Picture and Word Dominoes

Before You begin

A picture and word domino game includes 53 different dominoes. You need to print and cut them.

If you would like to make your dominoes more durable and less transparent you may want to:

- print them on heavier weight paper
- print on regular paper and glue it to light cardboard before you cut the cards out
- laminate them for easy cleaning.

How to Play

Shuffle the dominoes and deal the appropriate number of dominoes to each player. Do not let other players see what dominoes you have.

3–4 players = 7 dominoes each

5–6 players = 6 dominoes each

The remainder of the dominoes should be placed face down in a draw pile.

Decide who goes first, for example the youngest or the first one who entered the room. The first player places one domino on the table face up, so everyone can see.

The second player must now add a domino by matching a picture on the open word end, or a word on the open picture end.

Players may only add one domino per turn. If a player has no dominoes that match open ends, they must collect another domino from the draw pile.

If this new domino can be played, it should be added now. However, if the new domino cannot be played, the player's turn is over. If there are no dominoes left in the draw pile, the player's turn ends without drawing a new domino.

The Joker match any open end and a player is allowed to add another card.

The game is over when one player uses all his or her dominoes. However, if any new domino cannot be played, you can count to amount of dominoes in hands. The winner has the least dominoes.

Other Alternatives

If you would like to make game easier for players:

- the players can pair up
- take off Joker Cards
- invent better rules together.
