BRESCIA

An aerial photograph of the Castle of Brescia, a large stone fortress with a prominent tower, situated on a hill. The castle is surrounded by lush green trees and overlooks a city with red-tiled roofs. In the background, a hazy landscape with distant hills is visible under a clear sky.

Brescia owes its name to the hilly ground on which it is built. Brixia comes from "brg, brig, brik", a Celtic word meaning high places, referring to the Cidneo Hill where you can find Brescia's Castle.

TURN BACK

Brescia is called “Leonessa d'Italia” (Italy’s Lioness), because of the 10 days of brave resistance against the Austrian army in 1849.

COMUNE DI BRESCIA

TURN BACK

The Loggia Square is an important example of Renaissance closed square. Here on 28th May 1974, during a trade union demonstration, there was a terroristic attack by a neo-fascist group and 8 people died.

The Cathedral Square

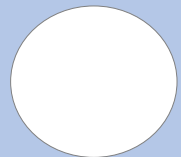

The Vittoria Square

TURN BACK

THE HISTORY OF OUR SCHOOL

“M. Olivieri” Artistic High School

“N.Tartaglia” Technical High School

“M. OLIVIERI” Artistic High School

The first artistic high school in Brescia area was founded in Sarezzo - a little town near Brescia- in 1989.]

The school was named after a well-known local sculptor, who made a famous wooden crucifix for the church of Sarezzo.

