

Students - Careers advice in schools - Orientierung an den Schulen- A Report of the teachers - Short exchanges

My Name and a short introduction of myself *

My name is Emily Anne Boyett and I'm a 17 year old girl studying in France. However, I'm not French, I'm an exchange student from Italy.

The report of the methods used during the exchanges *

During this exchange I have been able to observe quite a few lessons. Most of the time the lessons are frontal, however, I have also seen a lot of pair and group work. Technology is an important resource in many classes: the Beamer is frequently used together with the document camera to show PowerPoint presentations, homework and more to the class. During one of the lessons iPads were also distributed to the students to carry out some Research online.

Something else interesting *

The Balance between breaks and lessons is very good, with students having many breaks in between lessons.

The best things I have seen *

The best thing I have seen are probably the Biology and physics labs which were very modern and well equipped.
