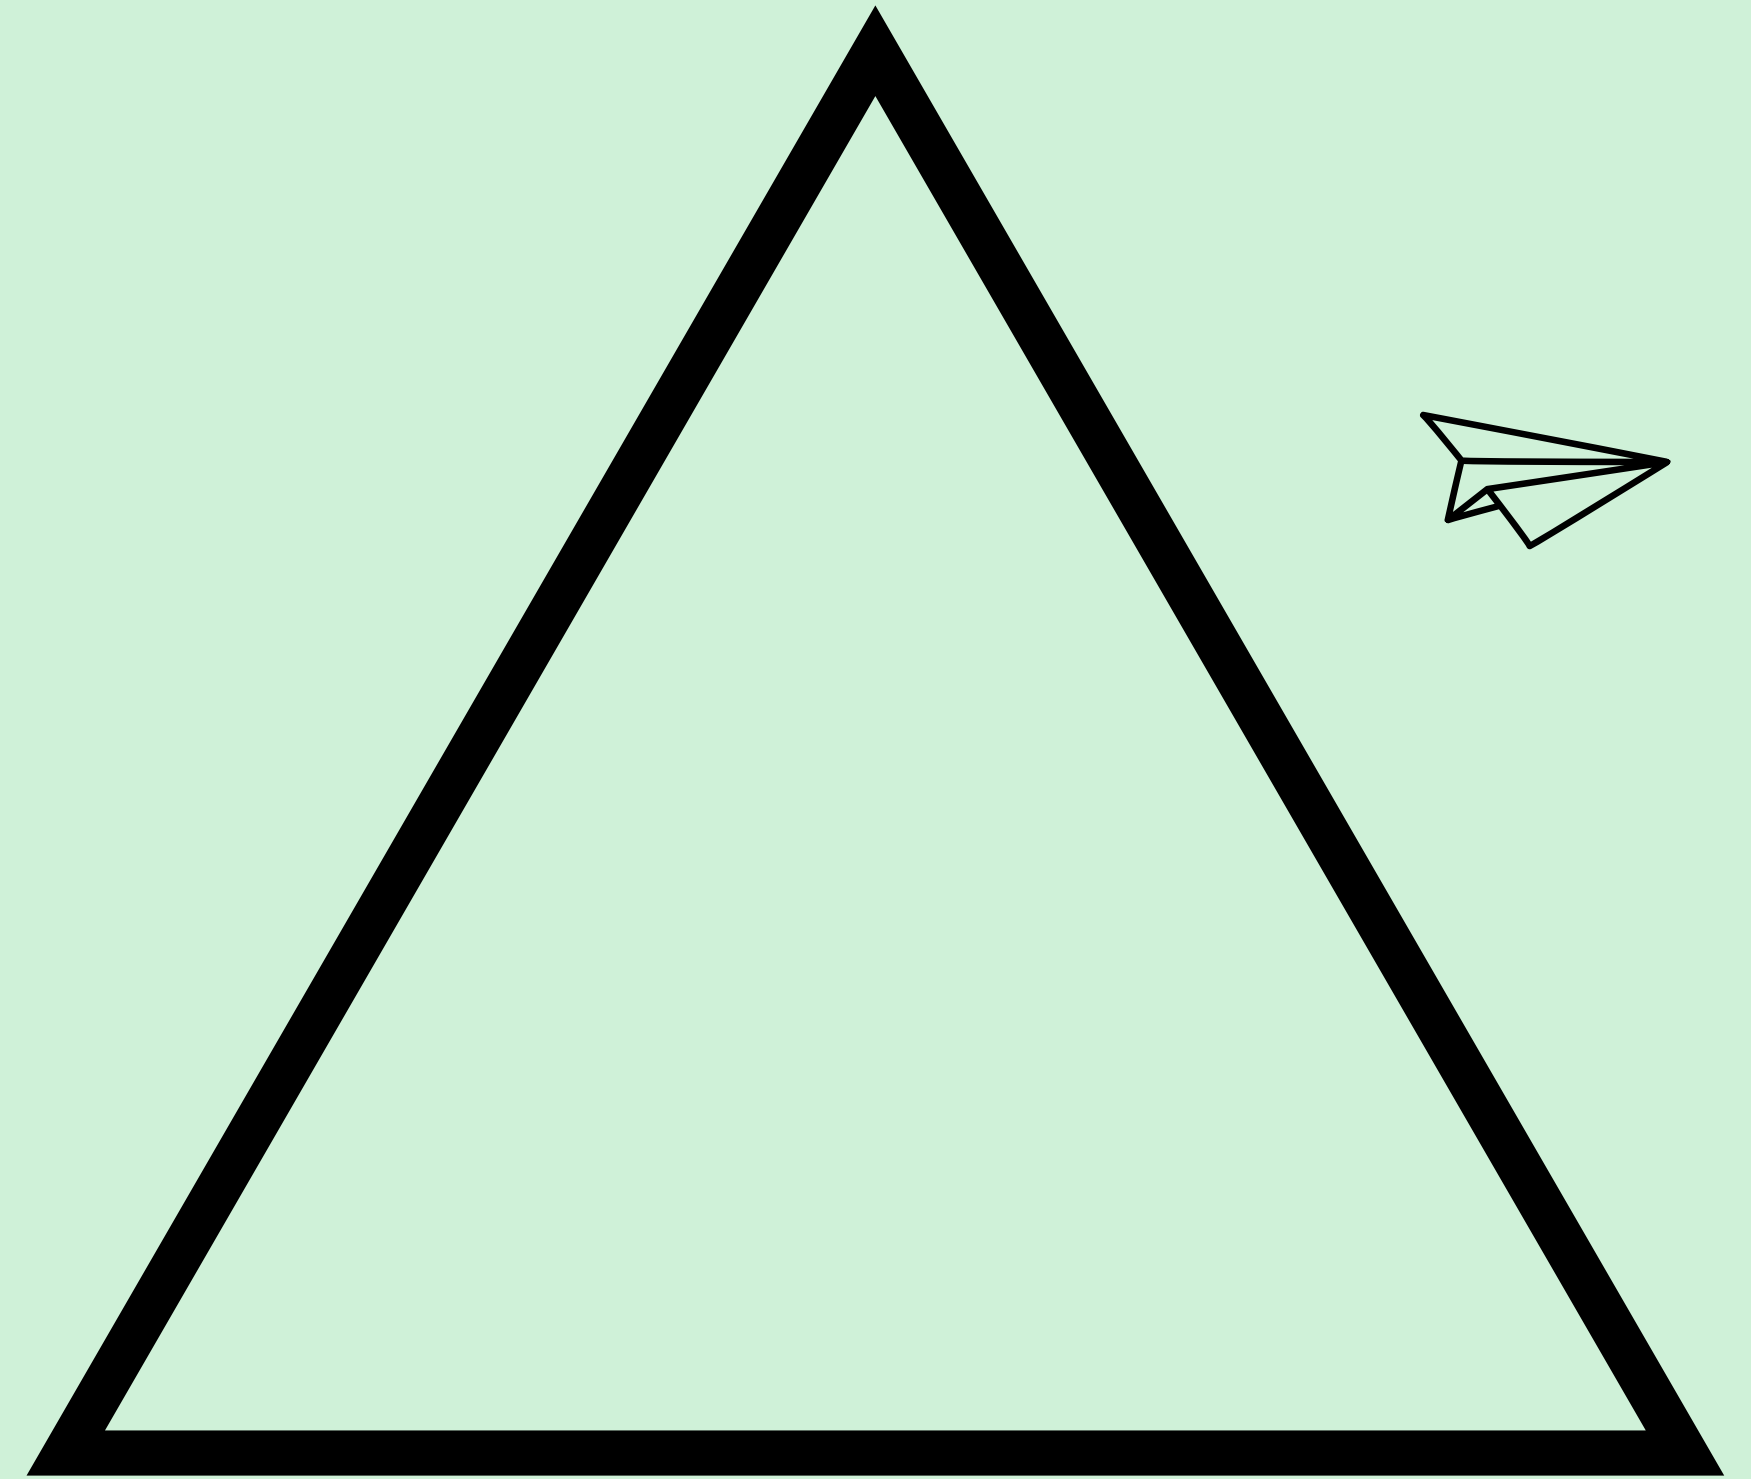

Matka jatkuu kieppuvalle avaruusalukselle.

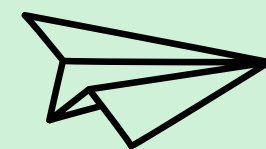

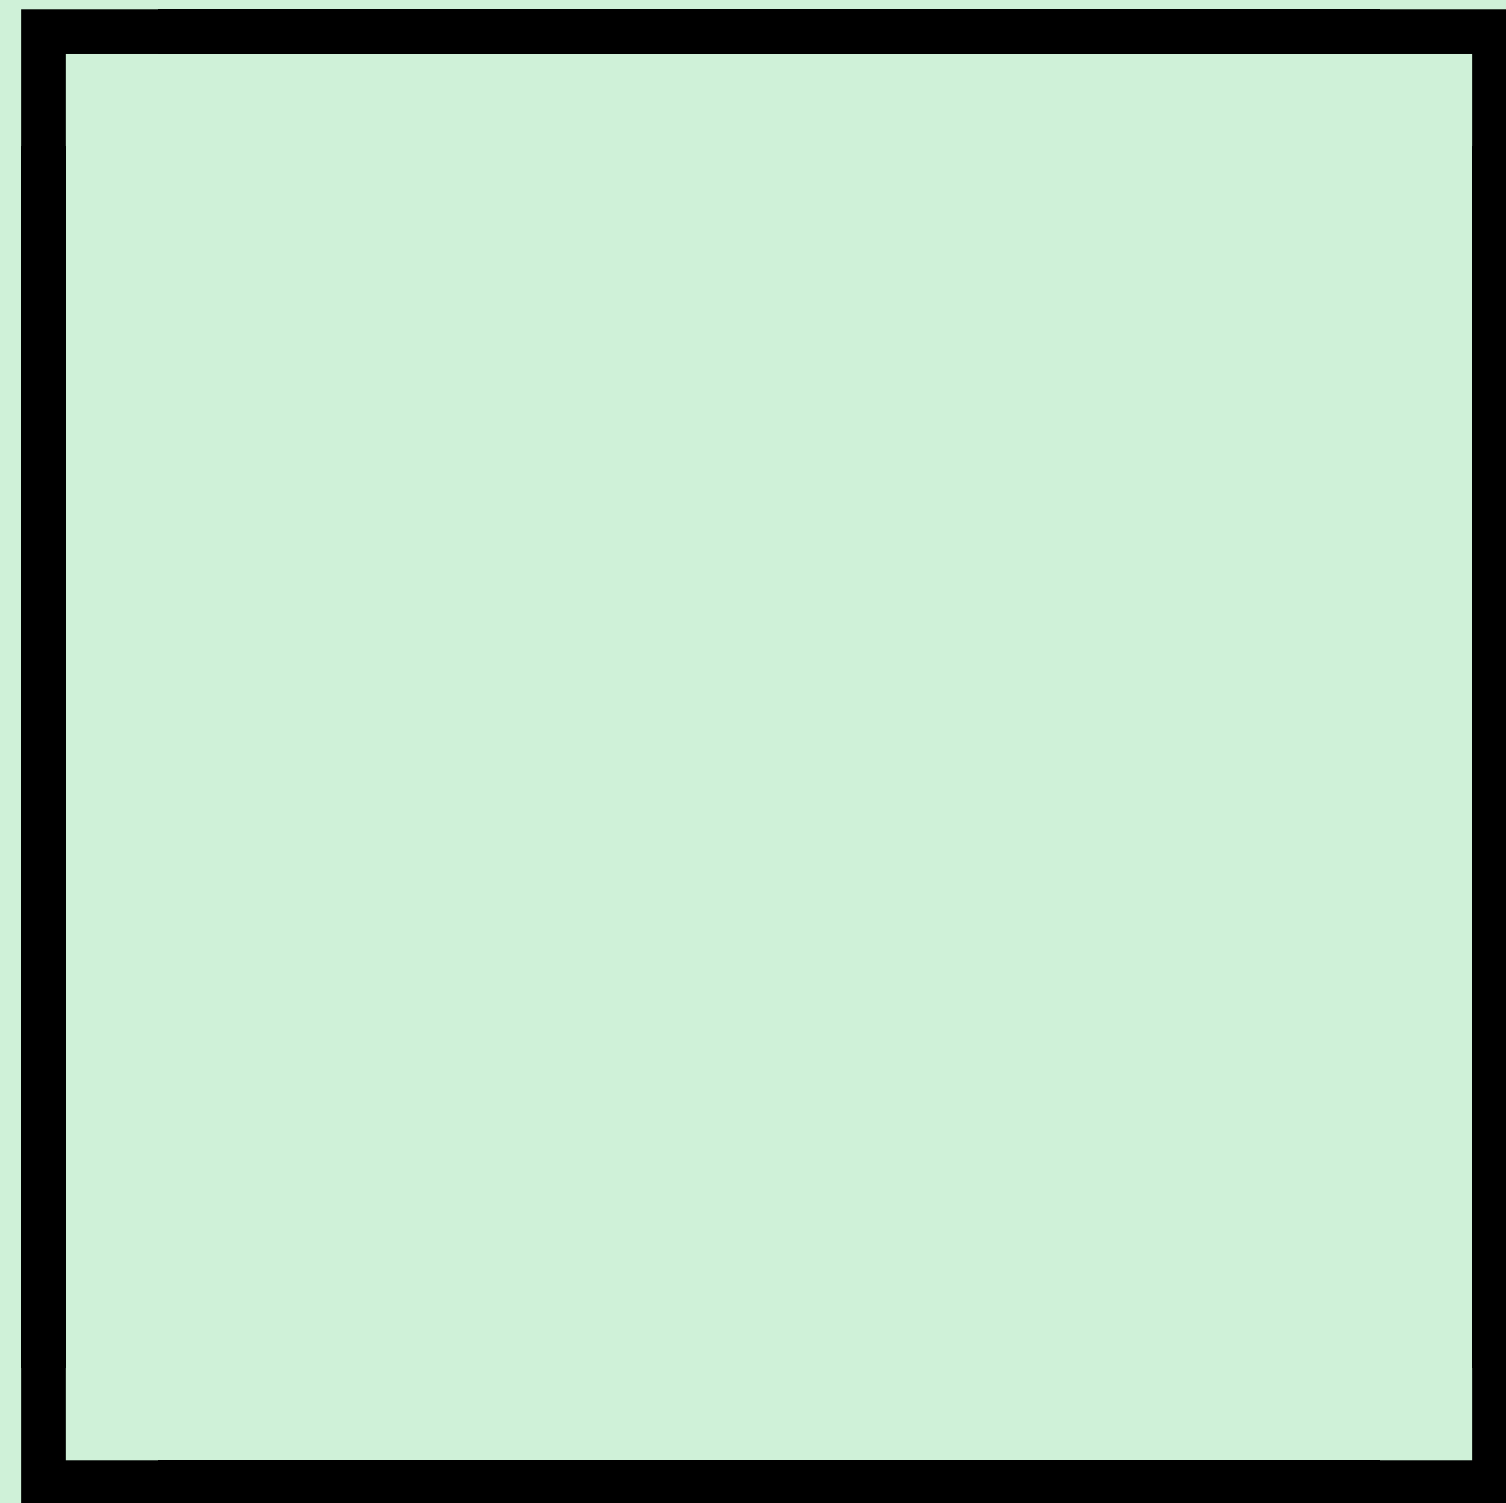

Osaatko tehdä omasta
kehostasi ympyrän
muotoisen?

