Am besten hat mir die Methode: gefallen, weil?/I liked these methods best because...

They are a more interactive way to learn and they motivate me to learn because I then want to get the answers correct in the quizzes. I liked kahoot and quizlet because it properly tested me to see whether I had been concentrating during the lesson.

Digitale Methoden haben den Vorteil, dass.../Digital methods are advantageous because

They are a modern way to learn and appeal to young people. They also motivate you to want to do well as you want to win all the quizzes so therefore you concentrate more in lessons.

Digitale Methoden haben den Nachteil, dass.../the disadvantages of digital methods are...

There are often technical difficulties, often to do with the WIFI which disrupts and wastes time in lessons. Also some people are often unable to connect so therefore they miss out on learning.

Wie würdest du eine dieser Methoden deinen Mitschülern beibringen? /How would you get other students to use these methods?

By teachers incorporating these methods into their lessons so therefore the new methods are being introduced to students. This way students are able to see if it is a practical way for them to learn.

Könntest du dir vorstellen, zusammen mit Mitschülern digitale Materialien (z.B. ein Quizlet) zu erstellen? Welche?/Could you imagine producing digital materials with other students/

After this week in Finland, yes I could, as it has been used more here so I can see the uses the methods have.

Der finnische Schultag/The Finnish school day

Kanntest du Geogebra?/Were you familiar with Geogebra?

Ja/Yes

Nein/No

Nutzt du es auch ohne Arbeitsauftrag?/Would you use these methods if they were not given to you as an activity?

Ja/Yes

Nein/No

Wofür?/How?

Kennst du Flipped learning?/Are you familiar with flipped learning

Ja/Yes

Nein/No

Könntest du dir vorstellen, dass du mit dieser Methode besser/motivierter lernen könntest? Begründe kurz!/Could you imagine learning more easily/in a more motivated way using this method?

Yes it does seem like an interesting way to learn, however I think I would prefer to go through the course step by step with the teacher as normal as I feel I wouldn't understand the information as clearly.

Findest du, dass Entrepreneurship -Unterricht dich besser auf die berufliche Zukunft vorbereiten würde? Warum?/Do you think that enterprise lessons would prepare you better for your future career? Why?

Yes because it shows us what the real world is like outside of school and also it teaches you presentation skills which I feel is something that isn't taught enough.

Könntest du dir vorstellen, die Abschluss prüfungen digital abzulegen?/Could you imagine taking your final exams digitally?

Ja/Yes

Nein/No

Welche Vor- und Nachteile siehst du? /Which advantages/disadvantages do you see?

I would not like to take my exams digitally. For example I write faster than I type and also I prefer to have the questions on paper so I can underline and highlight key words. This method would not work for me. However the advantages are that it is much easier for examiners as the writing is clear and therefore the students wouldn't have the worry about whether examiners can read their writing.

Der finnische Unterricht/Lessons in Finland

Wie unterscheidet sich der finnische Unterricht vom Unterricht in deinem Land?/How are lessons different in Finland compared with in your country?

The lessons here have smaller classes and the class room environment is more relaxed than in England I would say. The lessons are also much shorter and I like how there are 15 minute breaks between each lesson. The lessons are interesting and I feel you can concentrate for longer as they are shorter. In Finland they learn more languages than us which I think is so important as to be bilingual is a great skill to have. Here in Finland they focus more on skills rather than exams which results in a more relaxed environment which I think is extremely important!

Was würdest von dem gesehenen Unterricht an deiner Schule auch gerne haben?/What would you like to take from lessons you have seen here to your own school?

I like the small class sizes and the use of interactive games. As I said before I like how there are breaks between lessons because the school environment is more relaxed. I like how the assembly notices are read through a microphone and speakers as this saves time going to the hall for an assembly. I think the enterprise programme is extremely beneficial as it teaches you presentation skills and how to create your own businesses. I also think that subjects such as languages should be taken as seriously as Maths and English studies in English schools because I think being fluent in multiple languages is the key to a successful life after school.