Maffeo Olivieri
e il crocifisso di
Sarezzo

TURN BACK

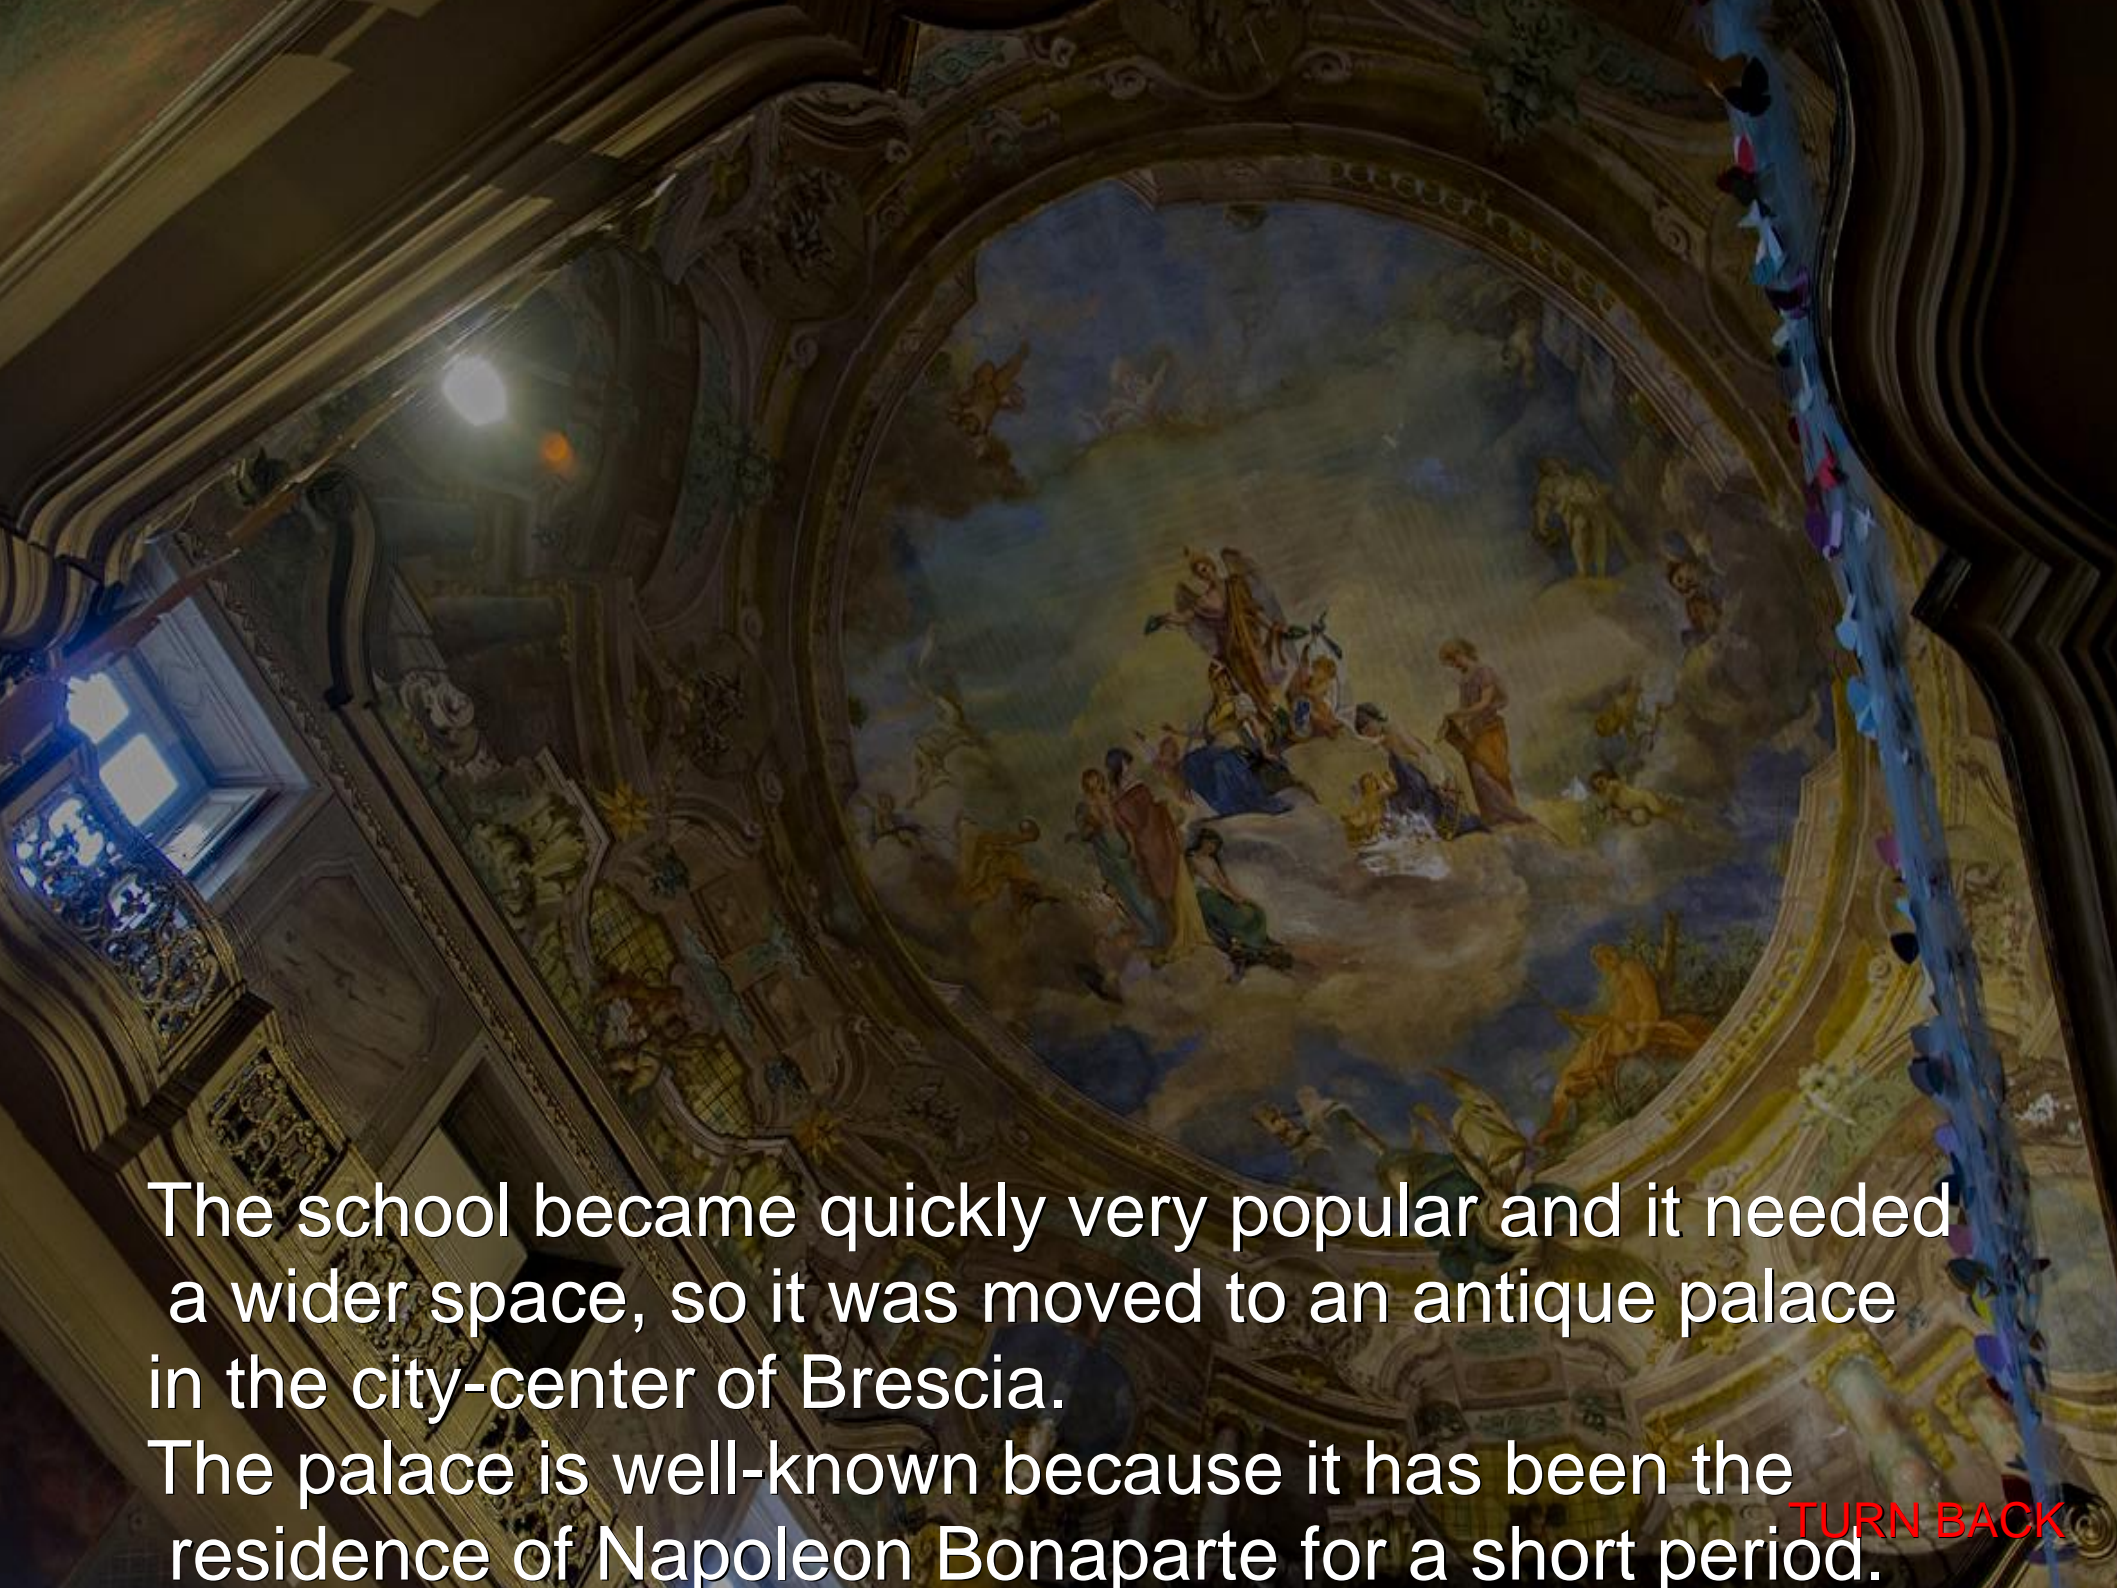

In the beginning the school had only two classes and the students attended a four- year traditional course.

They could choose between two different

TURN BACK

Photo by

The school became quickly very popular and it needed a wider space, so it was moved to an antique palace in the city-center of Brescia.

The palace is well-known because it has been the residence of Napoleon Bonaparte for a short period.

TURN BACK

Despite its artistic value it was too old and unsuitable to hold an increasing number of students, who were finally transferred to the current building in Oberdan Street, where another high school - the name of which is "N. Tartaglia" - had already been settled.