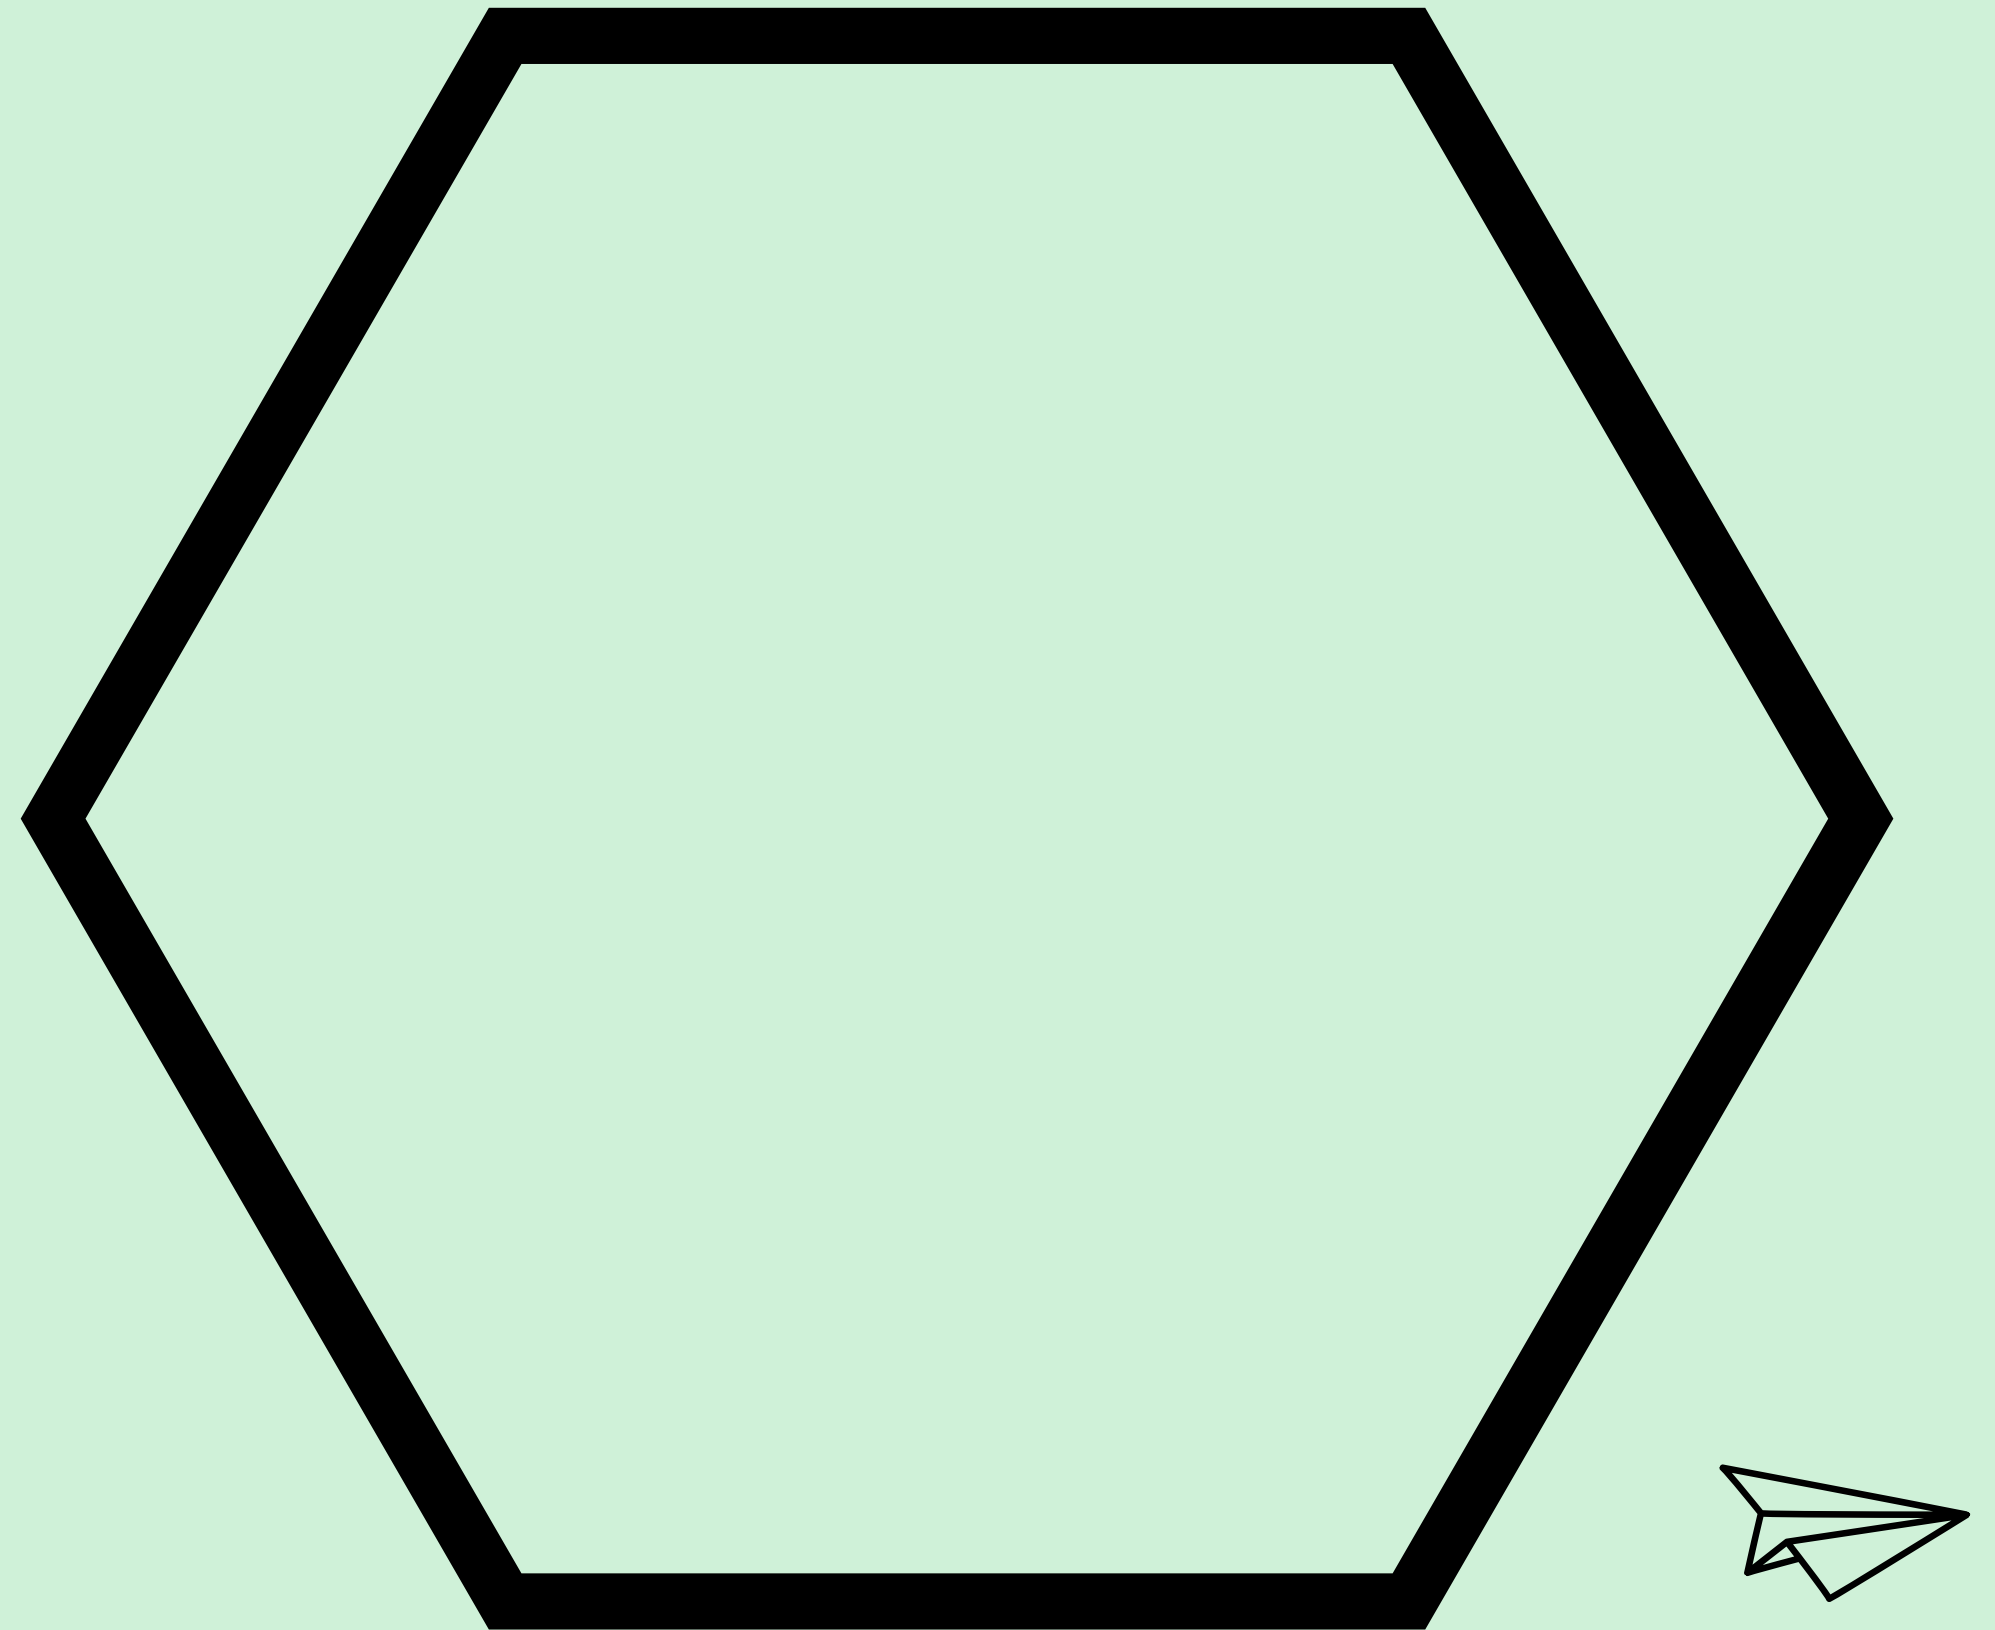

Osaatko tehdä omasta
kehostasi kolmion
muotoisen?

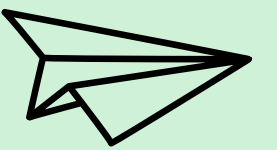

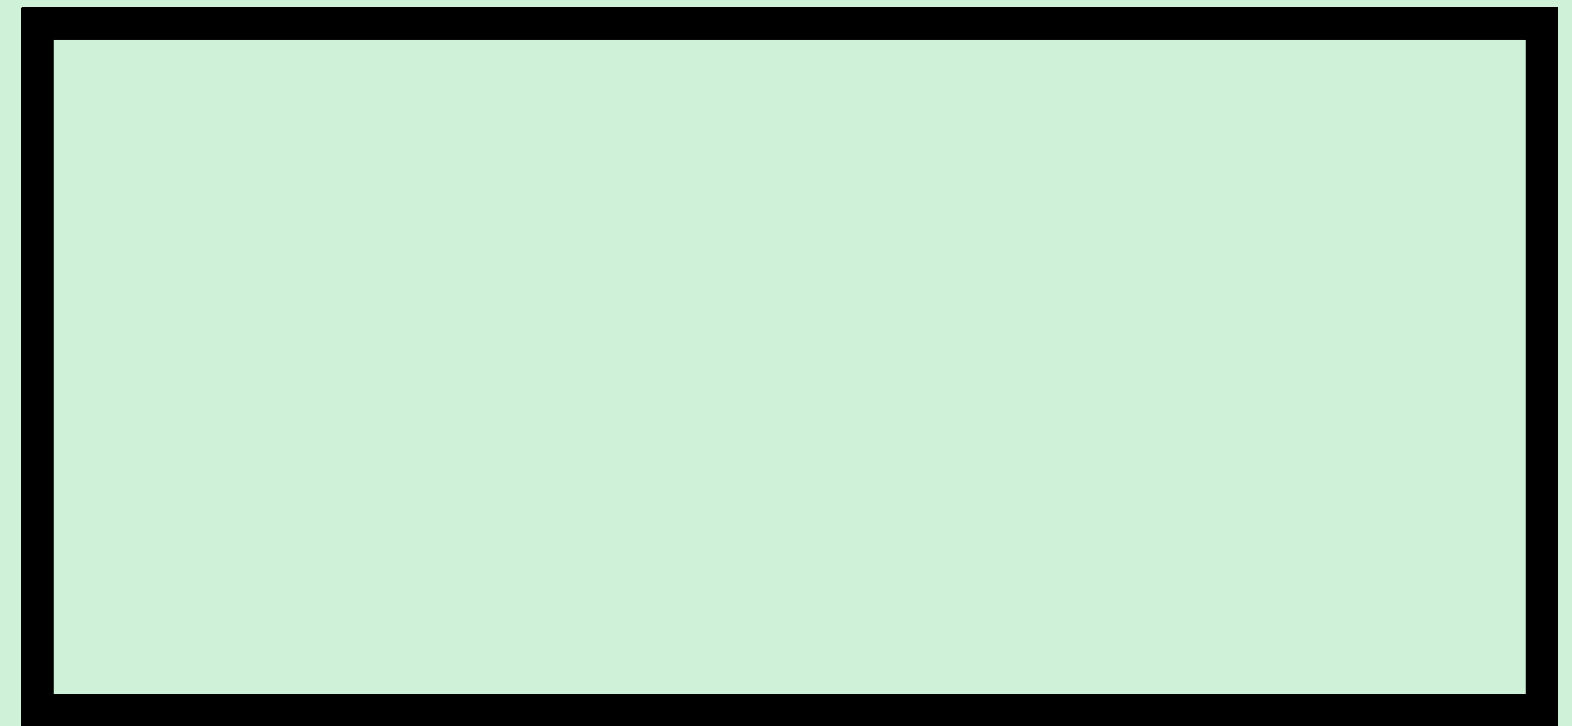

Osaatko tehdä omasta
kehostasi neliön muotoisen?

Osaatko tehdä omasta
kehostasi kuusikulmaisen
muotoisen? Onko liian
vaikea... kokeile kaverin
kanssa.

