fördert die Motivation/improve motivation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
fördert den Lernerfolg/improve learning	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Am besten hat mir die Methode: .... gefallen, weil ....?/I liked these methods best because...

As a teacher, I liked distance learning, QR codes and Kahoot. These methods enable the students to develop the skills of working independently. The QR codes would work particularly well when teaching Literature and critical theory. Students could be split up in to groups where they have to find out information about different theories. Using the QR codes, they could first work independently to find out about a particular theory before going back to their group and leading discussion and applying it to the set text.

I really enjoyed observing the distance learning lessons. The students covered a lot of work in a short space of time due to their concentration being wholly on the lesson and teacher. The students I saw were engaged and motivated and there was a positive atmosphere to the lessons.

It would be beneficial to use Kahoot when teaching grammatical rules. It would be used as a motivational tool and add a competitive element for the students. It would also allow me to see which students required extra support.

---

## Digitale Methoden haben den Vorteil, dass.../Digital methods are advantageous because

Digital methods are advantageous as they enable the teacher to monitor the progress students are making quickly. It also means that resources can be tailored to the interests of the class and current examples can be used. Using a range of digital methods, such as Kahoot, QR codes, Quizlet and videos, means a range of learning styles are used so hopefully all students would be engaged.

---

## Digitale Methoden haben den Nachteil, dass.../the disadvantages of digital methods are...

As a teacher, I would be concerned about whether digital resources would work or load efficiently. If students were using their own mobile phones, the teacher would need to monitor that they were on task.

---

Wie würdest du eine dieser Methoden deinen Mitschülern beibringen?  
/How would you get other students to use these methods?

Using flipped learning, students could produce their own resources for Kahoot and QR codes. These could be emailed to the teacher prior to the lesson to be checked. The students could then lead the lesson using these resources.

---

Könntest du dir vorstellen, zusammen mit Mitschülern digitale Materialien (z.B. ein Quizlet) zu erstellen? Welche?/Could you imagine producing digital materials with other students/

It would be possible in smaller groups for the teacher to work with the class to produce resources which could then be uploaded and used as a revision tool at a later date.

---

## Der finnische Schultag/The Finnish school day

Kanntest du Geogebra?/Were you familiar with Geogebra?

Ja/Yes

Nein/No

Nutzt du es auch ohne Arbeitsauftrag?/Would you use these methods if they were not given to you as an activity?

Ja/Yes

Nein/No

Wofür?/How?

It would not be relevant as I do not teach maths.

---

Kennst du Flipped learning?/Are you familiar with flipped learning

Ja/Yes

Nein/No

Könntest du dir vorstellen, dass du mit dieser Methode besser/motivierter lernen könntest? Begründe kurz!/Could you imagine learning more easily/in a more motivated way using this method?

---

Findest du, dass Entrepreneurship -Unterricht dich besser auf die berufliche Zukunft vorbereiten würde? Warum?/Do you think that enterprise lessons would prepare you better for your future career? Why?

As a teacher, I can definitely see the value of enterprise lessons. They teach valuable skills, including independence, team work, communication and presentation skills and awareness of budgeting and making a profit.

---

Könntest du dir vorstellen, die Abschluss prüfungen digital abzulegen?/Could you imagine taking your final exams digitally?

Ja/Yes

Nein/No

Welche Vor- und Nachteile siehst du? /Which advantages/disadvantages do you see?

Personally I think I would need time to get used to the idea and that it would also be dependent on the subject. I like to plan ideas on paper first.

---

## Der finnische Unterricht/Lessons in Finland

Wie unterscheidet sich der finnische Unterricht vom Unterricht in deinem Land?/How are lessons different in Finland compared with in your country?

The lessons are much more relaxed and the students are given more responsibility, for example they are trusted to work in a different classroom during distance learning and to have their phones out to use applications, such as Kahoot or Quizlet.

I tend to use resources such as powerpoints, which I didn't see here. A similarity was that students were asked to work in small groups, which is a technique I use in my lessons.

I found the fifteen minute break between lessons positive as, although I understand the time is used by some students to travel across to the other site, it means that students approach each lesson fresh and are ready to concentrate.

---

Was würdest von dem gesehenen Unterricht an deiner Schule auch gerne haben?/What would you like to take from lessons you have seen here to your own school?

I would like to create a more relaxed atmosphere in my lessons, which I think was a positive of the lessons I saw here.