TURN BACK

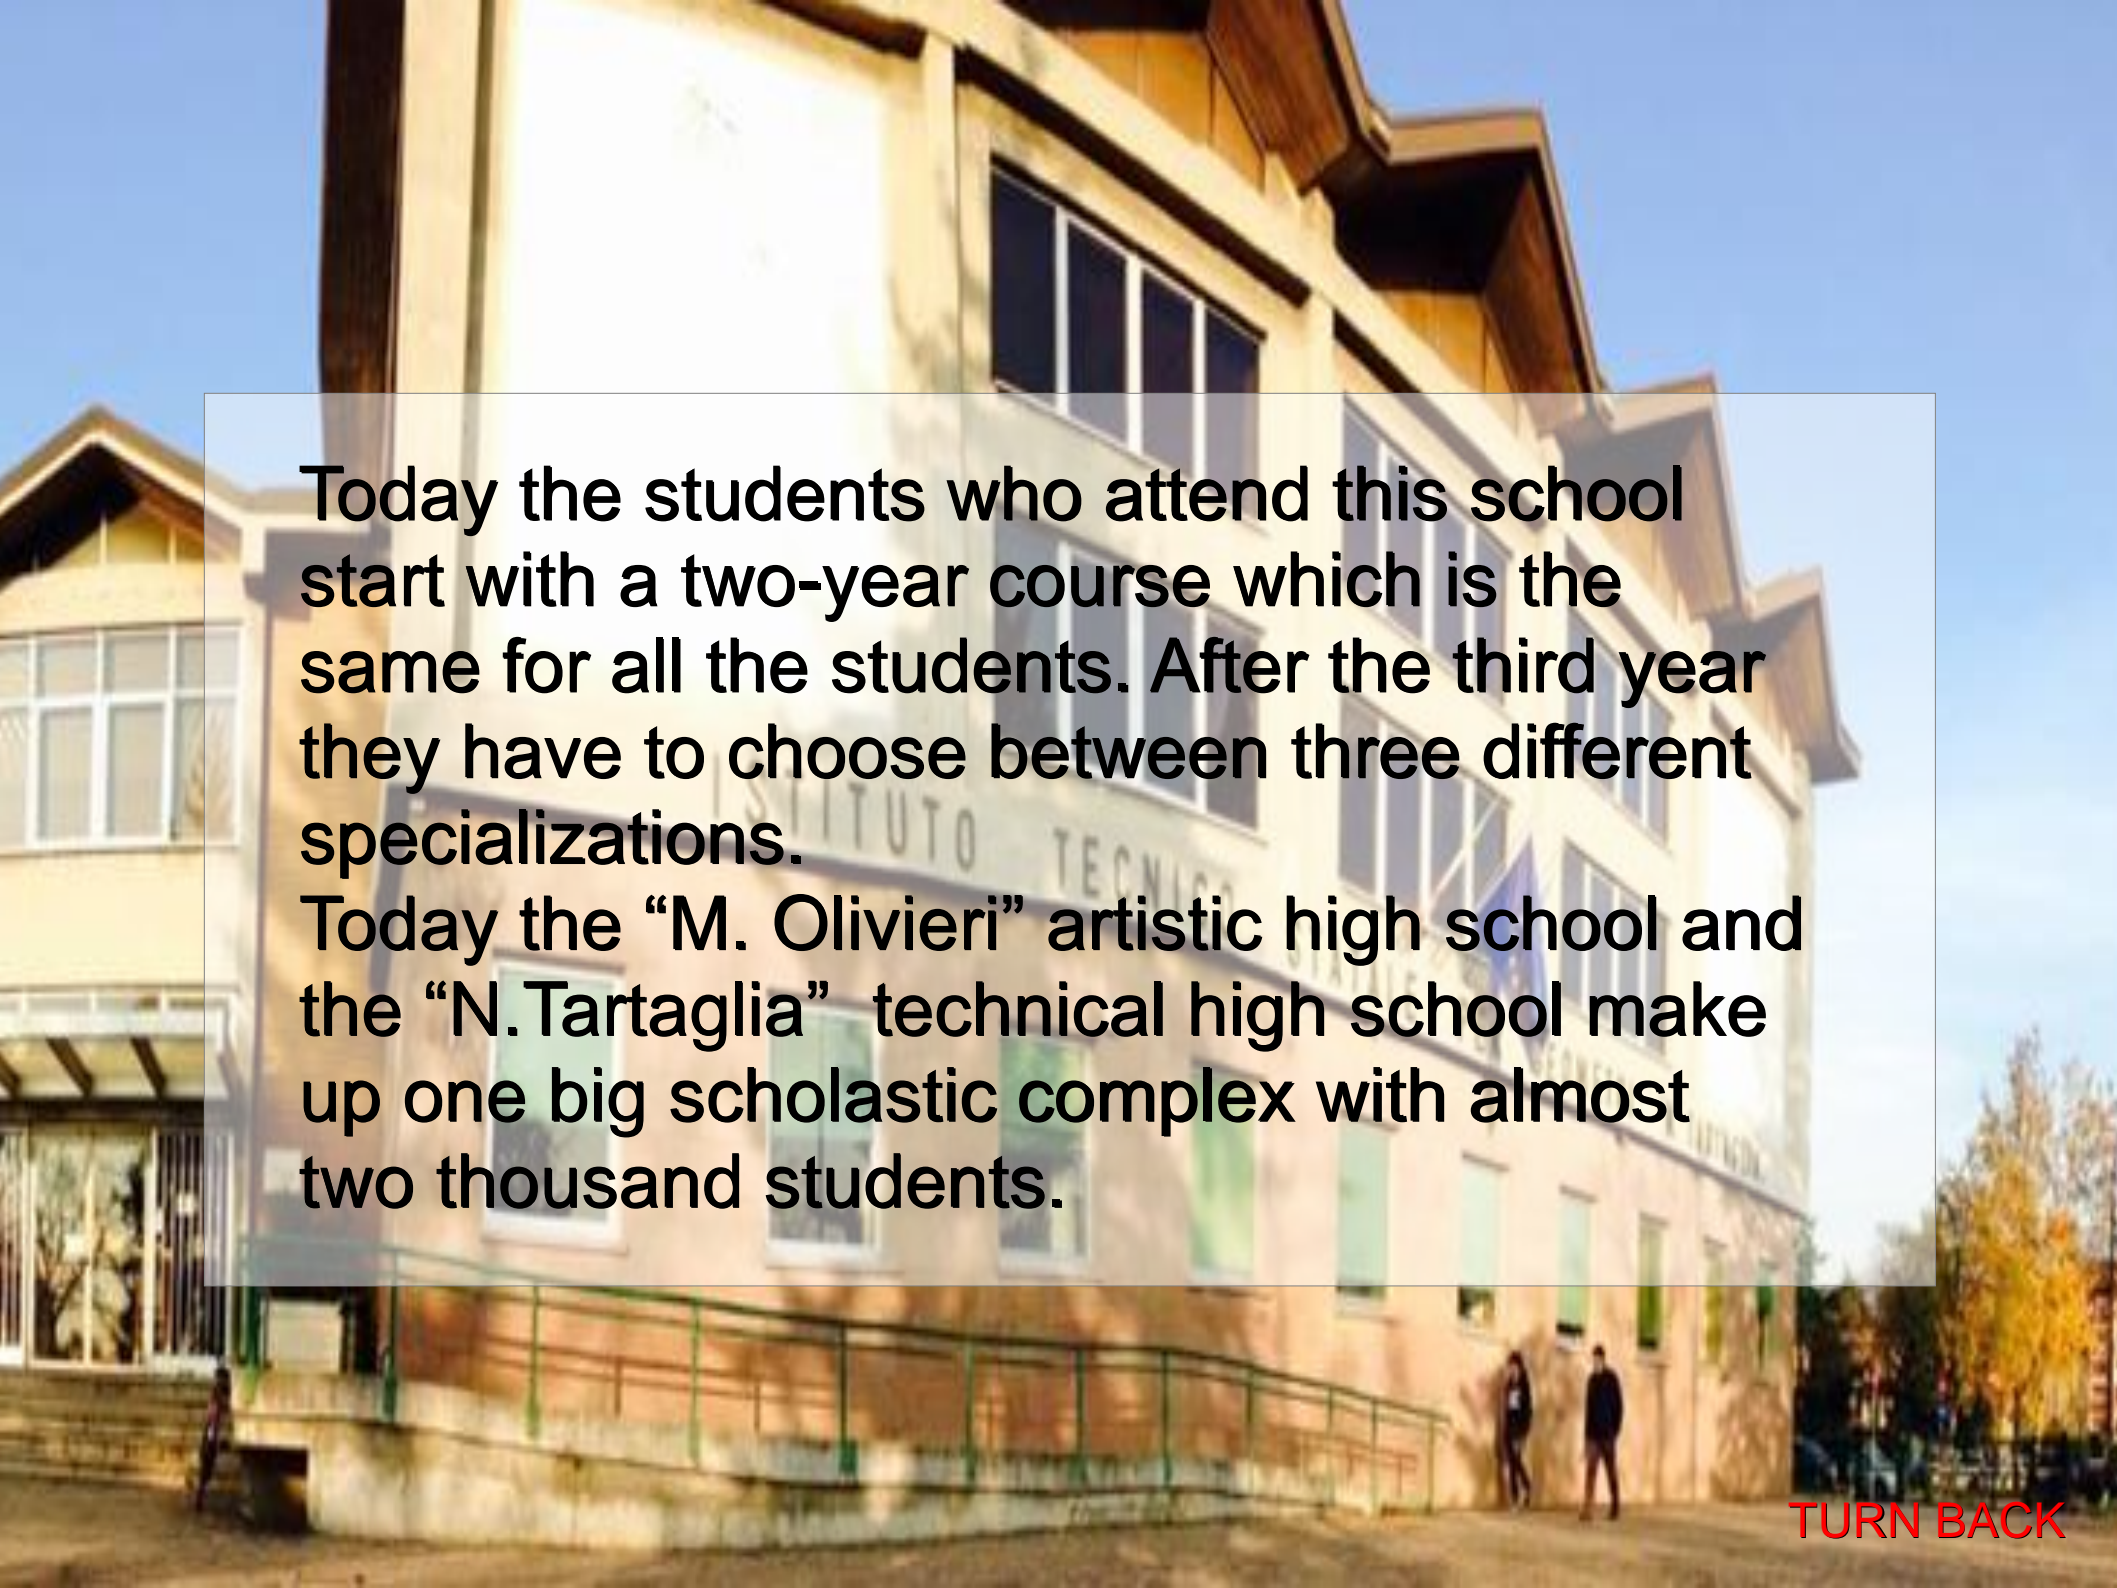

“N. Tartaglia” Technical High School

It was founded in 1862, but only recently it has become a technical school.

