

ENVIRONMENTAL EDUCATION PROJECT

PROMOTION OF ENVIRONMENTAL CULTURE

Project title: The dune, Circeo National Park.

As part of the Erasmus + Gear - Global Environmental Awareness and Responsibility (GEAR) a Toolkit for Inclusive Environmental Education 2019-1-FI01-KQA201-060721 project, this project is aimed at the construction - strengthening - development of personal, cultural and social identity.

The dune is the place where the sea and the land meet. The educational path leads to the discovery of one of the most beautiful and particular areas of the park, but also one of the most popular and fragile. Plants with their blooms and animals with their adaptation strategies become the absolute protagonists of this experience. In one of the most fragile and fascinating environments of the Circeo National Park, it is possible to study beached marine organisms, but also the phenomenon of waste that the sea collects, mostly at the mouth of rivers, and then transports for long stretches.

Educational objectives and / or Purposes:

- Educating pupils to become aware, autonomous, responsible and critical citizens.
- Making pupils aware of the cognitive value of the environmental assets of their own territory.
- Looking responsibly to the future.

Recipients of the project: Class 2F - 23 pupils

Teachers involved: Ms.SALZANO, Ms.COIANTE

External subjects involved: Istituto Pangea Onlus

Costs of the projecct: 740 euros

- Return coach from Sabaudia: 600 euros
- Scientific Guide: 140 euros