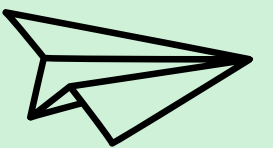

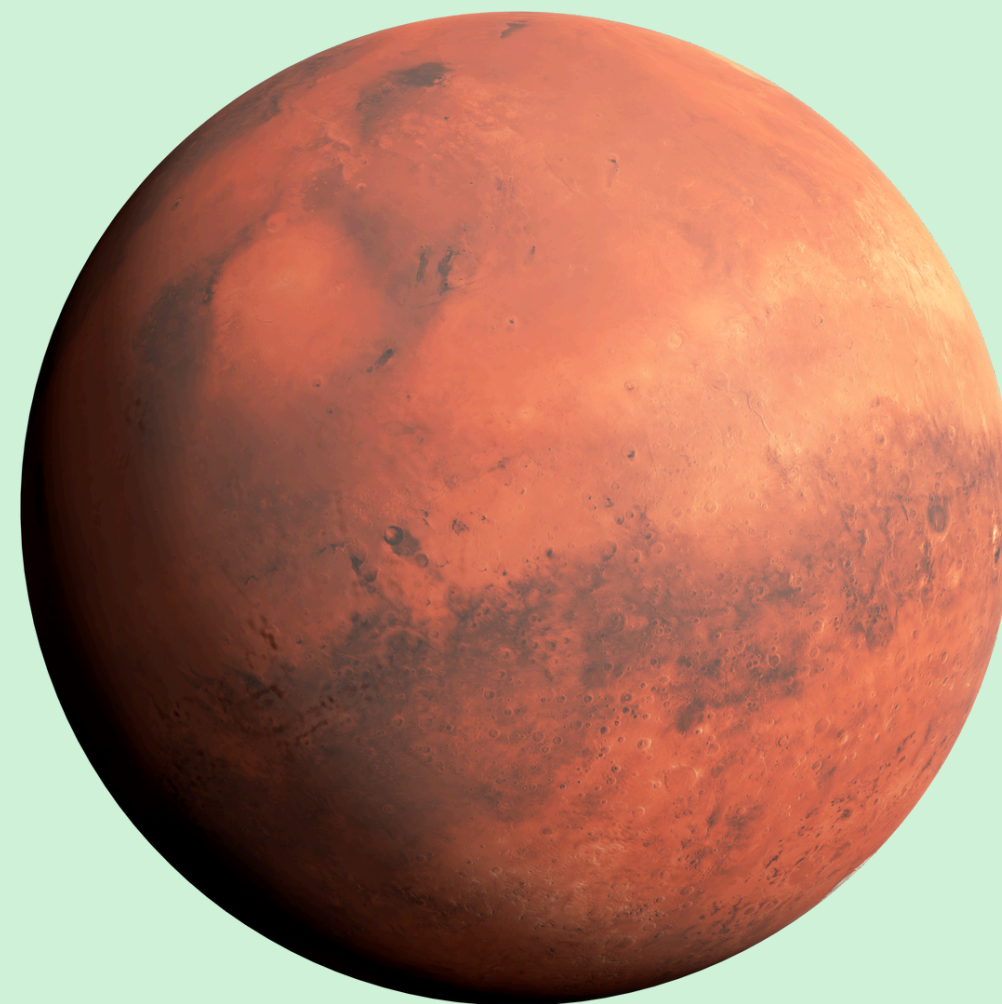

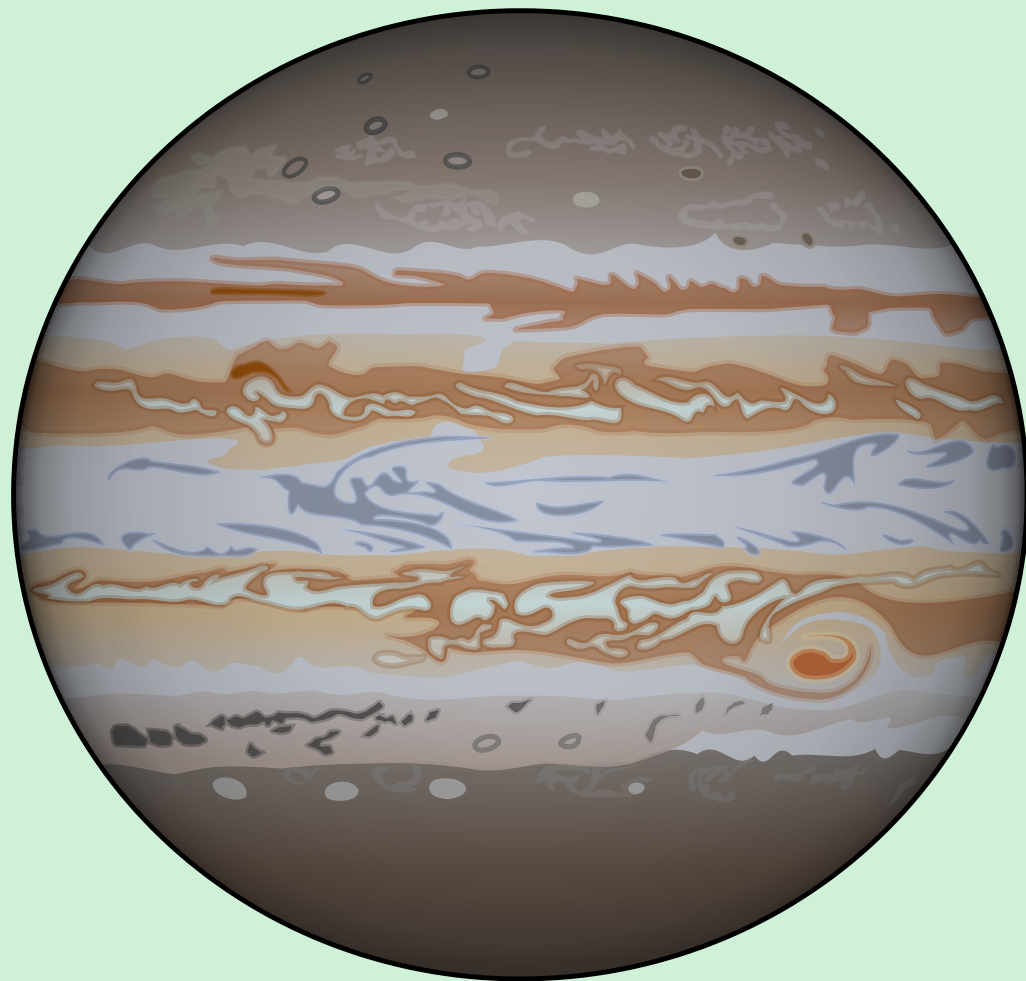

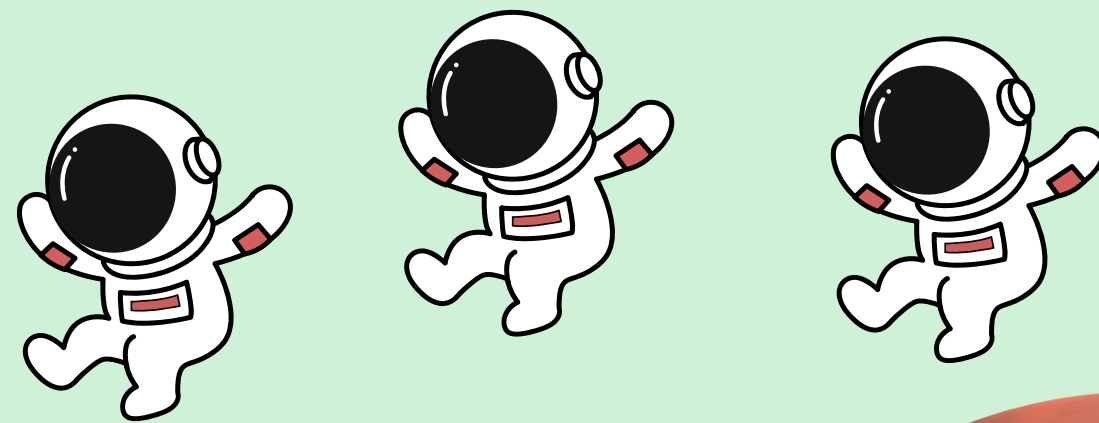

Osaatko tehdä omasta
kehostasi suorakulmion
muotoisen? Onko liian
vaikea... kokeile kaverin
kanssa.