It was named after the great Italian mathematician Niccolo' Fontana, whose nickname was “Tartaglia”.

TURN BACK

A large, multi-story school building with a sign that reads "ISTITUTO TECNICO". The building has a light-colored facade and a prominent entrance on the left. The sky is clear and blue. In the foreground, there is a paved area with a few people walking. The text is overlaid on a semi-transparent white box.

Today the students who attend this school start with a two-year course which is the same for all the students. After the third year they have to choose between three different specializations.

Today the “M. Olivieri” artistic high school and the “N.Tartaglia” technical high school make up one big scholastic complex with almost two thousand students.

TURN BACK

SCHOOL ORGANISATION

Italy is the only European country that has started the process of school inclusion for students with special needs in each kind of school since the 70's. In Italy Special Educational Needs are called BES and relate to:

- people with disabilities;
 - learning difficulties (like dyslexia);
 - social, economic and cultural disadvantages;
 - specific development problems.
- School integration instruments:

GLI (SCHOOL INCLUSION TEAM)

It consists of the head-teacher, teachers, learning support teachers, assistants, students and parents.
The team writes the Annual Plan for Inclusion.

TURN BACK

PDP (PERSONALIZED DIDACTIC PLAN)

A photograph of a classroom with several children sitting at desks. Many of the children have their hands raised, indicating they want to participate or answer a question. The classroom is filled with educational materials, including a whiteboard in the background and various papers on the desks.

The class teachers team writes an educational annual plan for each student with special needs.

TURN BACK

DP (FUNCTIONAL DIAGNOSIS)

A neuropsychiatrist writes this document in which he describes the medical case of the student, focusing on his abilities, potentialities and developmental difficulties. The school needs this document to get a learning support teacher for the class in which the student is included and, if necessary, a personal assistant.

PEI (PERSONALIZED EDUCATIONAL PLAN)

The class teachers team writes this document in collaboration with parents, the neuropsychiatrist, the assistant and every person involved in the inclusion support net.

TURN BACK

There are three types of plans:

1) Normal (it's the same of the class)

