This an Erasmus report emphasizing educational tools that we get to know from this exchange trip. In addition to that, we have visited few educational institutions and exchanged perspectives in teaching practice and institutional administration. I have also presented my research which is about grammar teaching materials in English as Foreign Language Textbooks in Finland.

Summary of education tools

1.Mizou ,AI Chatbot that uses your rubrics
2. bamboozle, fun games
 https://www.baamboozle.com/

 https://quizizz.com
4.AI assistance for education products
https://app.genial.ly/
5.Easy video making for education
6. Slides, pictures making for education
https://www.canva.com/

Specific tools and their features from perspective of a language teacher.

1.Genially:

During our visit to Spain, we had the opportunity to explore Genially, an AI assistance tool designed for education products. As language teachers specializing in English, Finnish, and Chinese, we were intrigued by the possibilities this platform offered for creating interactive and visually appealing educational content.

One of the most impressive features of Genially is its intuitive interface, which allows educators to easily design presentations, infographics, interactive images, and more. The platform offers a wide range of templates and design elements, making it simple to customize content to suit the needs of diverse learners.

Additionally, Genially's AI assistance capabilities provide valuable support throughout the content creation process. From suggesting design layouts to optimizing multimedia elements, the AI features help streamline workflow and enhance the overall quality of educational materials.

Overall, our experience with Genially left us impressed by its potential to transform traditional teaching materials into dynamic and engaging learning experiences. We believe that integrating Genially into our language teaching practices will enrich our lessons and captivate our students' attention.
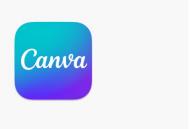

2.HourOne:

Our visit to Spain also introduced us to HourOne, a user-friendly platform for creating educational videos. As language teachers, we understand the power of visual media in enhancing language learning, and HourOne offers a straightforward solution for incorporating video content into our lessons.

One of the standout features of HourOne is its simplicity. The platform's intuitive interface and drag-and-drop functionality make it easy for educators to create professional-looking videos without extensive technical expertise. Whether producing instructional videos, language tutorials, or multimedia presentations, HourOne offers the tools needed to bring learning to life.

Furthermore, HourOne's focus on education-specific features sets it apart from generic video editing software. From built-in templates and animations to voiceover capabilities and interactive elements, HourOne empowers educators to create engaging and impactful video content tailored to their language teaching objectives.

In summary, our experience with HourOne has inspired us to explore new avenues for integrating video into our language teaching practice. We believe that leveraging this platform will enhance student engagement, facilitate comprehension, and ultimately, foster greater language proficiency among our students.

3.Canva:

Lastly, our visit to Spain introduced us to Canva, a versatile tool for creating slides and graphics for educational purposes. It is already known and used by some of our colleagues. As language teachers, we recognize the importance of visual aids in reinforcing language concepts and engaging students in the learning process, and

Canva offers a wealth of options for creating visually stunning educational materials.

One of the key strengths of Canva is its extensive library of templates and design elements. Whether designing presentation slides, infographics, posters, or worksheets, educators have access to a wide range of customizable templates and graphics to suit their specific language teaching needs.

Additionally, Canva's user-friendly interface and intuitive editing tools make it easy for educators to create professional-quality materials with minimal time and effort. From selecting fonts and colors to arranging text and images, Canva provides the flexibility needed to bring creative ideas to life.

Overall, our experience with Canva has reaffirmed its value as a versatile tool for language teaching. By harnessing the power of visual communication, we believe that Canva will enrich our lessons, inspire our students, and ultimately, contribute to their language learning success.

4.Mizou:

Mizou, the AI chatbot that integrates with our rubrics, has been a game-changer in our language teaching toolkit. As English, Finnish, and Chinese language teachers, the ability to tailor assessments and feedback to our students' needs is paramount. With Mizou, we've found a seamless way to automate this process, saving us precious time and ensuring consistency in evaluation.

One of the standout features of Mizou is its adaptability. Whether assessing writing, speaking, or listening skills, Mizou can be configured to align with the specific criteria outlined in our rubrics. This ensures that our assessments are not only fair but also accurately reflect the learning objectives of each task. Additionally, Mizou's AI capabilities allow it to provide targeted feedback to students, guiding them towards improvement in areas where they may be struggling.

In our experience, Mizou has not only streamlined the assessment process but has also enhanced student engagement. The interactive nature of the chatbot makes receiving feedback feel more like a conversation than a formal evaluation. This has encouraged our students to actively seek out feedback and take ownership of their learning journey.

5. Baamboozle:

Baamboozle has been a welcome addition to our language teaching repertoire, offering a variety of fun and interactive games to reinforce learning in English, Finnish, and Chinese. As language teachers, we understand the importance of making learning enjoyable, and Baamboozle excels in this regard.

One of the standout features of Baamboozle is its versatility. Whether looking to review vocabulary, grammar concepts, or cultural knowledge, Baamboozle offers a range of customizable games to suit our needs. From flashcards and quizzes to board games and bingo, there's something for every learning style.

In addition to its entertainment value, Baamboozle also promotes collaboration and critical thinking skills. Many of the games are designed for group play, encouraging students to work together to solve problems and achieve common goals. This not only strengthens their language skills but also fosters a sense of camaraderie within the classroom.

Overall, Baamboozle has proven to be a valuable tool for language teaching, offering a fun and effective way to reinforce learning outcomes across multiple languages.

6. Quizizz:

Quizizz has revolutionized the way we create and administer quizzes in our language classes. As English, Finnish, and Chinese language teachers, we're always looking for ways to make assessments more engaging and interactive, and Quizizz delivers on both fronts.

One of the standout features of Quizizz is its AI-assisted quiz-making capabilities. The platform uses algorithms to analyze student responses and tailor subsequent questions based on their level of understanding. This ensures that each student receives a personalized learning experience, with questions that are appropriately challenging yet achievable.

In addition to its adaptive nature, Quizizz also offers a range of multimedia options to enhance the quiz-taking experience. From images and videos to audio clips and memes, we can easily incorporate diverse content to cater to the unique interests and learning styles of our students. This not only makes the quizzes more engaging but also helps reinforce key language concepts in a memorable way.

Overall, Quizizz has become an indispensable tool in our language teaching toolkit, allowing us to create dynamic assessments that foster student engagement and promote meaningful learning outcomes.