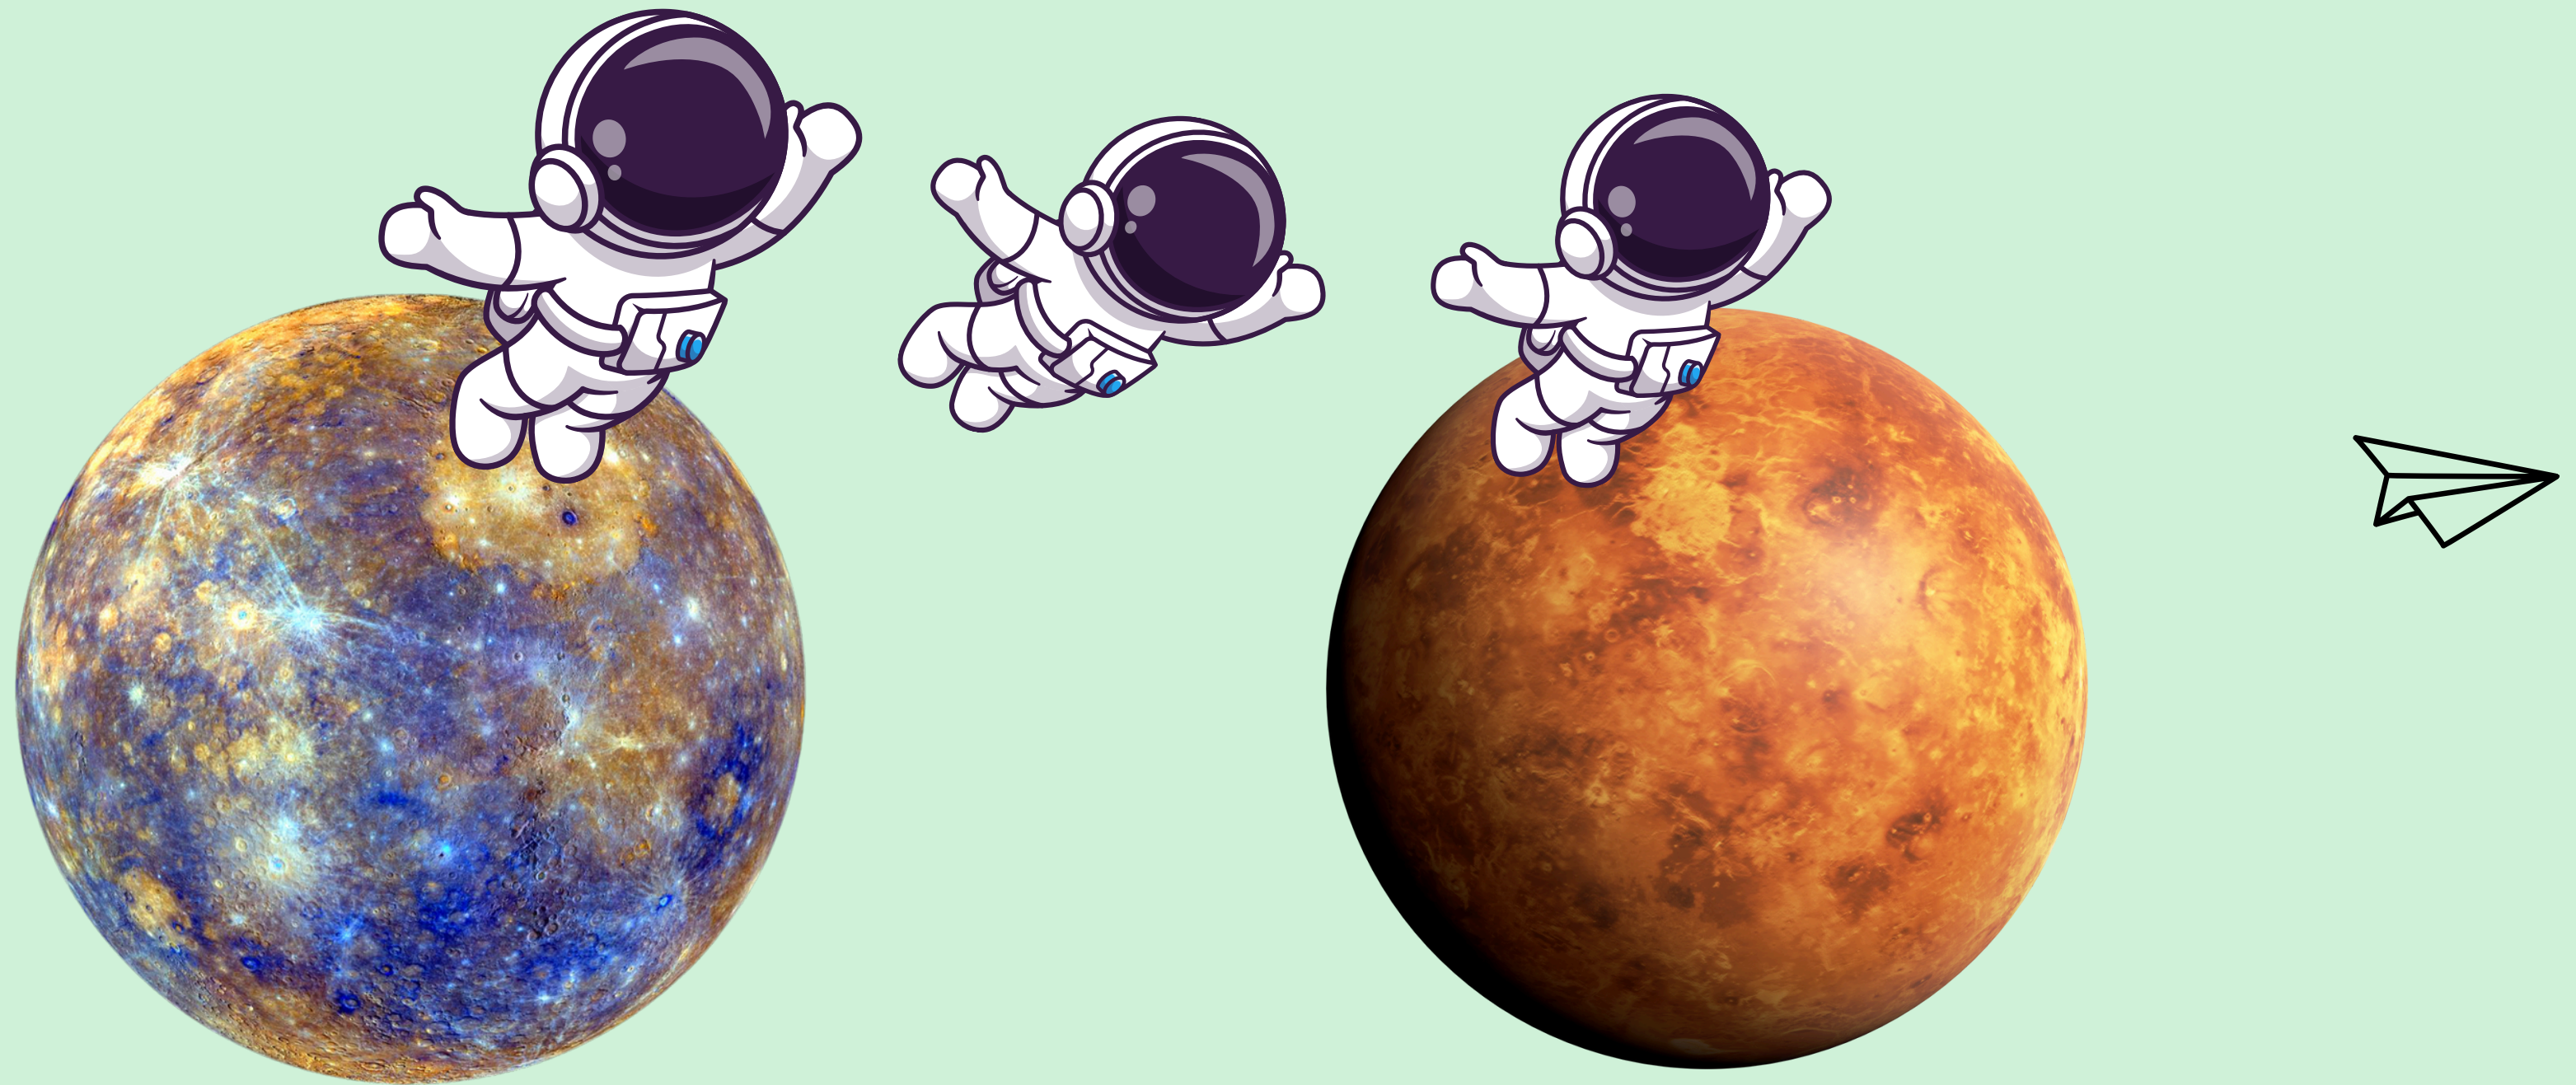

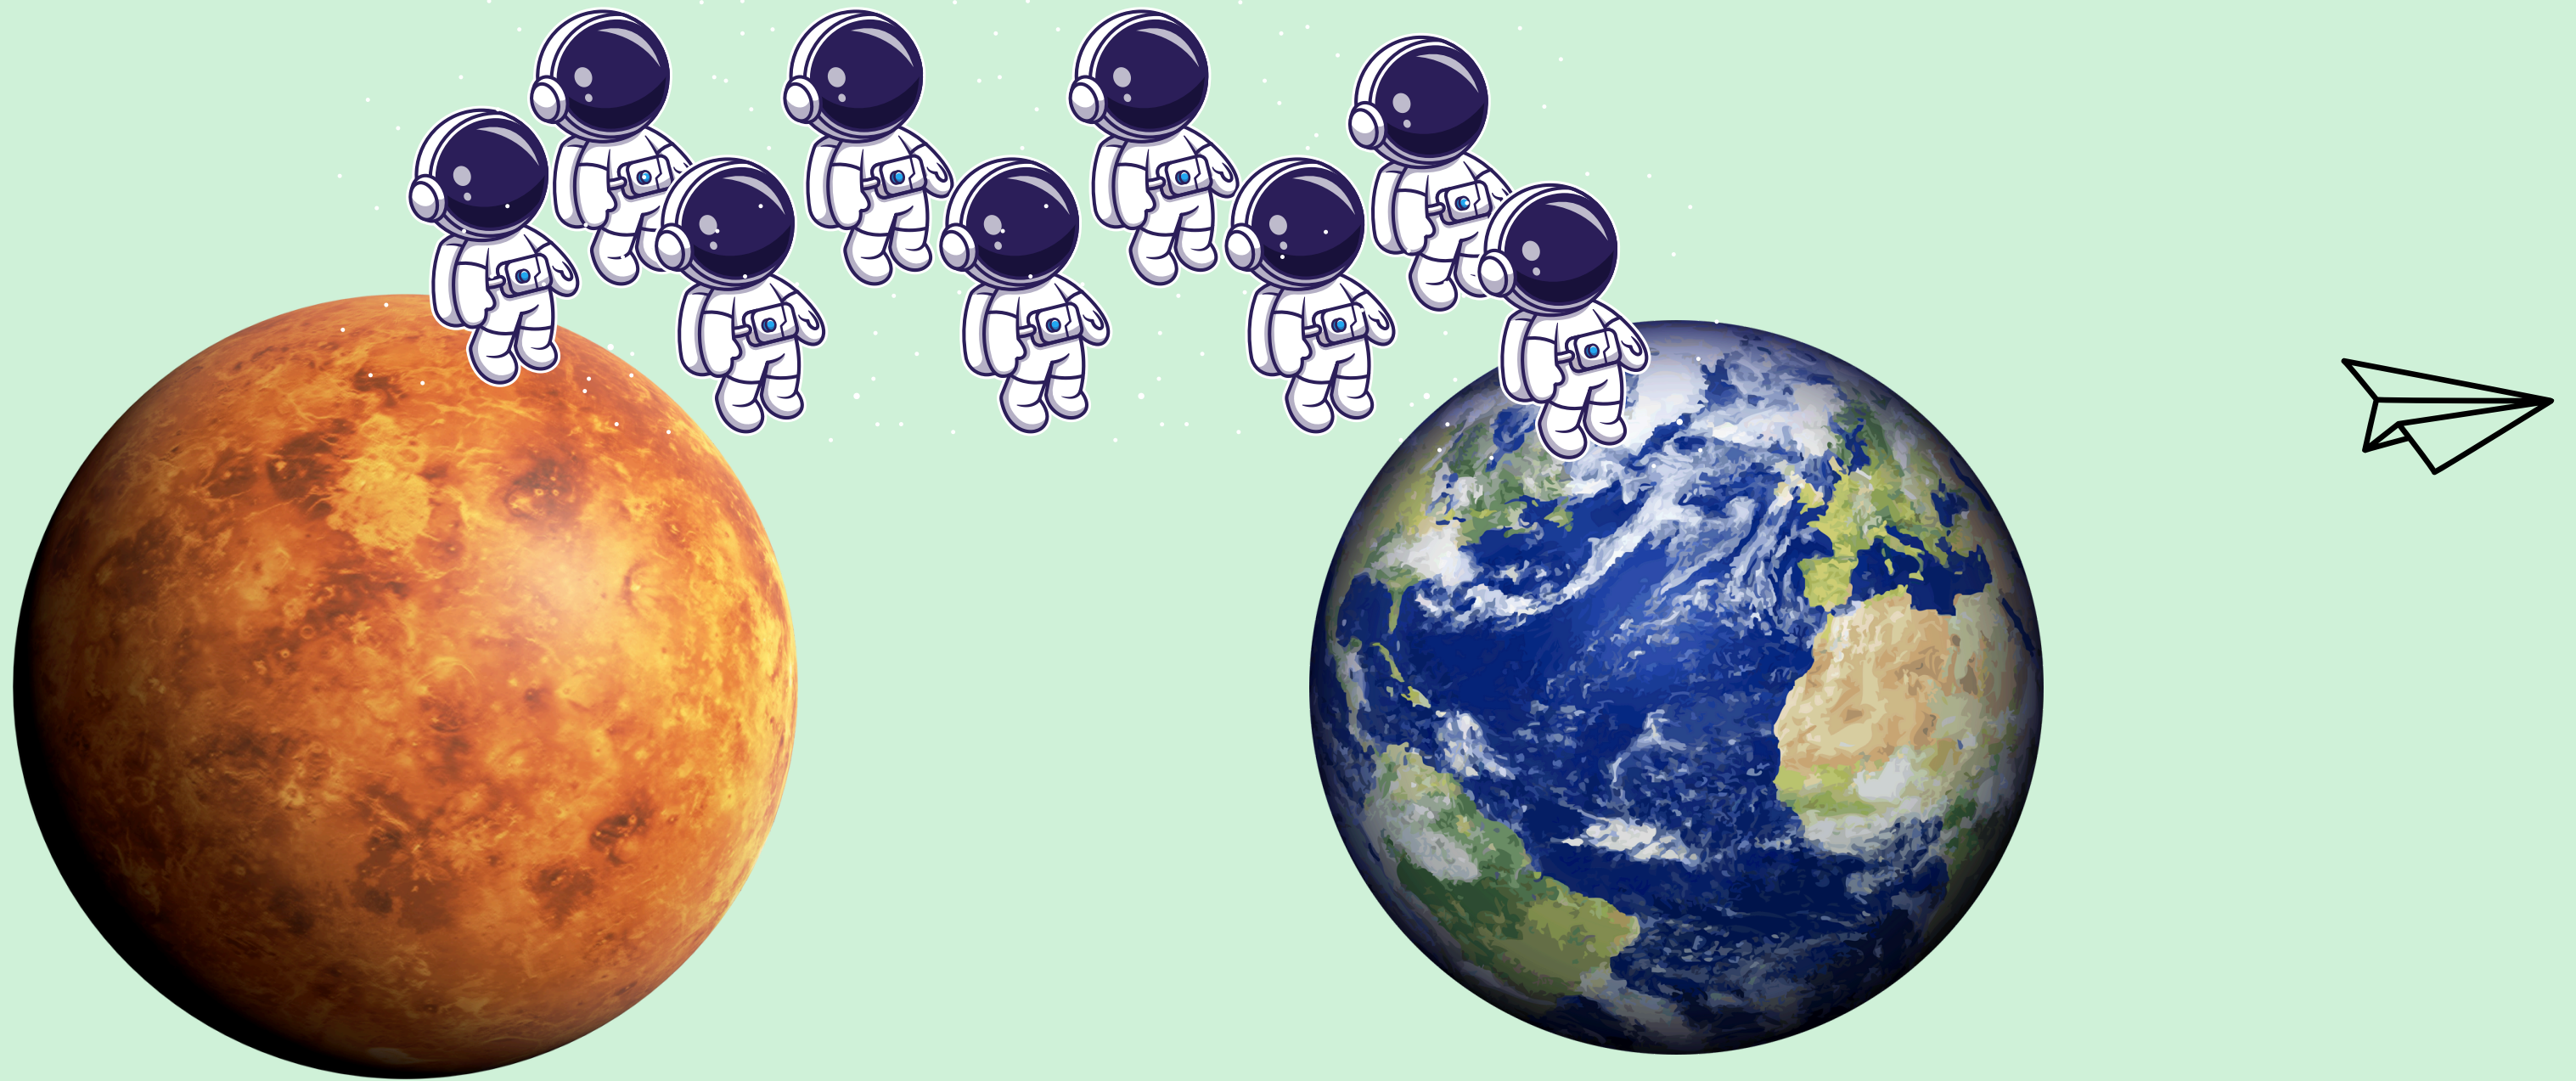

Hypitään planeetalta toiselle

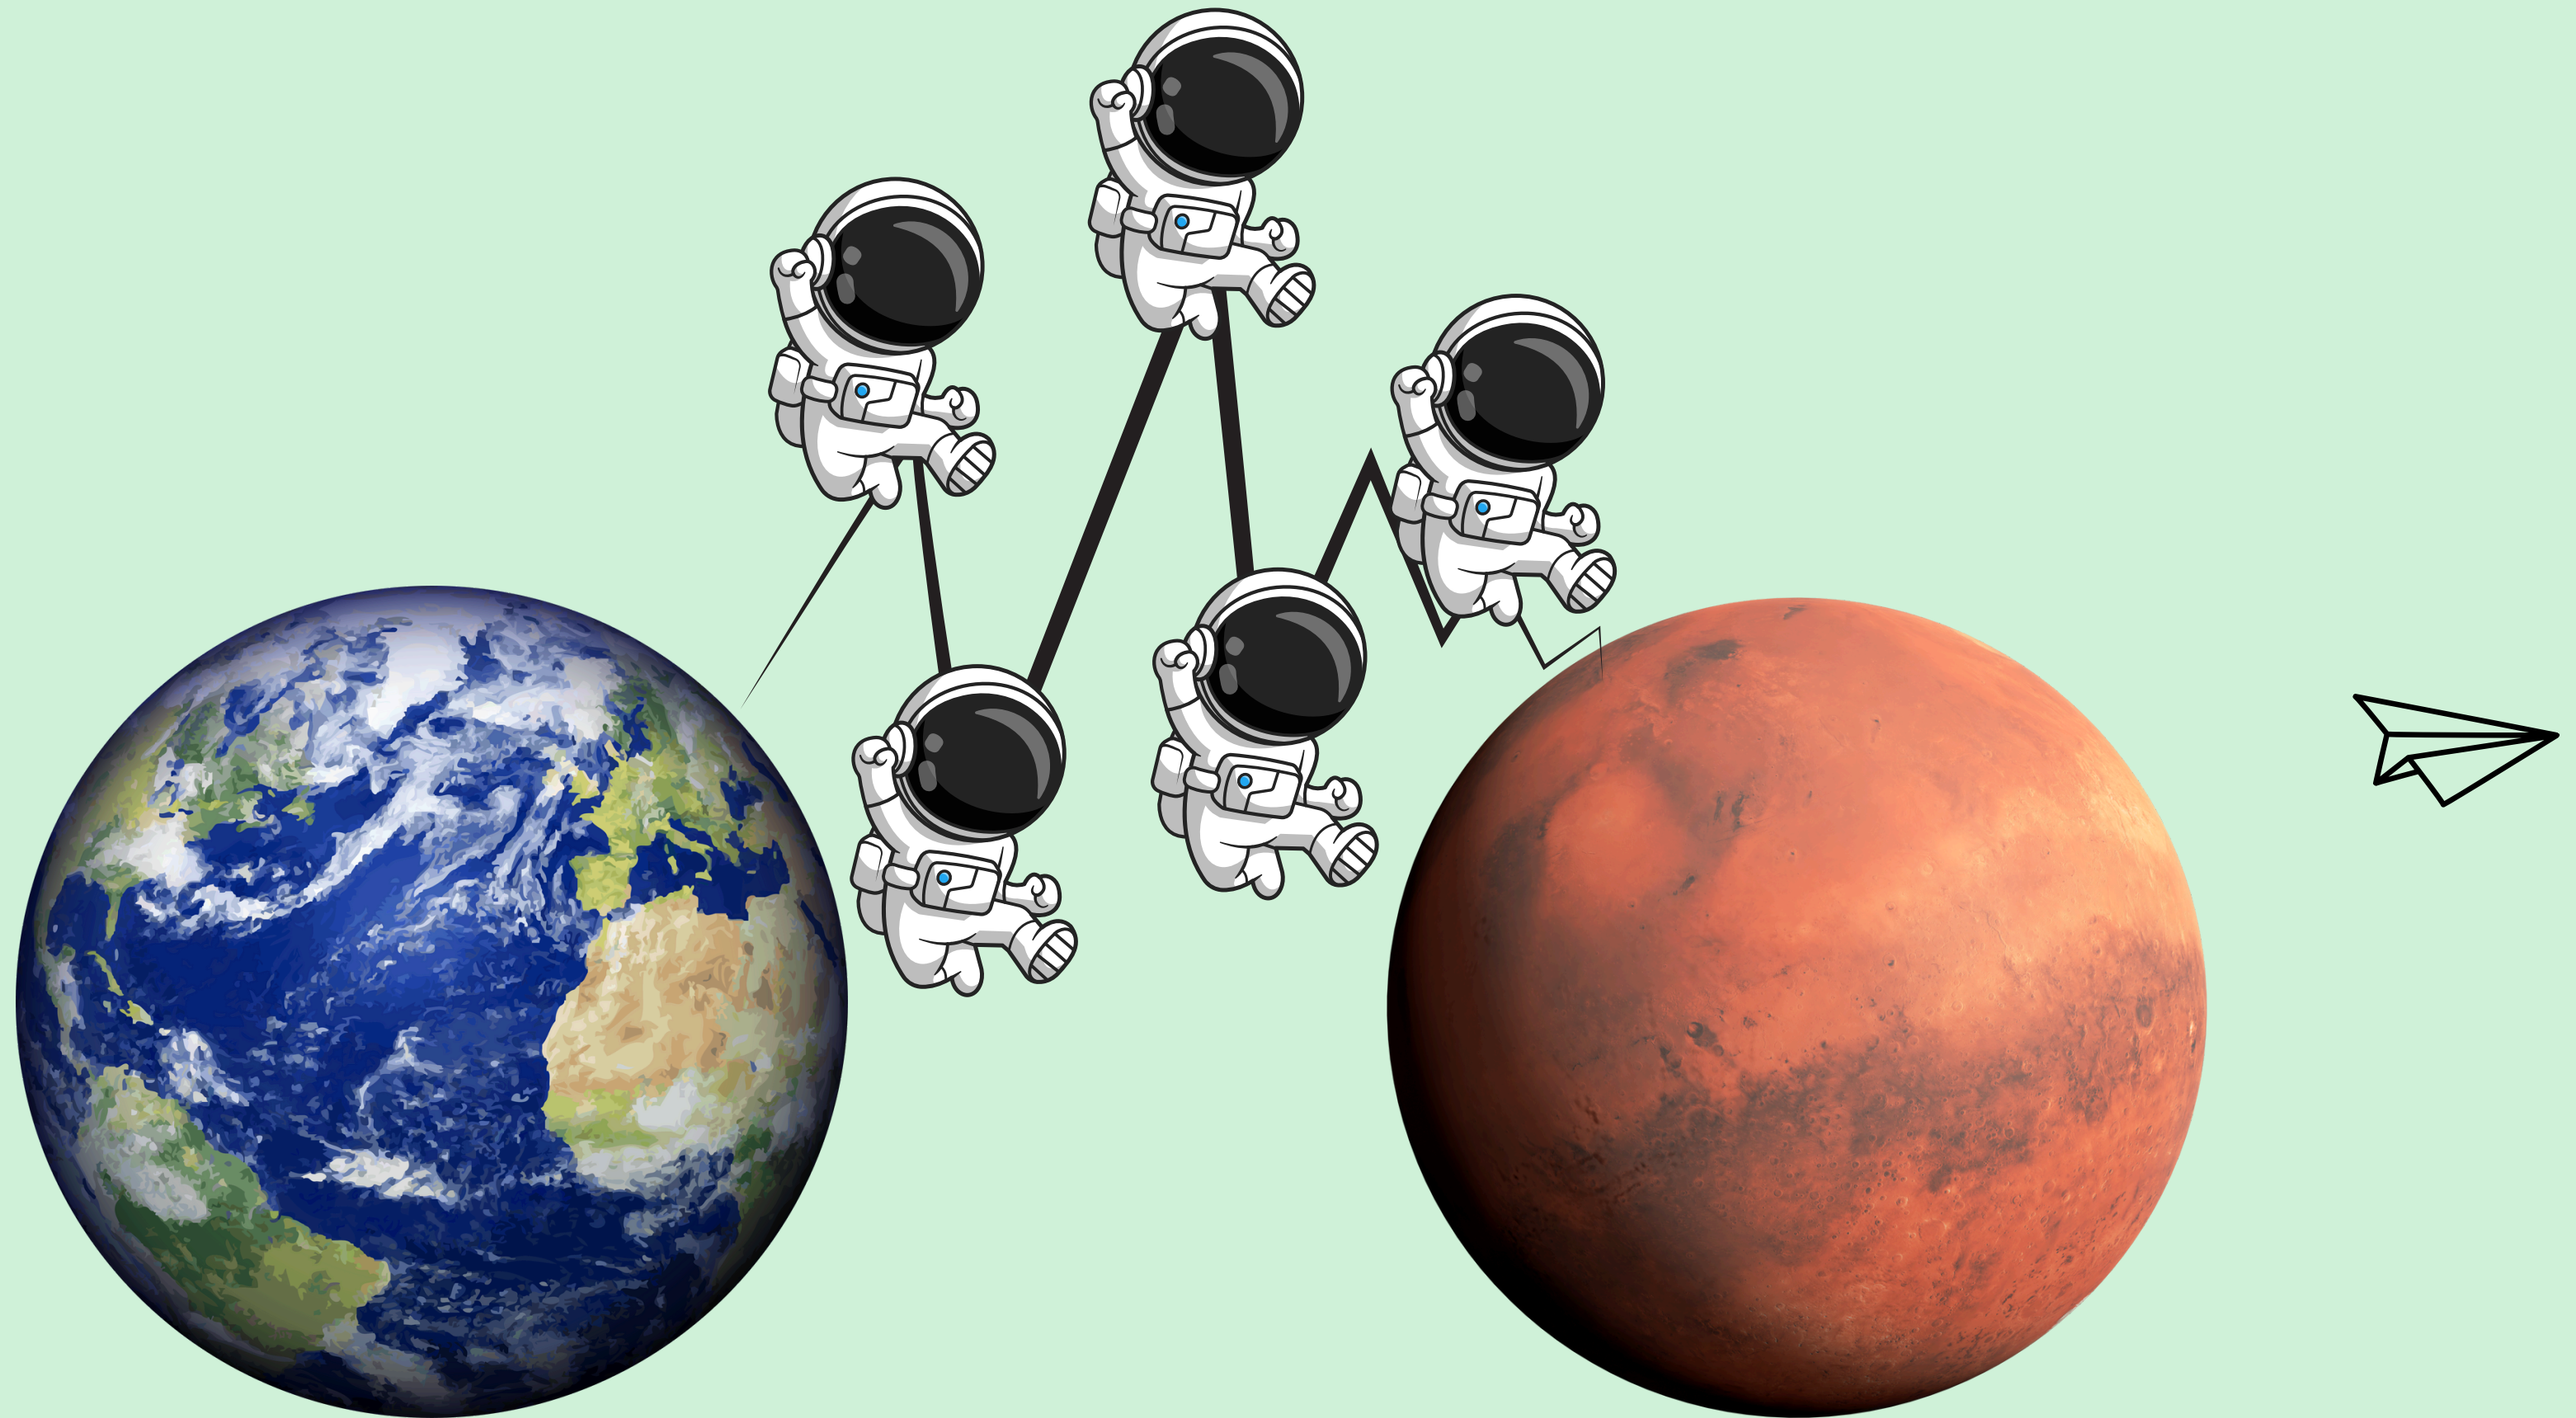

Hyppää suuri loikka Merkuriuksesta Venukselle

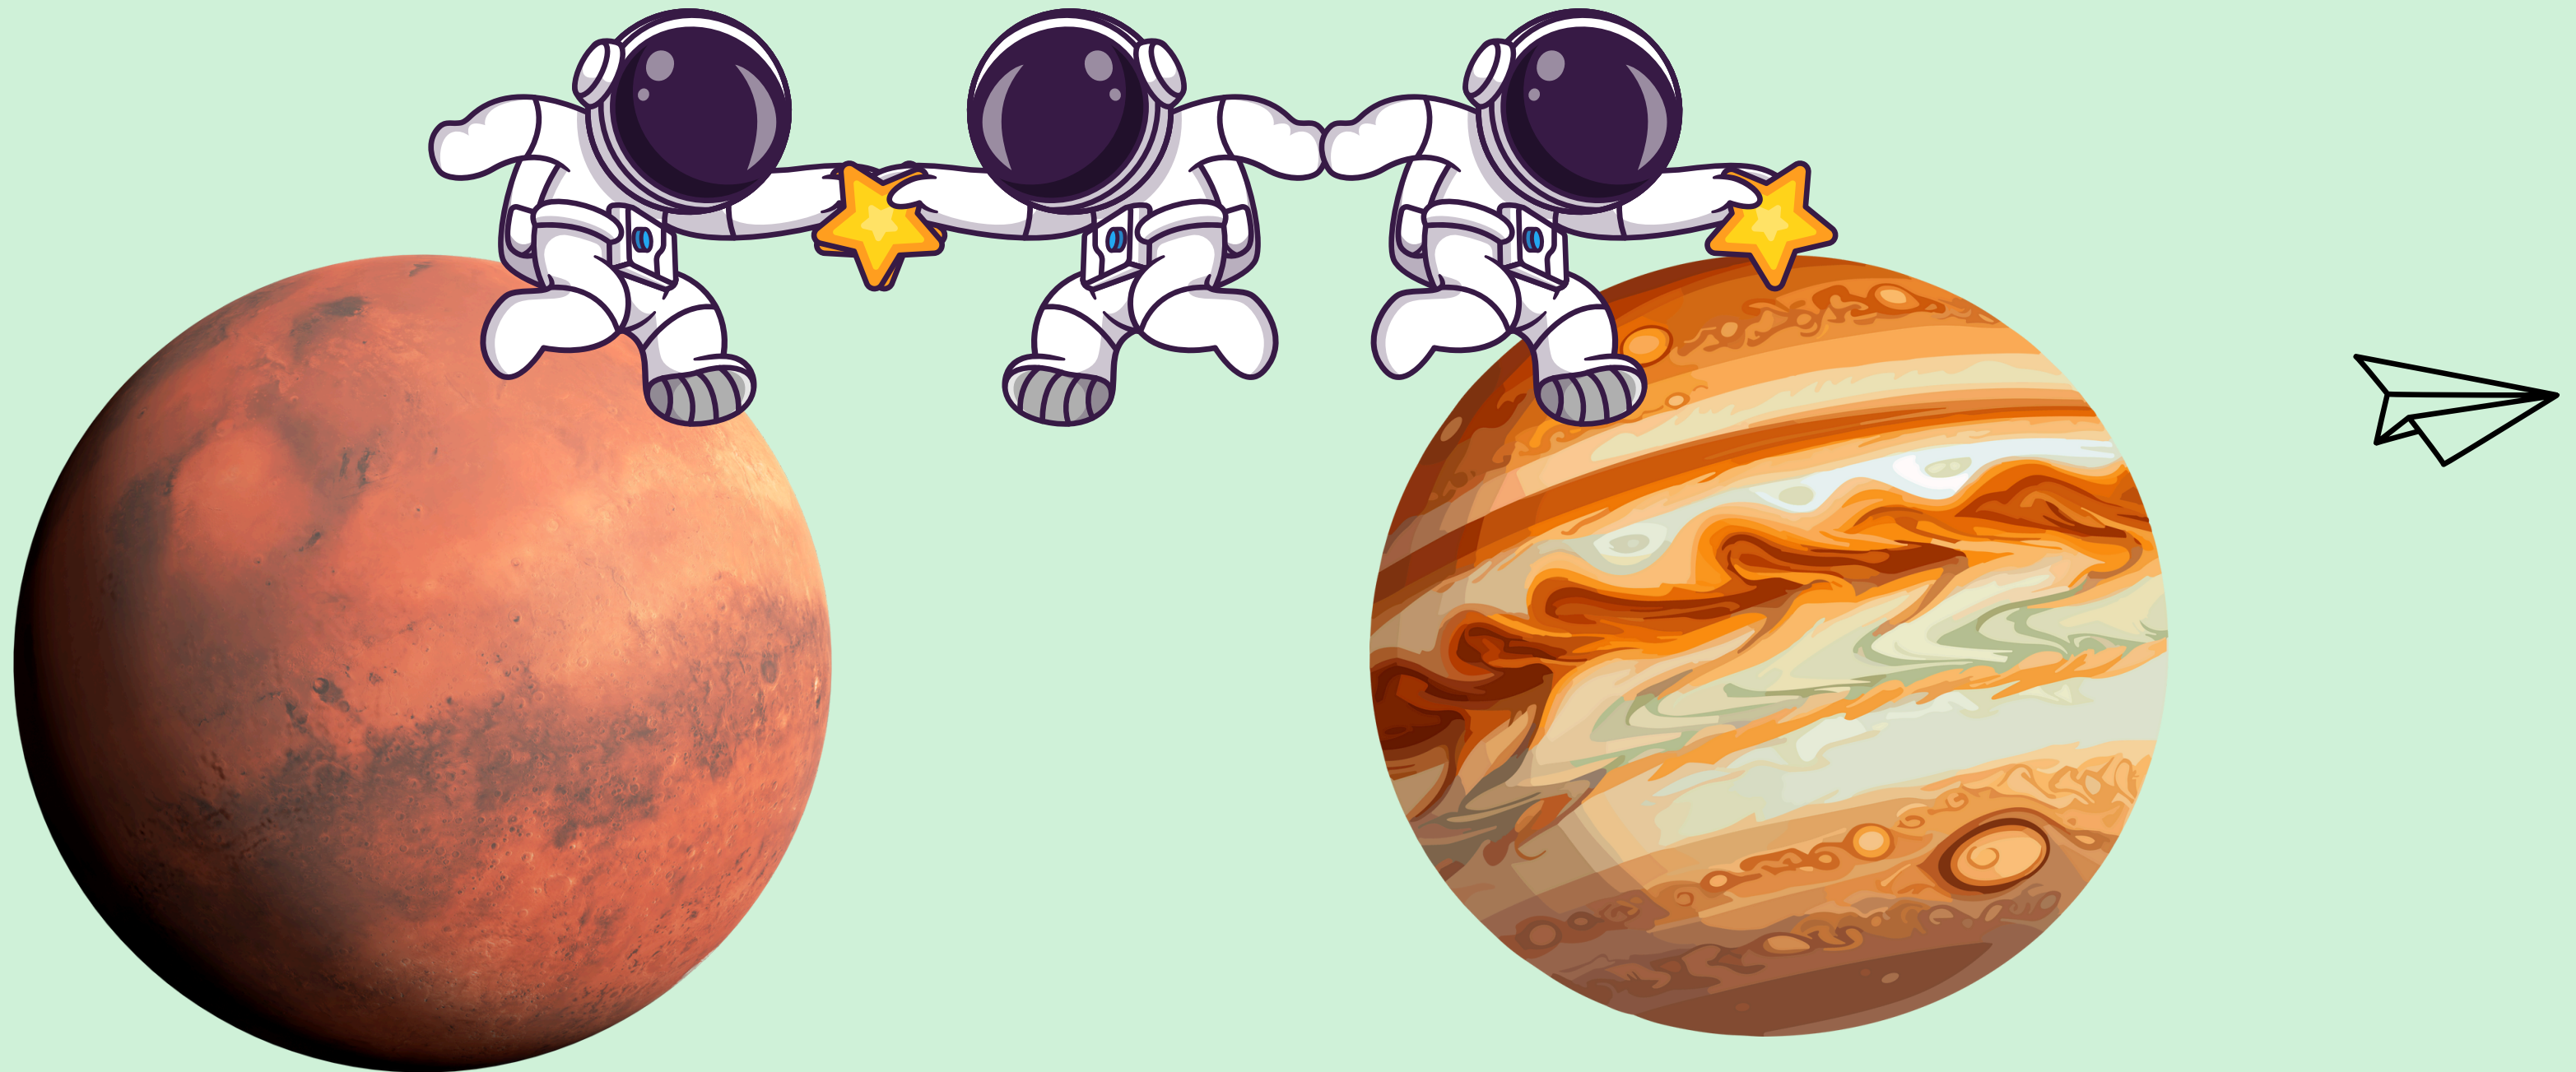

Hyppää pikkupompuilla Venuksesta maapalloon

