How do you learn MINT subjects? A few methods which you find are good. How would you like to learn MINT subjects? A few tips! - Wie lernst du MINT Fächer? Einige Methoden, die du gut findest! Wie möchtest du MINT Fächer lernen? Einige Tipps! \*

I learnt MINT subjects during my week in Poland. It was very different as in France because in Math the Polish students have to present their exercises in front of all the class. I think it's very good to learn something. In chemistry I think that the best method is the "french method" because in France you have to understand what you are doing and in Poland you just have to write what the teacher says and you are not obliged to think about it, just learn it. In France we do a lot of experiences in order to understand something thanks to this method we can conclude with our experiences.

I think the best thing in the Polish school is the geology because the students have to learn lots of information about all the world. In France it's quite different because the students learn just a few information about the French geology.