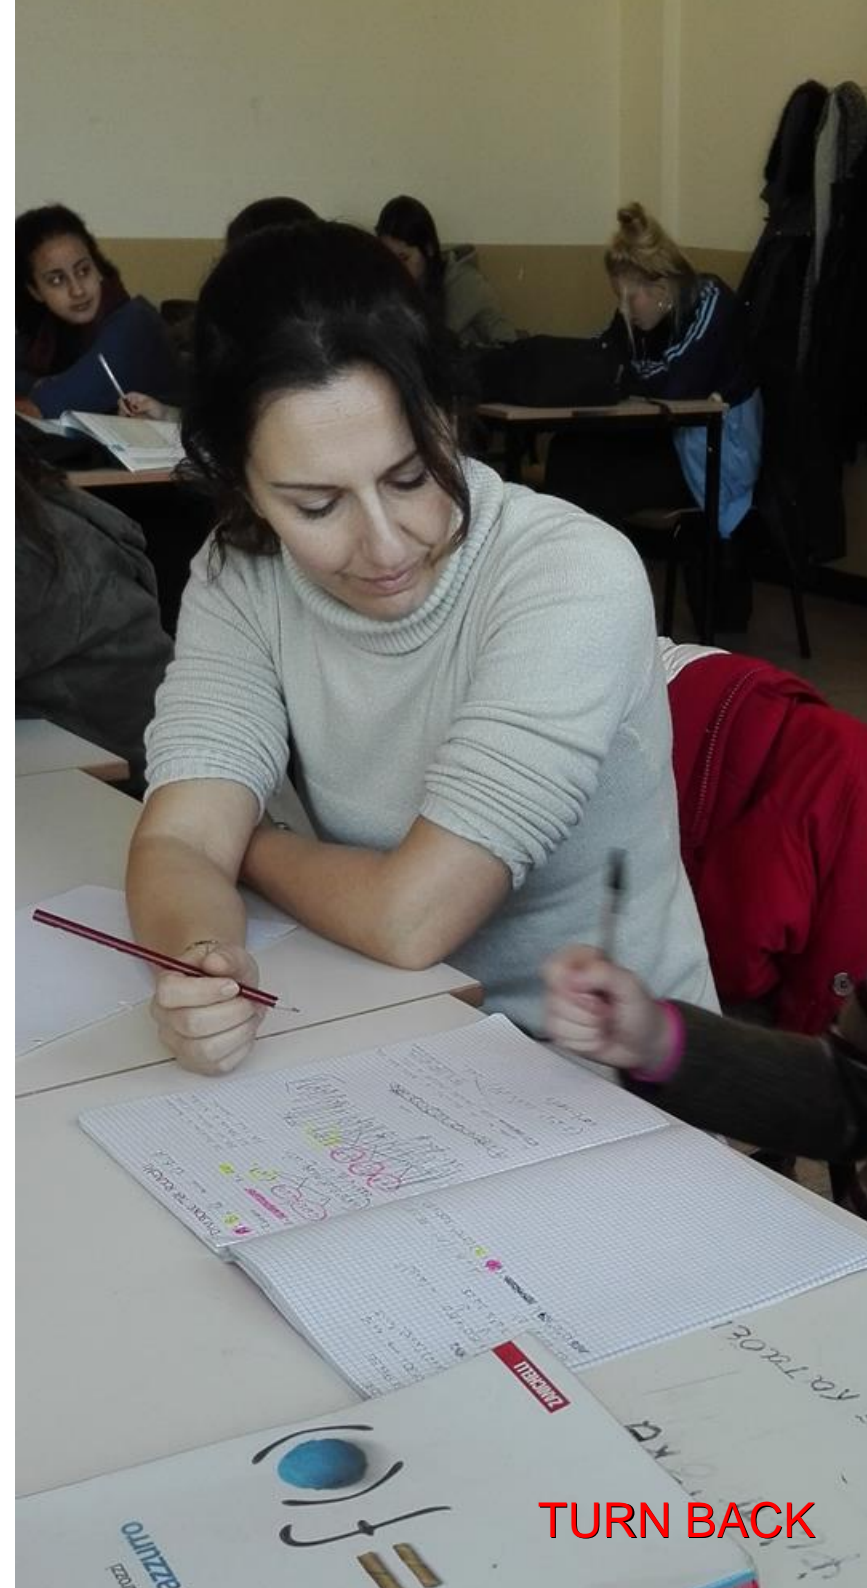

2) Simplified: the student has to reach at least the class minimum requirements. After his final exam he will graduate like all the other students.

3) Diversified: objectives are completely personalized and can be different from the class plan, but have to be always linked to class activities. At the end of the five years the student will get a personalized final Course Certificate.

LEARNIG SUPPORT TEACHER

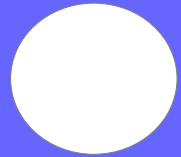

He is a specialized teacher that works to support inclusion within the class. He works from 6 to 18 hours a week with each student, usually in one, two or three classes.

If necessary in addition the student has the help of an assistant provided by the Municipality.

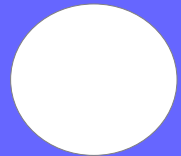

TURN BACK

BRANCHES

“M. Olivieri” Artistic High School

“N.Tartaglia” Technical High School

“M. Olivieri” Artistic High School

The artistic high school is a 5 years course focused on the study of (almost) every kind of artistic expression, such as painting, design, architecture, and multimedia. In the first two years students learn the basis of this “languages”, then, at the end of the second year, they decide which branch and which language they want to pursue for the last 3 years. There are four different branches they can choose.

TURN BACK

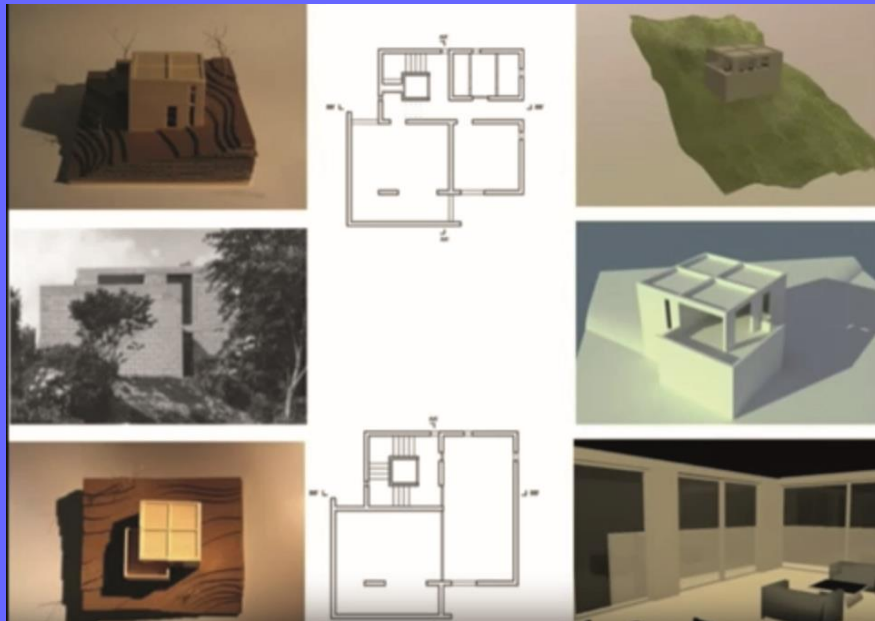

VISUAL ARTS

Also called the traditional course. Students learn how to draw with different techniques and study human anatomy.

TURN BACK

ARCHITECTURE AND ENVIRONMENT

Students project buildings like houses, skyscrapers, based on modern architectures and innovative ideas.

DESIGN

Students draw objects that could be used to decorate interiors like lamps, clocks, chairs...

TURN BACK

MULTIMEDIA

The most modern branch. Students learn how to make videos, projects and animations!

TURN BACK

“N. Tartaglia” Technical High School

CONSTRUCTION, ENVIRONMENT AND TERRITORY

This is the traditional diploma in surveying.
Students get fundamental competences including
English, ICT and applied techniques.

WOOD ENGINEERING

Students learn about bio-architecture, wooden technologies, valuation of buildings and plots of land and cadastre procedures.

A photograph of a geothermal area. In the foreground, there is a rocky, greyish ground with several vents emitting thick white steam. The steam rises into the air, partially obscuring the view. In the background, there is a dense forest of dark green trees under a blue sky with scattered white clouds. The overall scene is a natural, rugged landscape.

