Am besten hat mir die Methode: gefallen, weil?/I liked these methods best because...

I liked Quizlet and Kahoot best because it was more like a game and you wanted to know the answers. A possible result could be more motivation from the students to actually learn at home. Furthermore I liked Poplet because it is a way of learning and starting to connect different topics and questions.

Digitale Methoden haben den Vorteil, dass.../Digital methods are advantageous because

Mostly it is faster than old methods. Especially as young people we are used to work a lot with our phones so it might be fun for us and lets us reach our full potential.

Digitale Methoden haben den Nachteil, dass.../the disadvantages of digital methods are...

the lack of complexon of the theme because of the short questions in e. g. quizlet. It requires that everyone has a phone and likes to learn with it and to use it. E. g. I do not like reading on the Computer because I get a headache and my eyes start to hurt. I also learn a lot by writing on paper so I would not be pleased if this falls out completely in the future. I think those methods are a good option to the normal or old methods but should not completely replace the old ones.

Wie würdest du eine dieser Methoden deinen Mitschülern beibringen? /How would you get other students to use these methods?

I would probably just show it to them... It is not that difficult

Könntest du dir vorstellen, zusammen mit Mitschülern digitale Materialien (z.B. ein Quizlet) zu erstellen? Welche?/Could you imagine producing digital materials with other students/

I could definetely imagine producing digital material for biology, art, english and history. That step might be the most important one because you have to set priorities in order to be able to learn something afterwards. It is then when you start thinking about the topic on another level.

Der finnische Schultag/The Finnish school day

Kanntest du Geogebra?/Were you familiar with Geogebra?

Ja/Yes

Nein/No

Nutzt du es auch ohne Arbeitsauftrag?/Would you use these methods if they were not given to you as an activity?

Ja/Yes

Nein/No

Wofür?/How?

To check on homework

Kennst du Flipped learning?/Are you familiar with flipped learning

Ja/Yes

Nein/No

Könntest du dir vorstellen, dass du mit dieser Methode besser/motivierter lernen könntest? Begründe kurz!/Could you imagine learning more easily/in a more motivated way using this method?

The thing is you can decide for your own what you want to study and which information you want to deepen. That is really helpful because it is not something which is decided for you. It is actually something which fits you so you are more motivated to find out about the topic. I would like it because sometimes the topics I am interested in are just too short but I do not have enough time at home to research.

Findest du, dass Entrepreneurship -Unterricht dich besser auf die berufliche Zukunft vorbereiten würde? Warum?/Do you think that enterprise lessons would prepare you better for your future career? Why?

It would definitely prepare me for my future because I have already taken responsibilities, needed to plan my time, think about money and all the adult stuff. It is also good to find out what you are interested in and what you are good at.

Könntest du dir vorstellen, die Abschlussprüfungen digital abzulegen?/Could you imagine taking your final exams digitally?

Ja/Yes

Nein/No

Welche Vor- und Nachteile siehst du? /Which advantages/disadvantages do you see?

I am not fast at writing at the computer and I have never really "learned" it so I would lose a lot of time during the exam. It is probably better for teachers to correct the exams because they can read it and for students who do not like handwriting but I would not like it because of the arguments I have written in the beginning.

Der finnische Unterricht/Lessons in Finland

Wie unterscheidet sich der finnische Unterricht vom Unterricht in deinem Land?/How are lessons different in Finland compared with in your country?

The Physics and Math lessons were similar to my classes in Germany. In contrast to Finnish math lessons we do more exercises in the lessons by ourselves. And the classes are much smaller in Finland which is relaxing. I have the feeling that in Germany the lessons are packed with more context and more topics so we need to be really fast and can not go into detail as much as I wished to do.

Was würdest von dem gesehenen Unterricht an deiner Schule auch gerne haben?/What would you like to take from lessons you have seen here to your own school?

Flipped Learning! Maybe not for a whole year but maybe like one month projects and then we go back to normal lessons again. I would also love to have drama in combination with other subjects because it is easier for me to connect to the content. Quizlet, Kahoot and AnswerGarden is something I would like to sometimes but not all the time. Maybe that different learning groups are producing different quizzes for different topics and then we are playing all of them so everyone learned something.