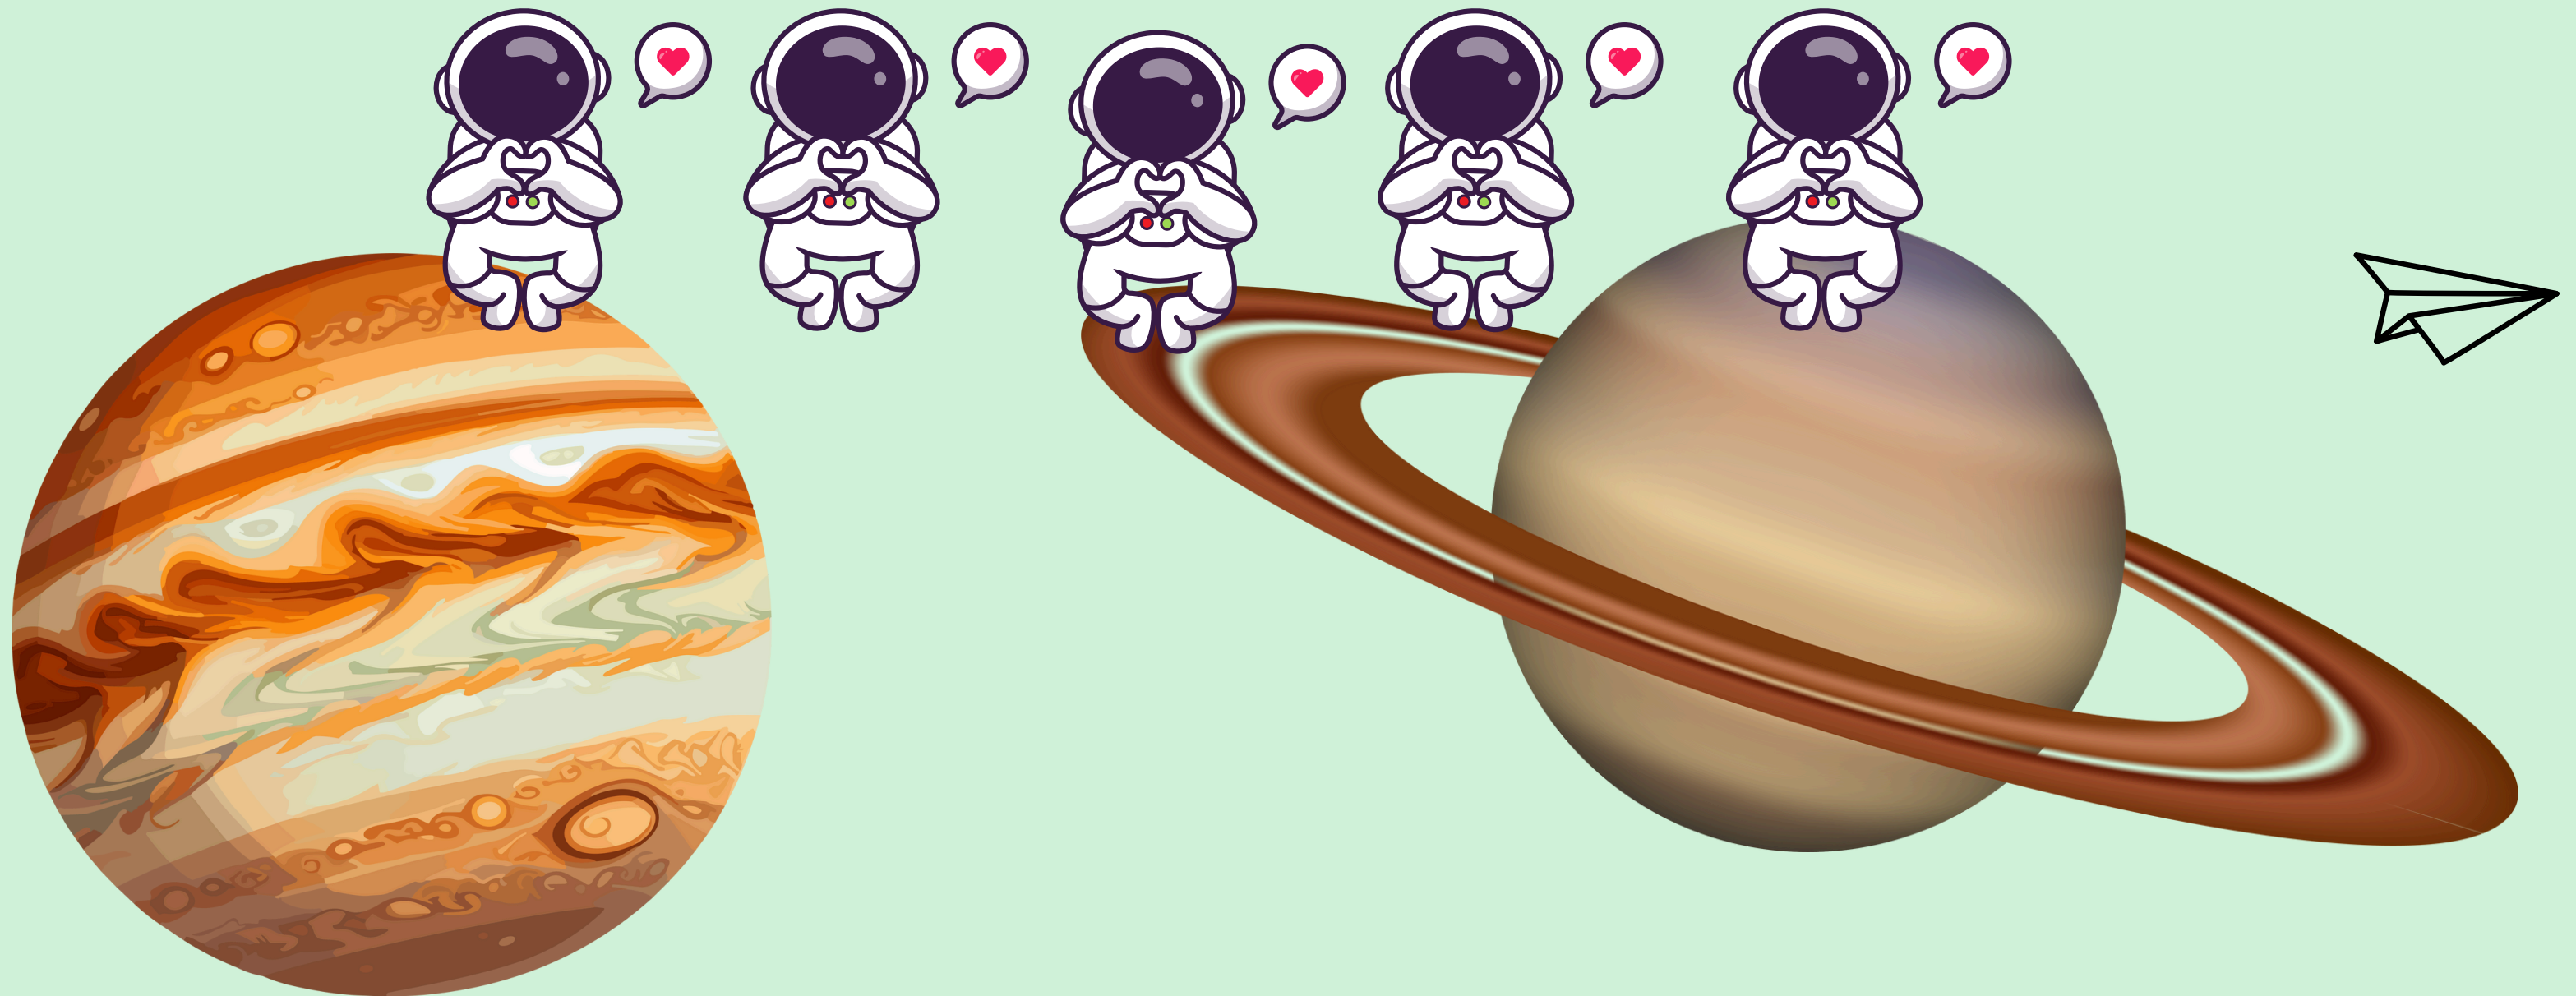

Hyppää sik sak hypyillä Maapallosta Marsiin

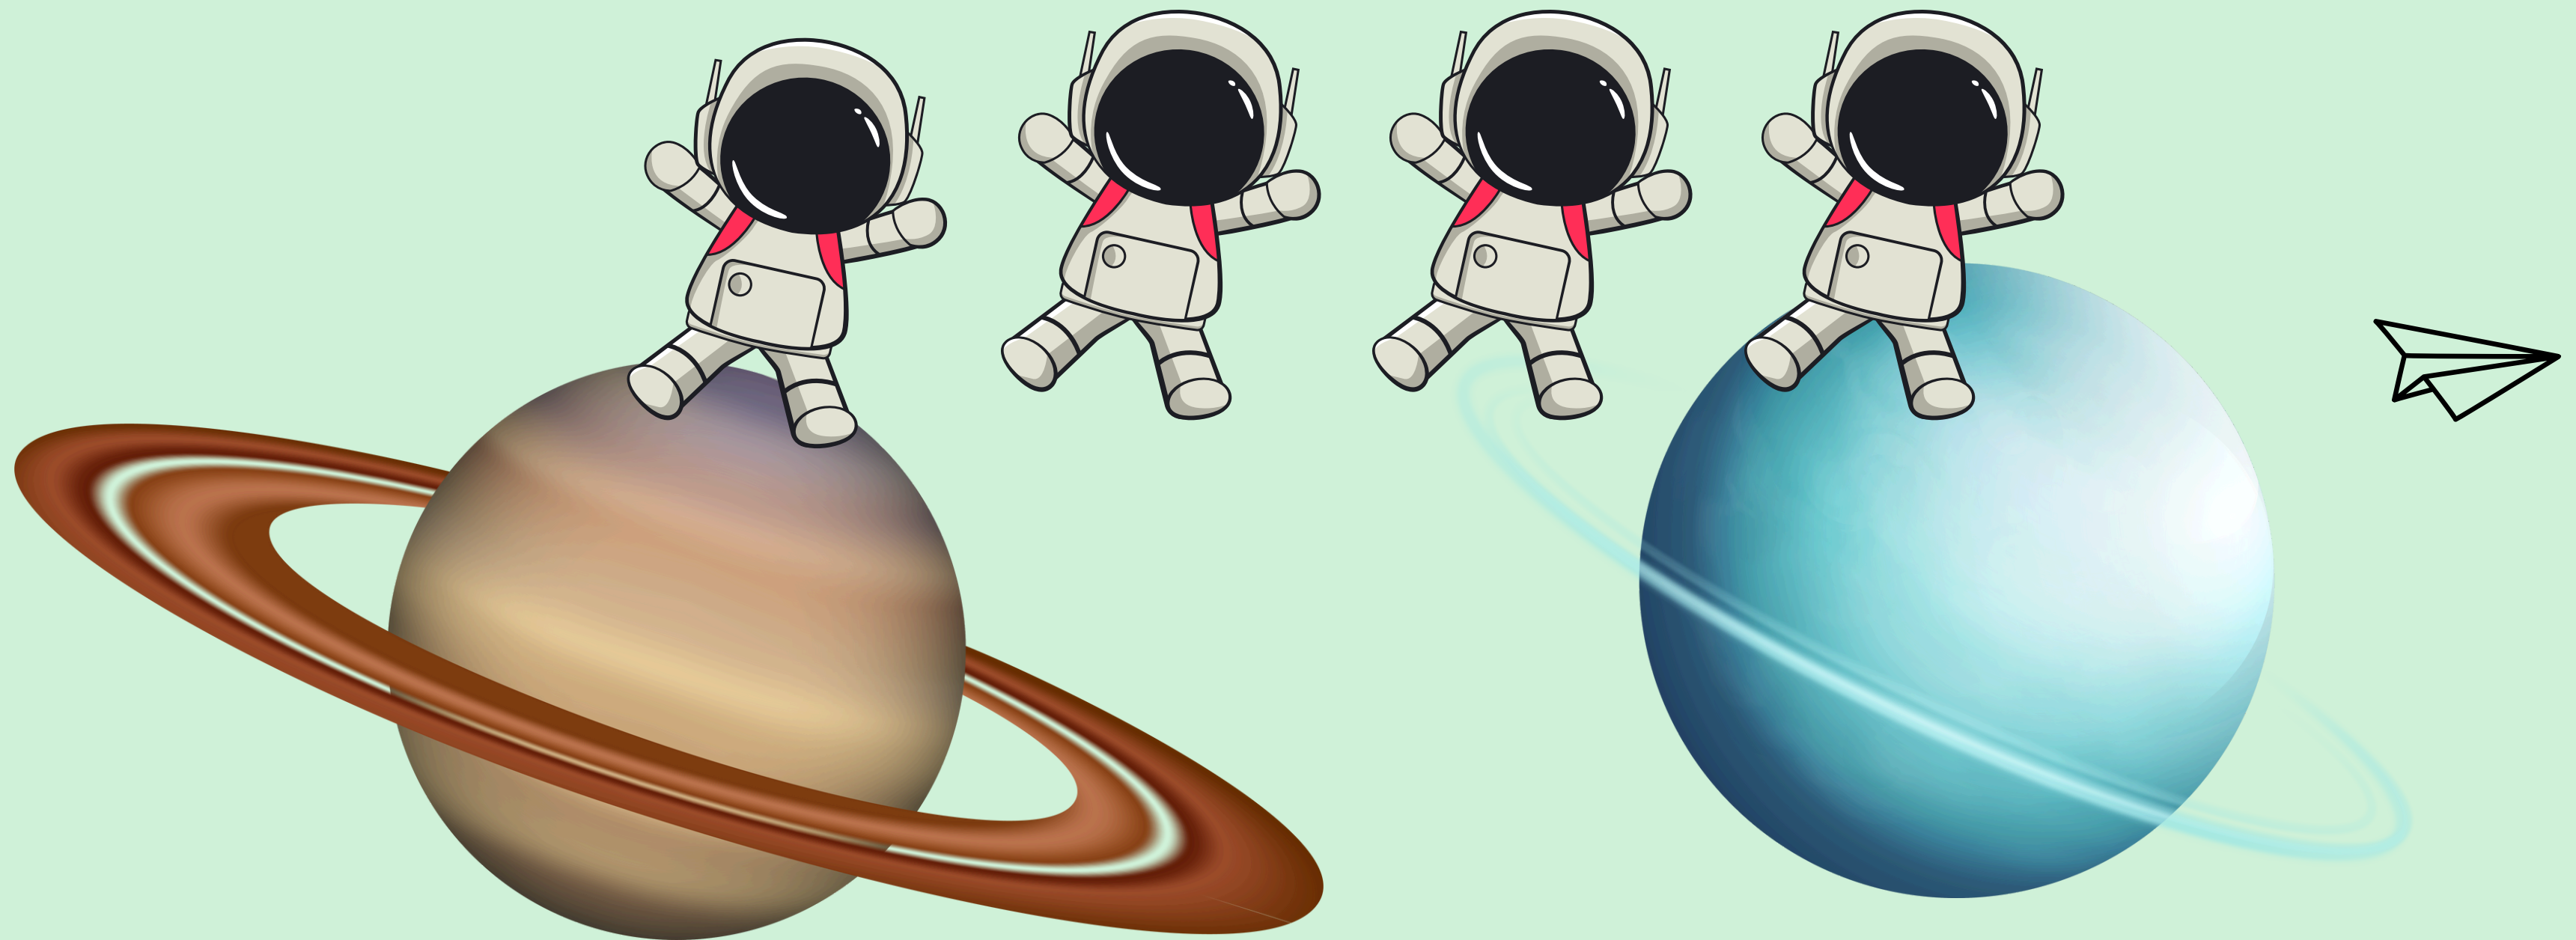

Hyppää pyörivällä hypyllä Marsista Jupiteriin

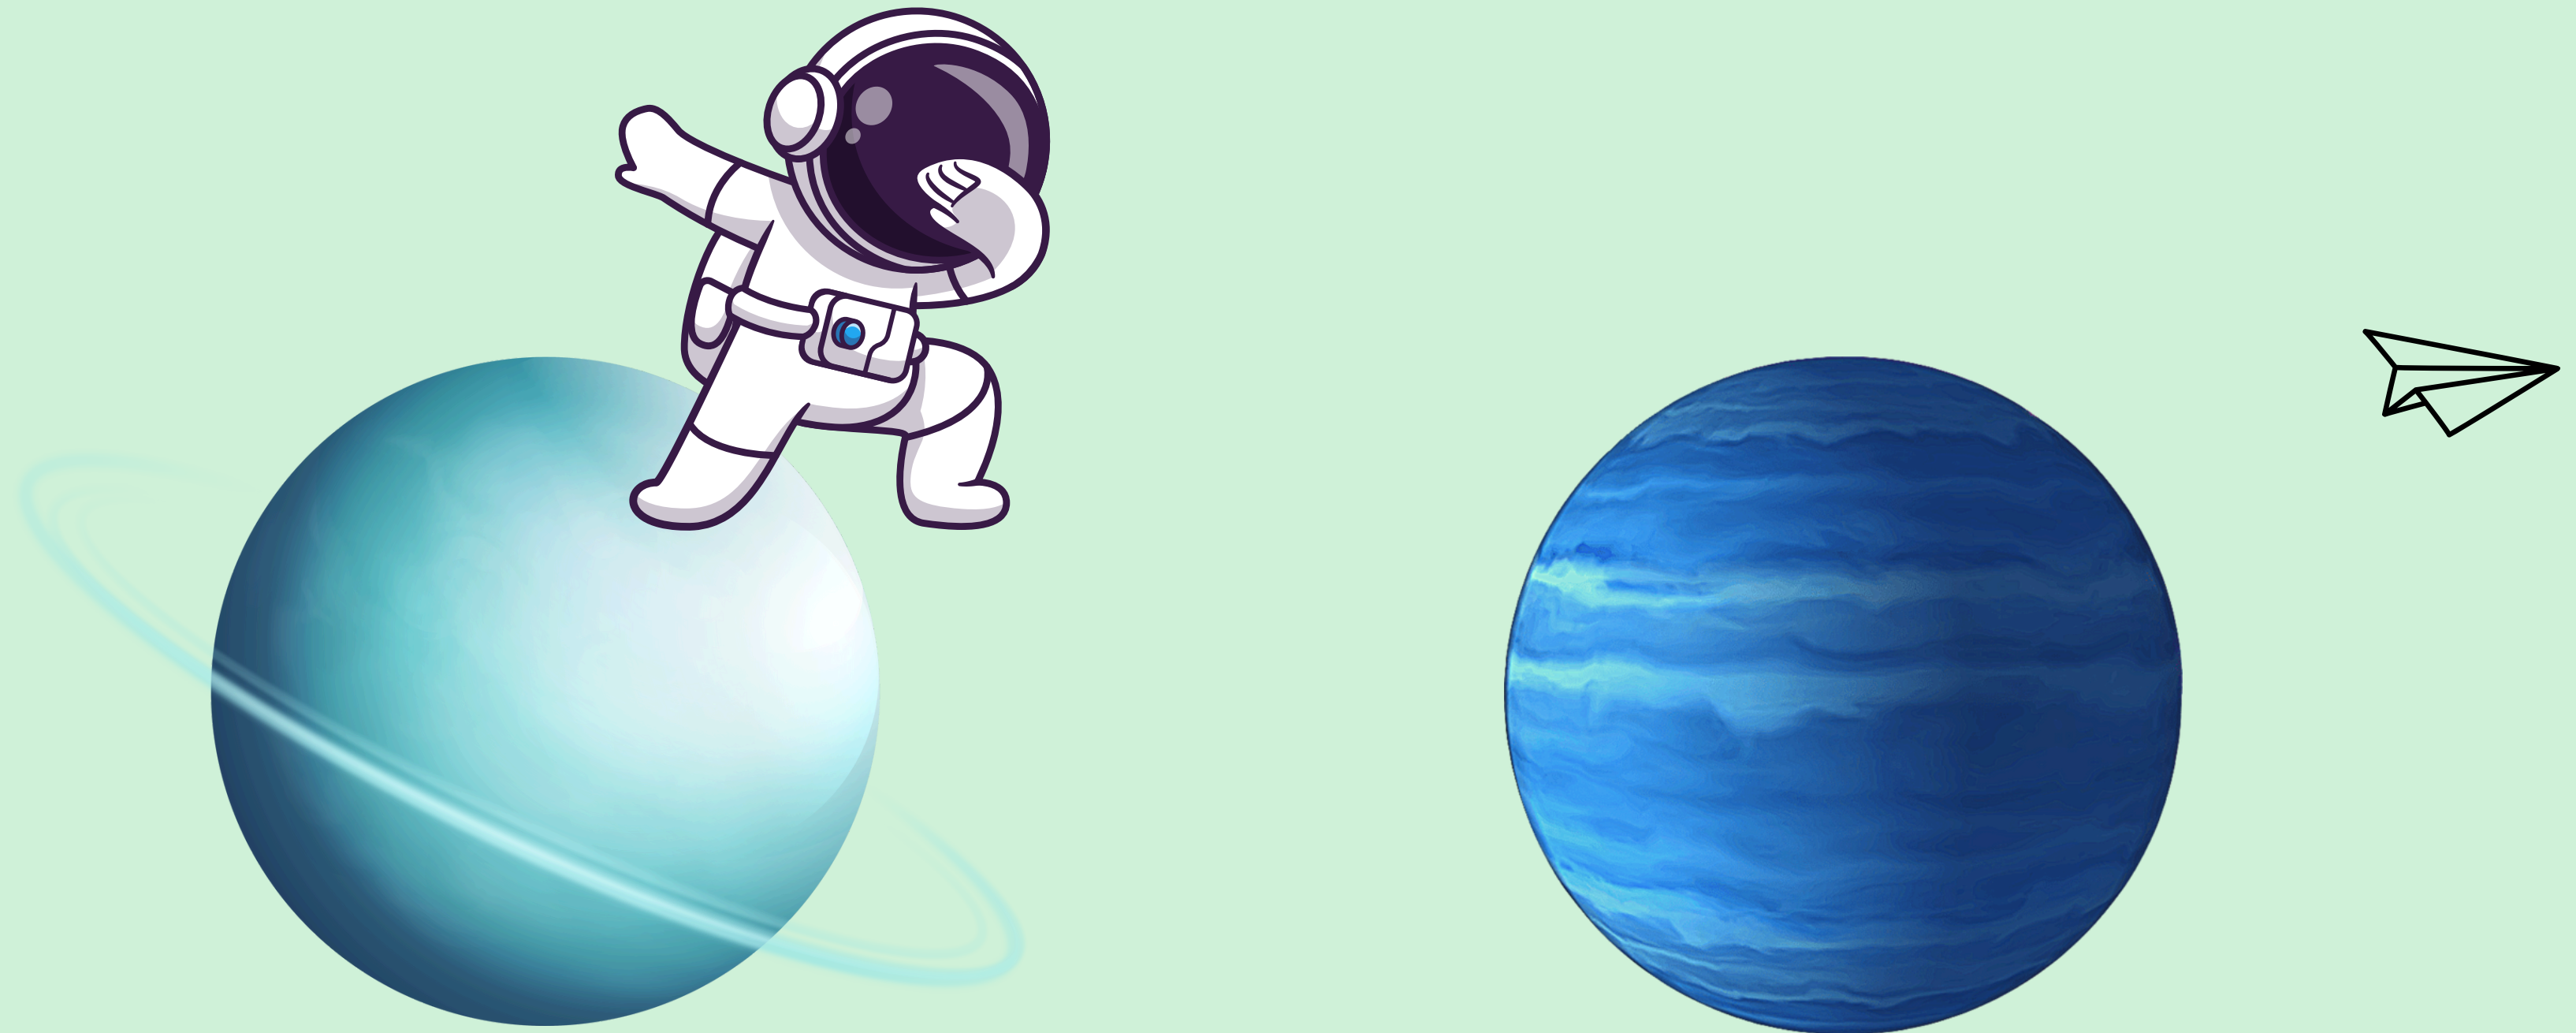

Hyppää kyykkyhypyillä Jupiterista Saturnukseen