GEO-TECHNICAL

This branch is about modern techniques aiming at increasing in value and protecting the environment.

TURN BACK

IIS TARTAGLIA OLIVIERI

The school lessons and activities are defined in a three-year document called PTOF. Hereunder are listed the main points of its content.

EDUCATIONAL PURPOSES

The aim of the school is not only to teach academic subjects, but also to make students feel at ease in a friendly environment, help them become responsible, independent and respectful.

SCHOOL LESSONS

The weekly total amount of classes is about 34/36 hours for the Artistic High School and 32 hours for the Technical Institute.

Lessons starts at 8.00, ends at 1.00 or 2.0 p.m..
Once a week there are classes in the afternoon.

TURN BACK

HOLIDAYS

Summer holidays: from the beginning of June to the beginning of September.

Christmas holidays: from 23rd December to 6th January.

Religious holidays: 01/11; 08/12; 15/02; two days for Carnival; six days for Easter.

National holidays: 25/04; 01/05; 02/06.

TURN BACK

ASSESSMENT

Teachers base their final assessment not only on the students' marks, but also on their real acquisition of skills, their participation, their personal growth and the maturity they show in every aspect of school life.

ORIENTATION

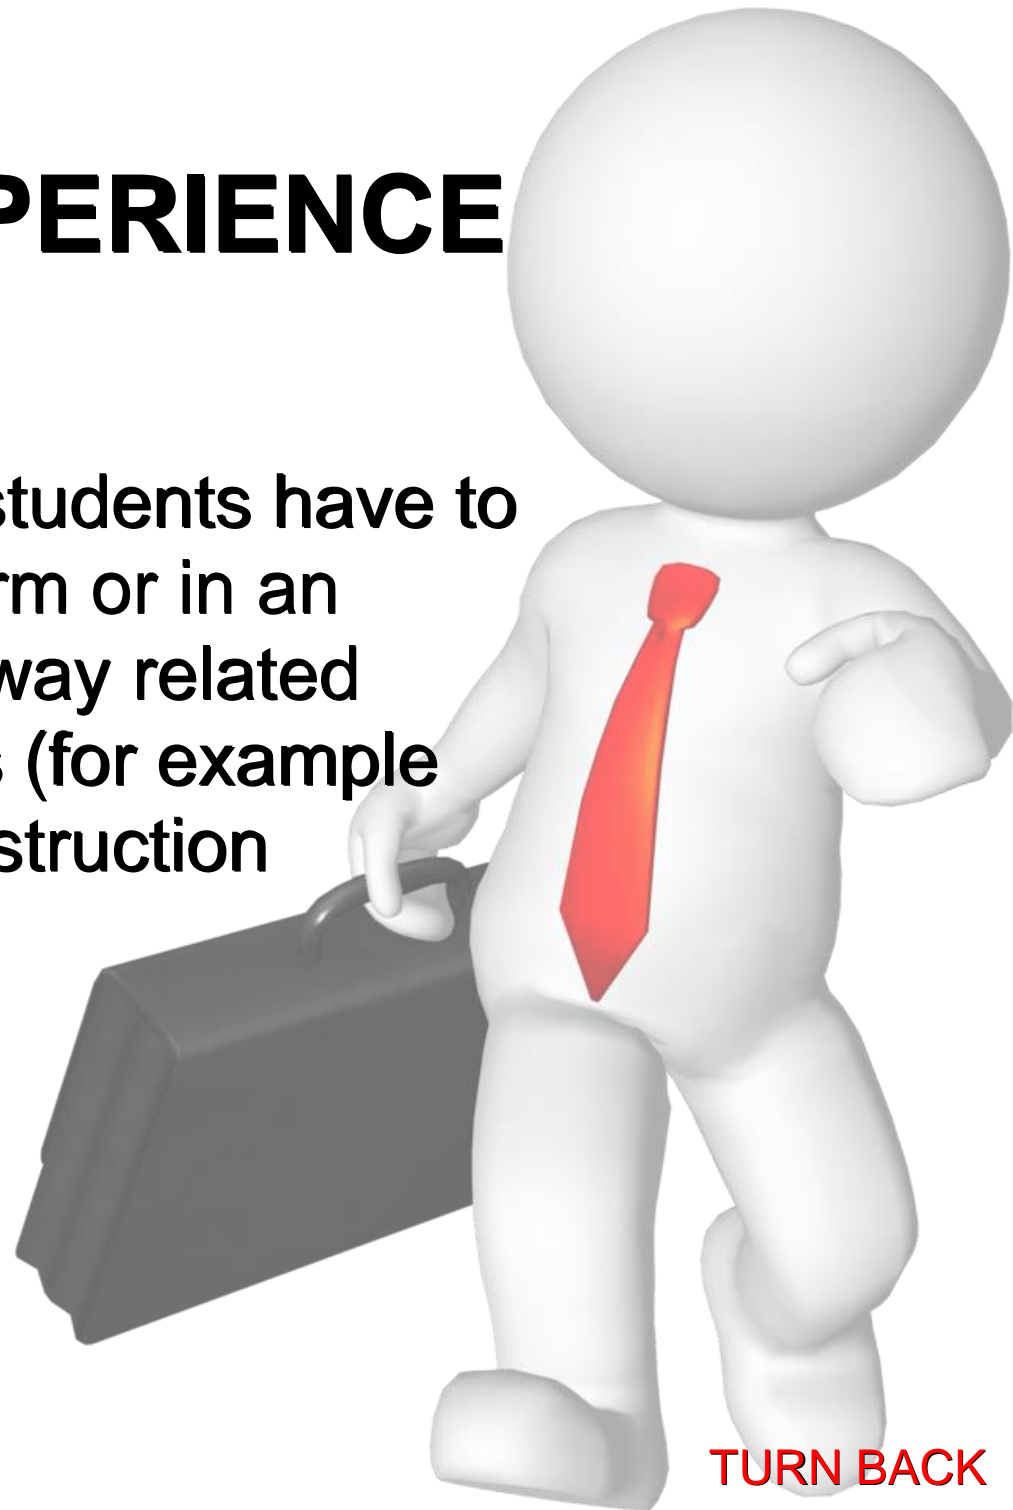

Our institute, in collaboration with external institutions, help students know different specializations of the world of work, so that they can choose the branch they fit best in.

