

How did you find the work stations on Sunday?

The workstations on Sunday were really eye opening and interesting. Some of the workstations of other countries really gave more ideas on how you can plan your future. There isn't just one way to pursue your college career or what to do after high school, it was interesting! The discussion that we had after the workstations were also interesting and helpful because you got to hear different opinions and thoughts.

Describe positive and negative aspects of the microteaching sessions which you took part in on Monday and Tuesday?

It was interesting to see how others think so differently about something and how they work and act in different situations. It was also nice to learn something new about others and myself! Positive thing was also that there were different exercises and sessions so everyone had something they were interested in because not everyone learns the same or likes same things.

I also don't have any negative things to say! Everything went smoothly and the way you would expect. I learned new things and new ways to cope with problems and how to solve them.

How did you find the stay in generally and what particularly struck you?

Our stay was really good. The people were so nice and welcoming, and everything was well executed. The workstations were well made, and the microteaching sessions were interesting. I especially liked Germans coffee bean -game! The English groups gap year session was also nice. I especially liked when we did the debate! The French groups impala quiz was also interesting and something that I really liked.
