

The purpose of this plan is to help you to set and to achieve the goals you have in relation to your own pedagogical and crafting skills.

STARTING THE COURSE

Consider how you want to develop in these areas during the course. Write down your thoughts.

Participation and development

Participation as part of the group (discussions with the whole group and in groups, sharing your know-how, asking for help)

The aspect of teaching (the impact of your own school experiences, turning your mind from a learner to being a teacher, what kind of teacher you want to be in relation of teaching craft)

Challenging yourself during the course (anticipated challenges, what you want to learn in particular)

Independent working outside the demos (how to schedule your working)

Tasks of the course (school visit, written assignment)

Multimaterial Project (Ideas, Creativity, Designing and Prototyping, Workflow, Problem Solving, Product Functionality, Project Documentation)

Pedagogical skills