TURN BACK

WORK EXPERIENCE

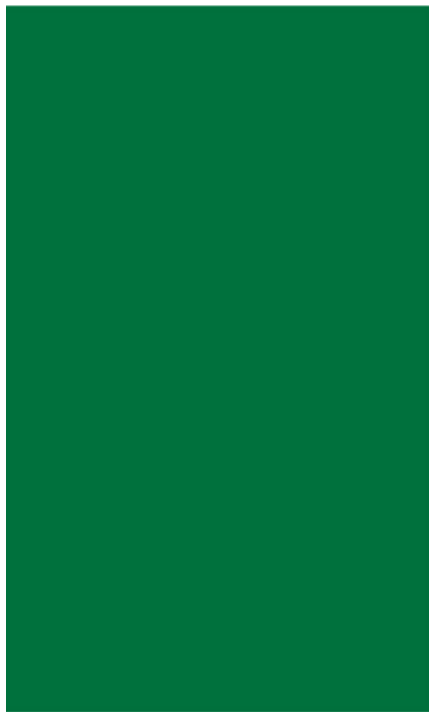

During the last three years students have to do a work experience in a firm or in an institution which is in some way related to the school specializations (for example museums, art galleries, construction companies, etc. ...), or alternatively, they have to do a simulated business experience at school.

TURN BACK

CITIZENSHIP & CONSTITUTION

Italian Constitution is the main point of reference in the education of students, as it highlights the connection between freedom and responsibility.

TURN BACK

HEAD TEACHER and ADMINISTRATION

The Head teacher is the legal representative of the school and –together with an efficient staff- she grants the management of the different aspects of school life.

CLASS TEAM

The most important decisions about school life are democratically taken during monthly meetings of the class teachers with two representatives of the students and two representatives of the parents.

NOT COMPULSORY ACTIVITIES AND PROJECTS

ERASMUS

The Erasmus-plus project “Human Rights education: stand up for your rights” is an after-school project approved and supported by the European institutions, which promotes a cultural exchange between French, Finnish and Italian schools. This project is going on for two years (2016/17-2017/18).

stand up for your rights

The 16 students, from the 11th year, have been chosen for their English capacities, their interest in charity and their scholastic diligence. The purpose of this project is promoting the respect of human rights and the fundamental social skills needed to relate to other cultures.

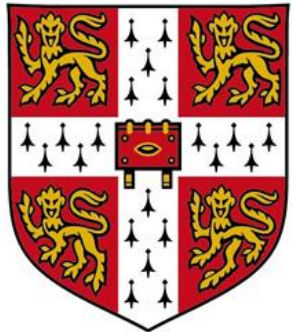

Theatre

The theatre course has been organized by our school for many years. Lessons take place every Tuesday afternoon and last for two hours. Everyone can participate, you just need dedication and the desire to have fun. The teacher, Maura Paletti, is a professional actress and director. As for the set and the costumes, we collaborate with students of other classes and a professional set designer. The course ends with the participation in the “Inventari superiori” contest where all the schools that are interested sign up to compete.

English Course

An English course starts in January. The teacher is a native speaker. The course takes place once a week in the afternoon and lessons last two hours each. They aim at preparing students for Cambridge PET and FIRST exams, basic and intermediate level certifications.

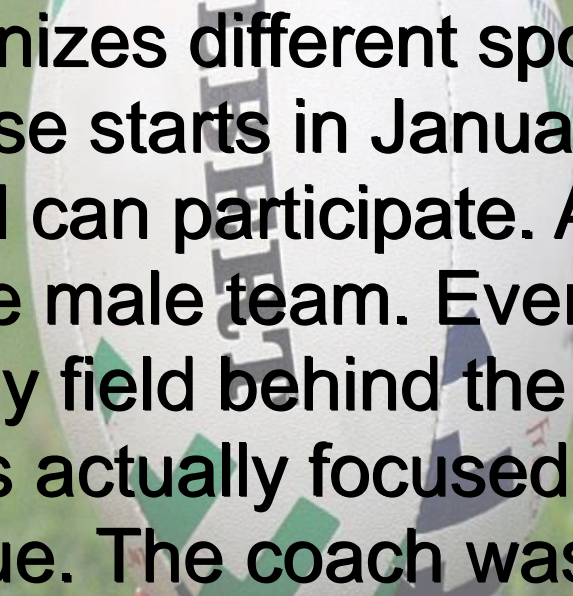

CAMBRIDGE ENGLISH

Language Assessment

Authorised Centre

TURN BACK

Sport activities

Our school organizes different sports activities:
Rugby: the course starts in January and anyone who's interested can participate. At the moment, we have only the male team. Every week they meet in the rugby field behind the school for their training, which is actually focused more on fun than on technique. The coach was a rugby player.

TURN BACK

The background image shows a multi-story school building with a modern architectural style, featuring large windows and a mix of brick and concrete. A semi-transparent white box is overlaid on the center of the image, containing text. The sky is blue with some clouds, and a tree is visible on the right side. A white van is partially visible on the left side of the building.

School maintenance

Painting: Before the beginning of the school year 2016, a project consisting in re-painting the walls of the old part of our school started. All the students and teachers could participate. The materials were provided by our school.