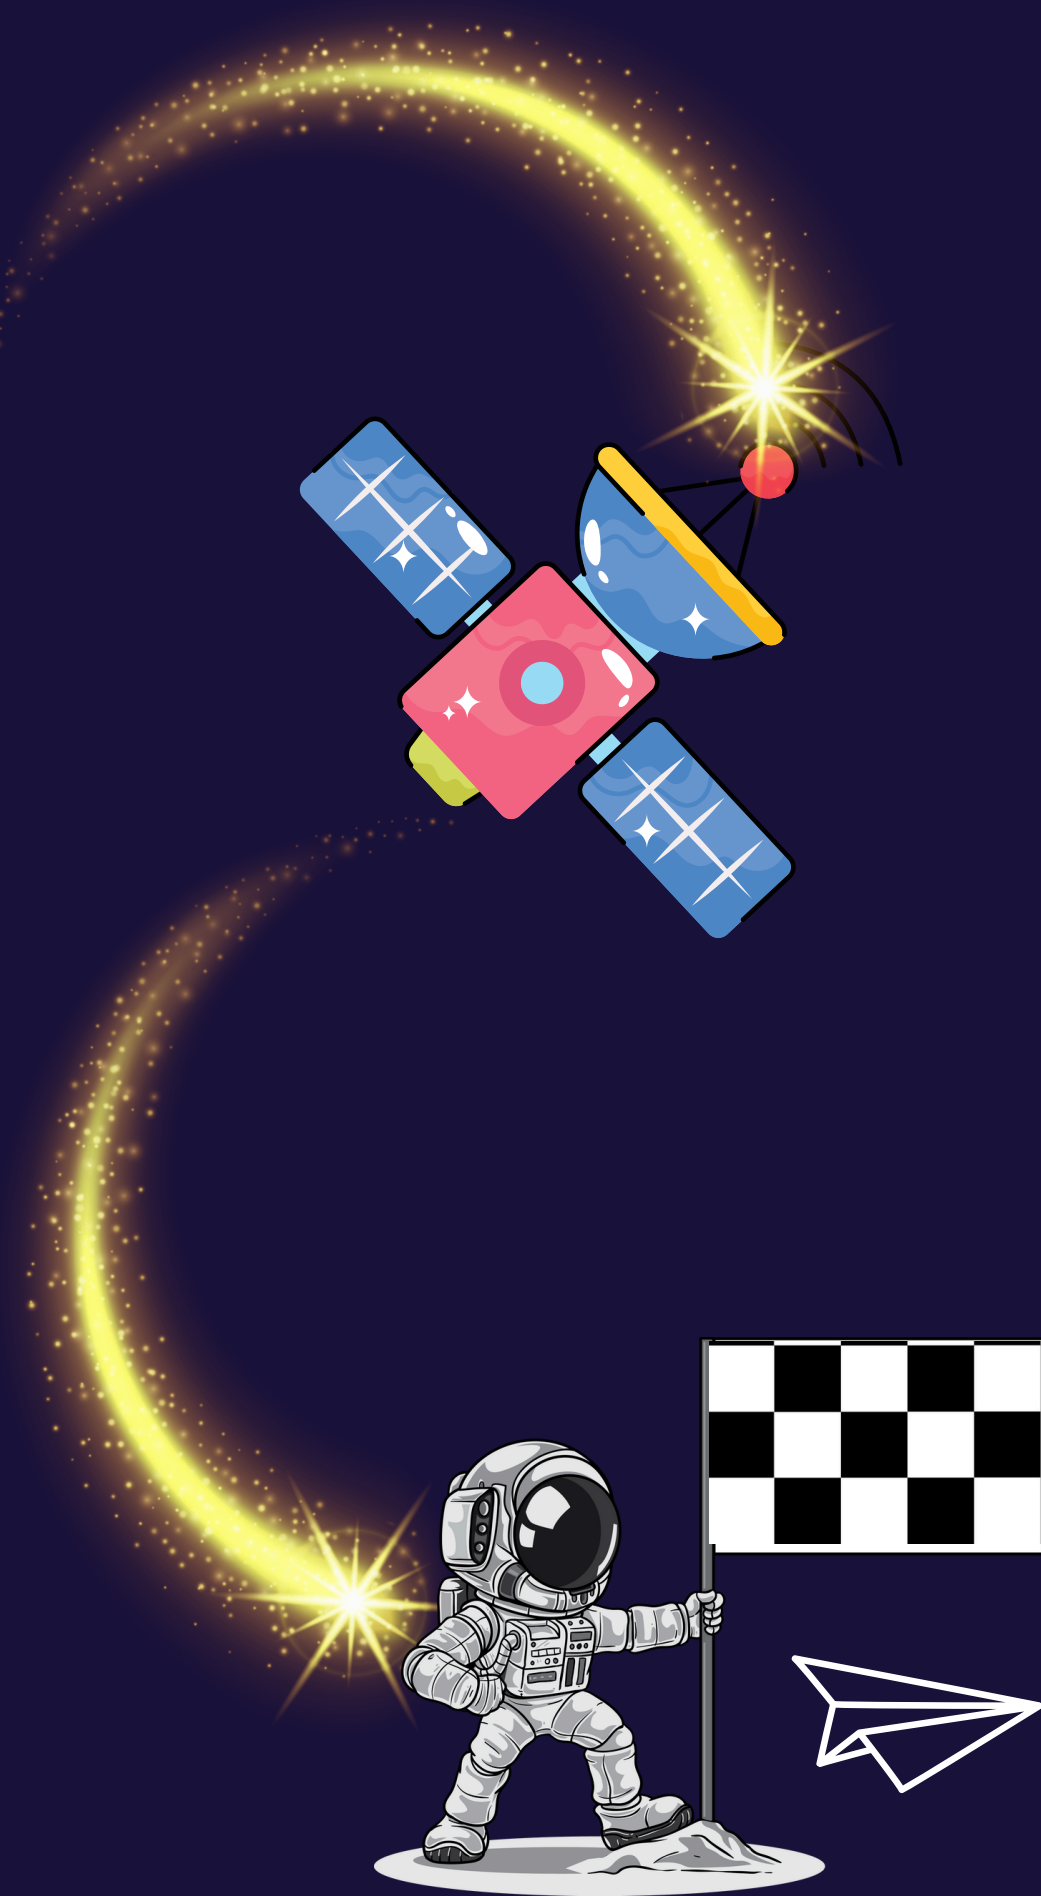

Hyppää laukkahypyillä Saturnuksesta Uranukseen

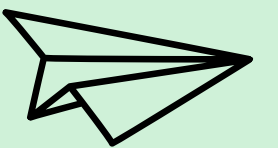

Hyppää superloikka Uranuksesta Neptunukseen

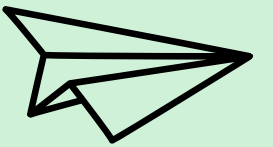

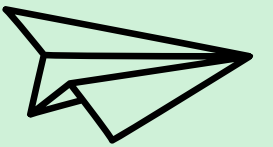

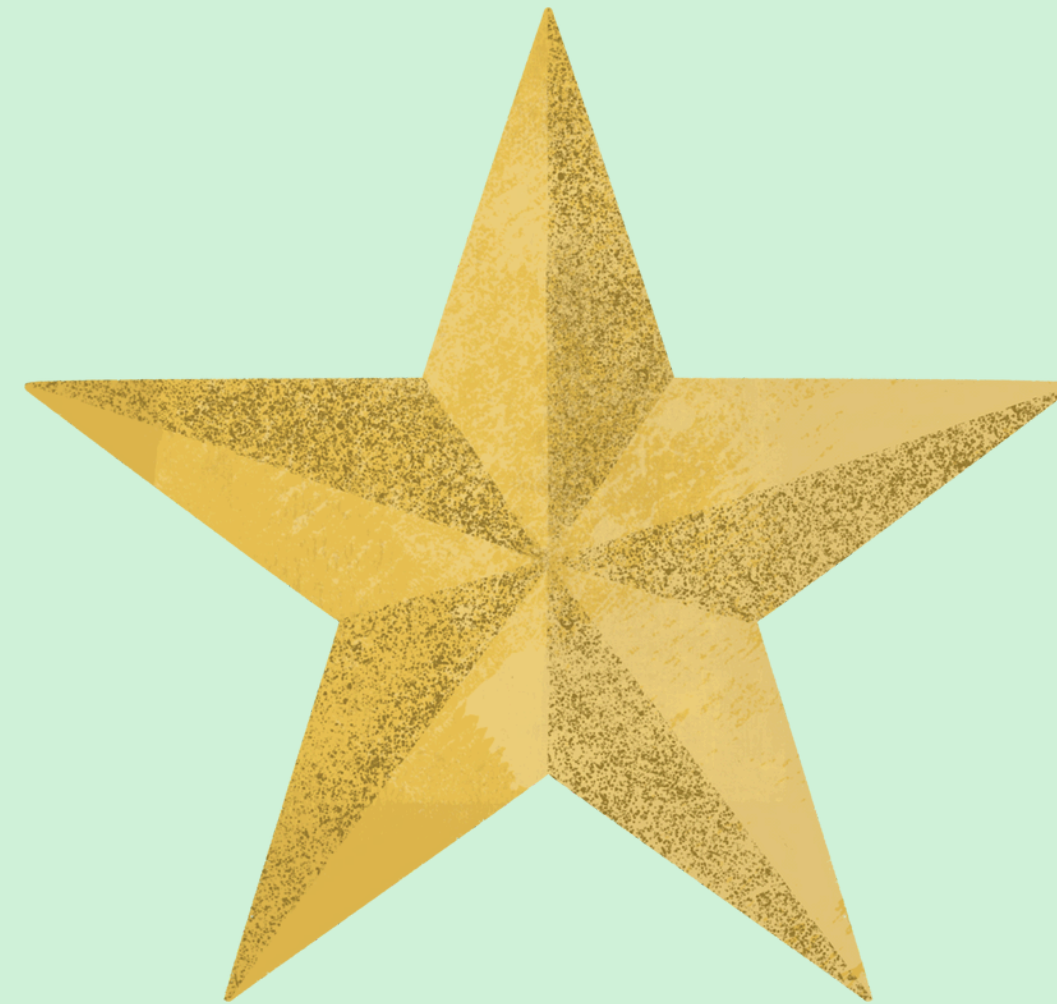

Tiedätkö kumpi on suurempi tai pienempi

Etsi oikean väriset liput.

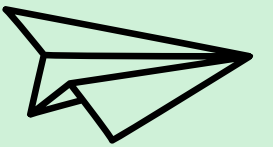

Montako keltaista lippua löydät?

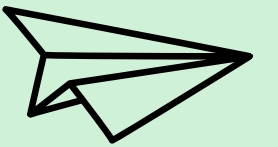

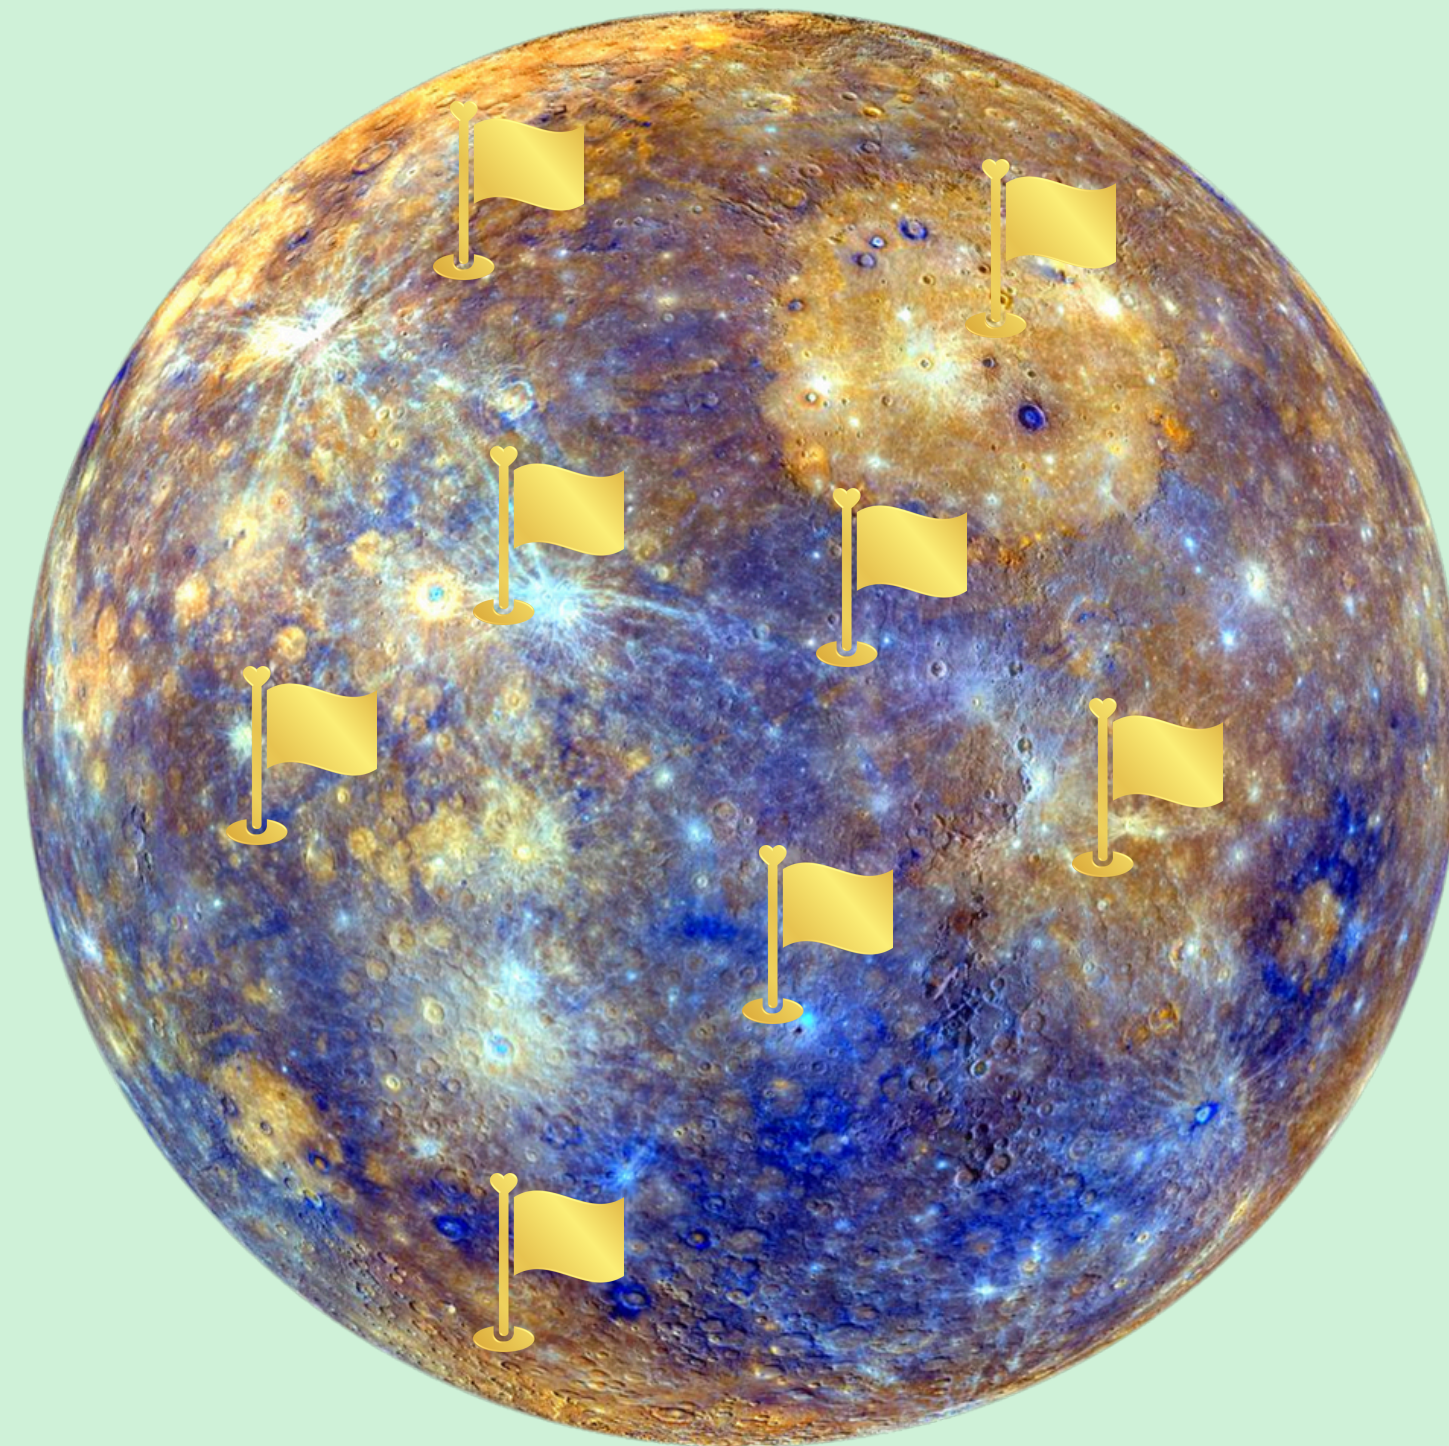

Montako sinistä lippua löydät?

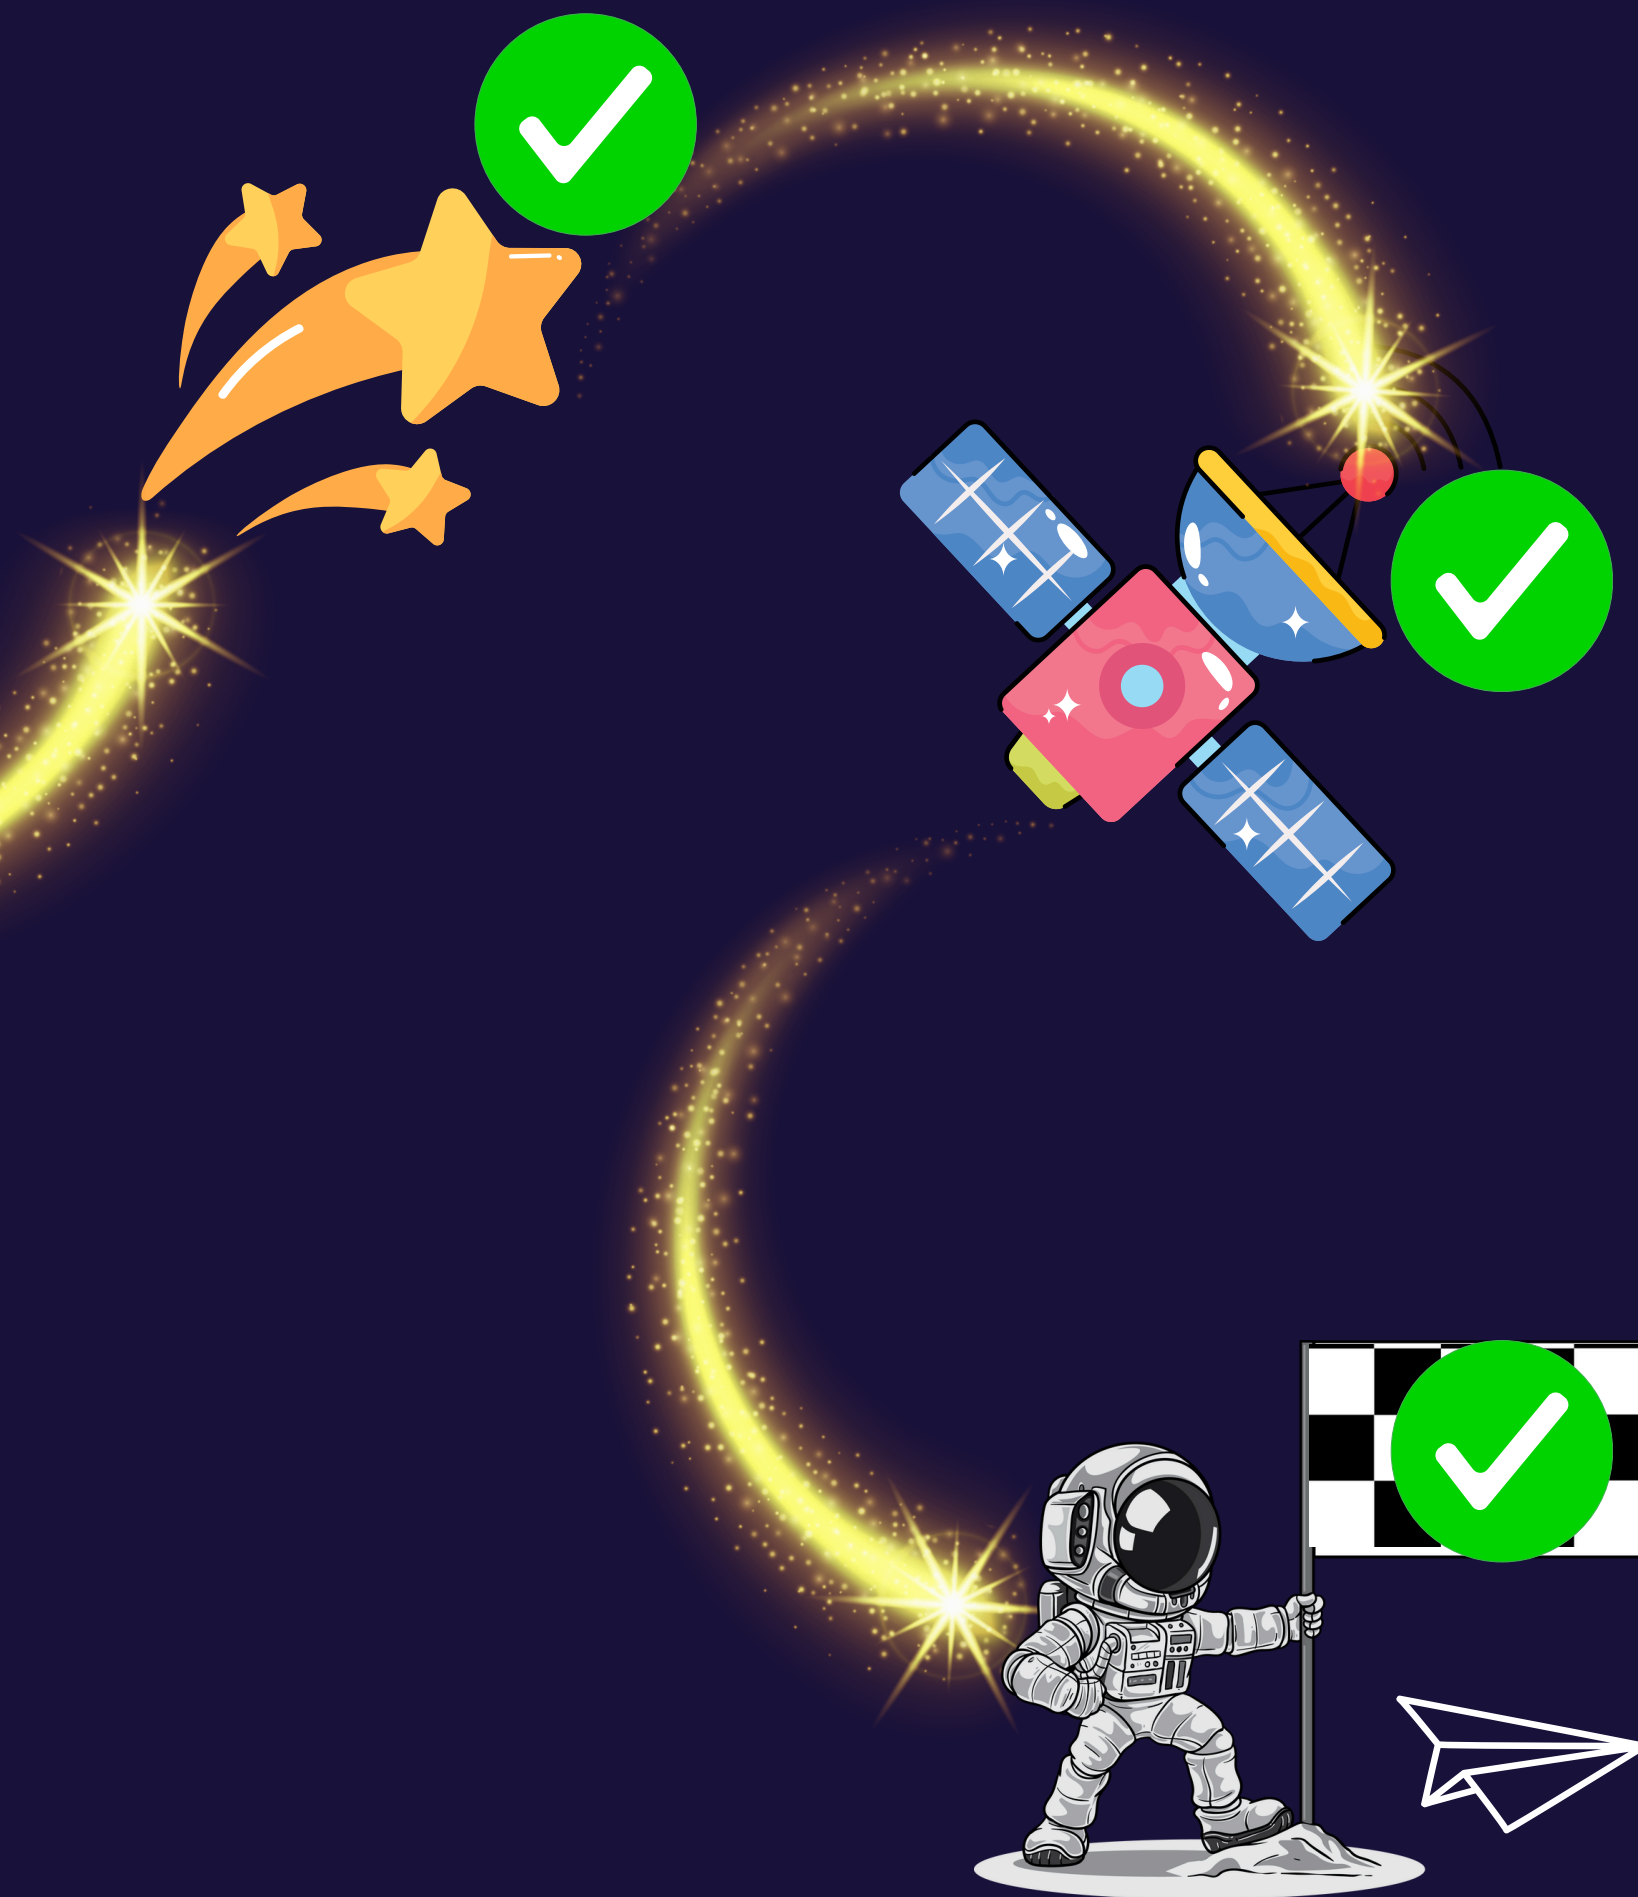

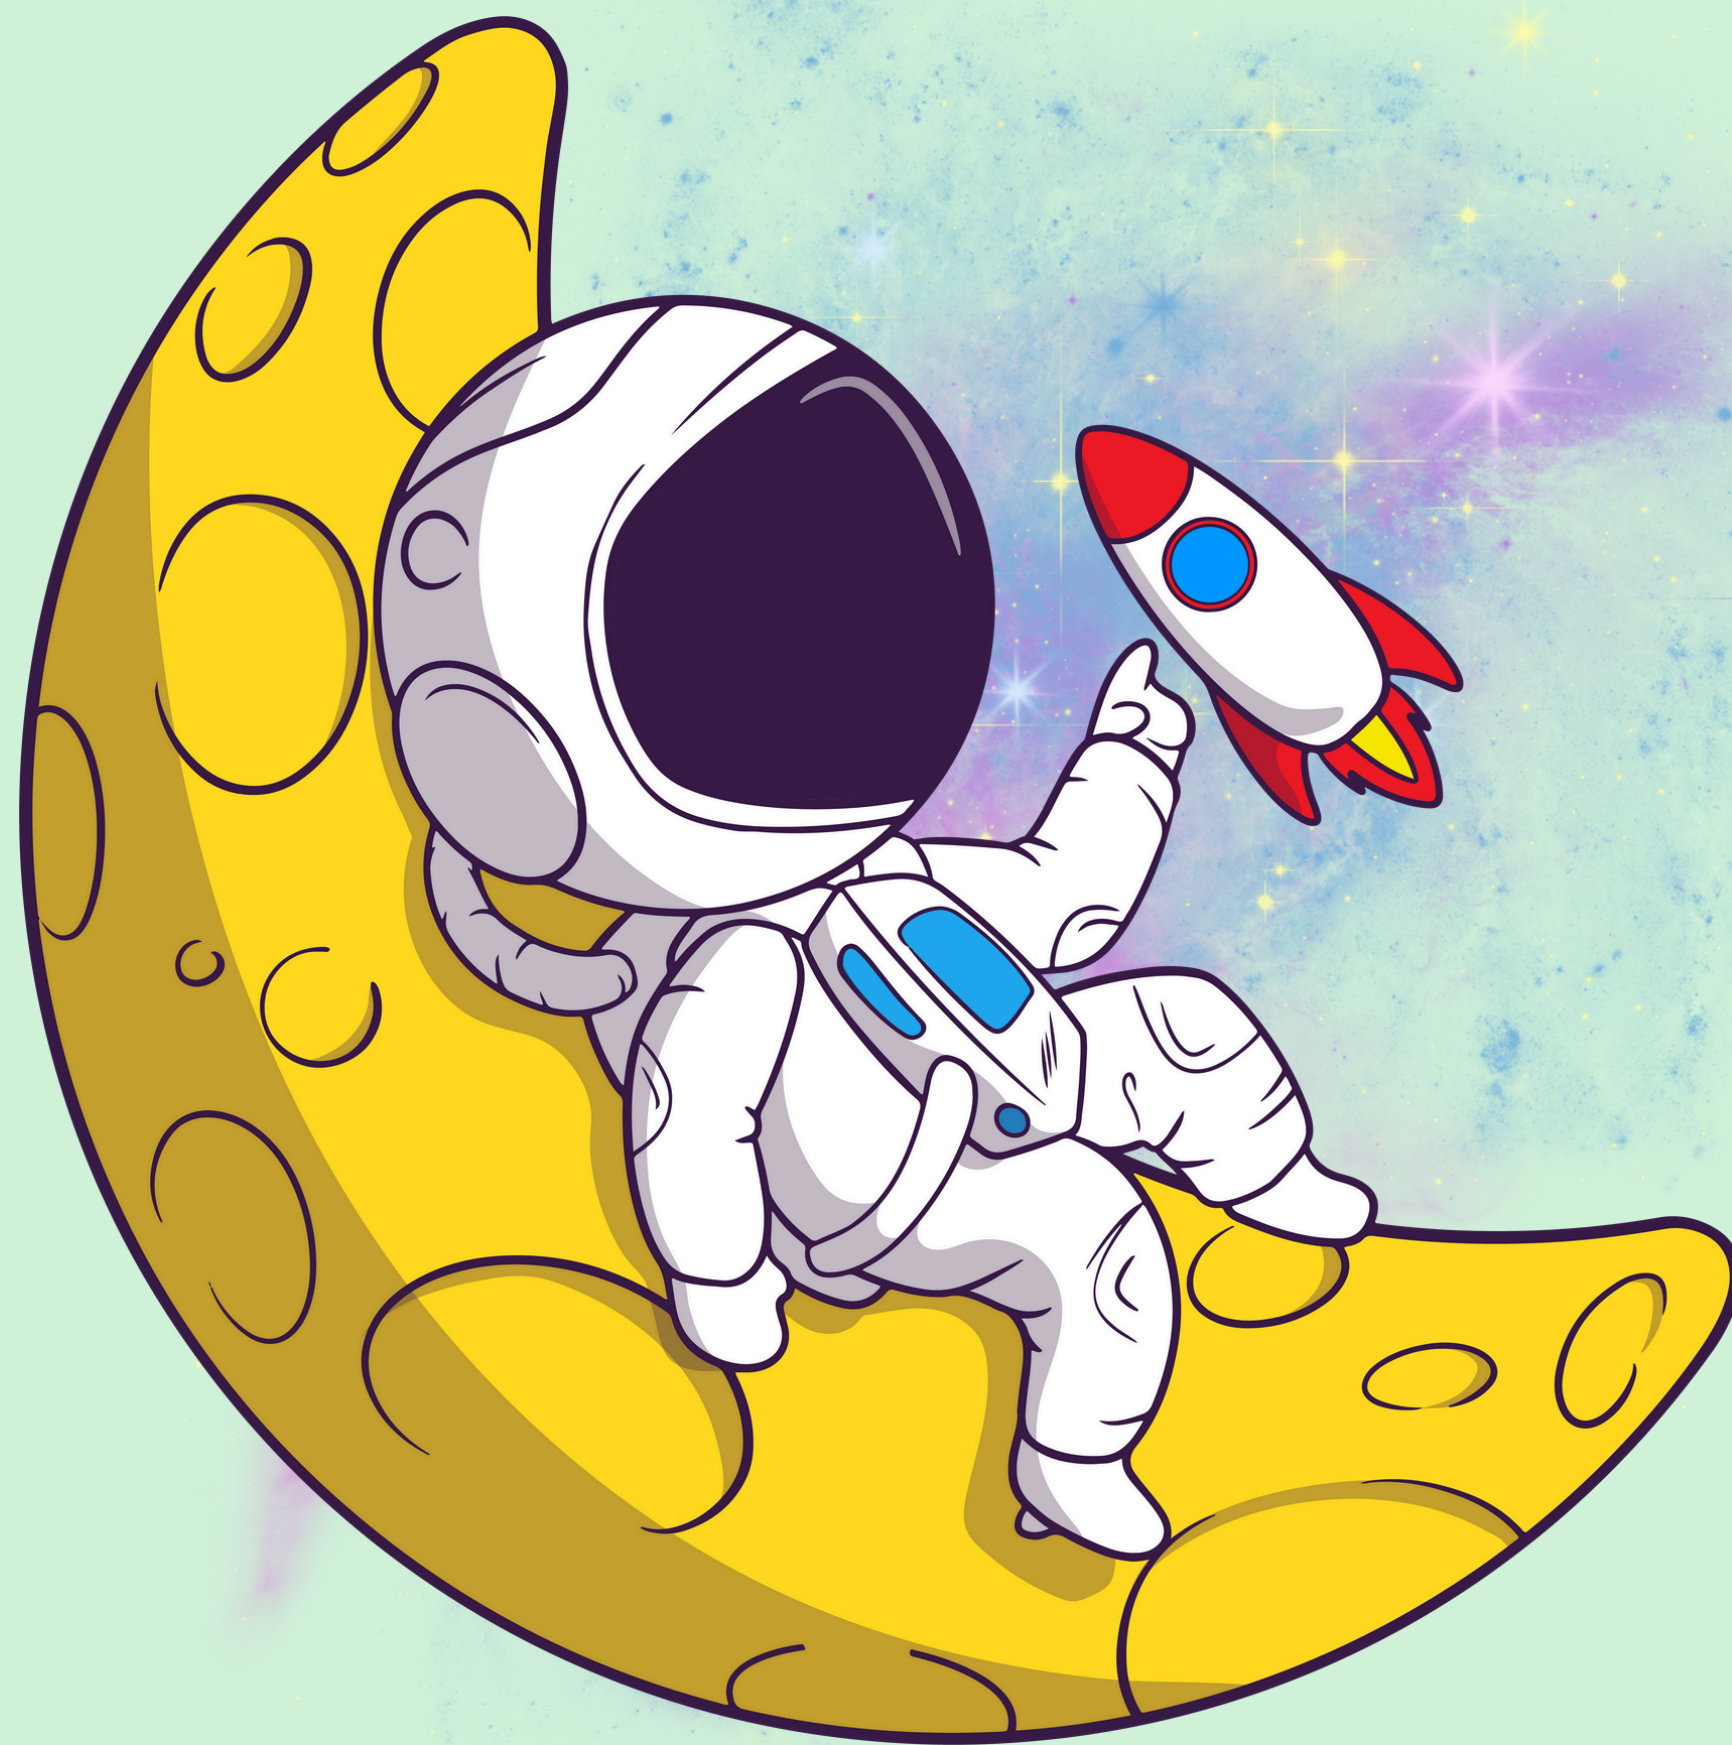

Montako vihreää lippua löydät?

Montako kultaista lippua löydät?

Mahtavaa!!!!
Koko seikkailu suoritettu,
nyt voit levähtää!
