

Biology - Chemistry

Biology

The teacher gave us water from the Niauduva River and we inspected it if it is clean or dirty.

Actions

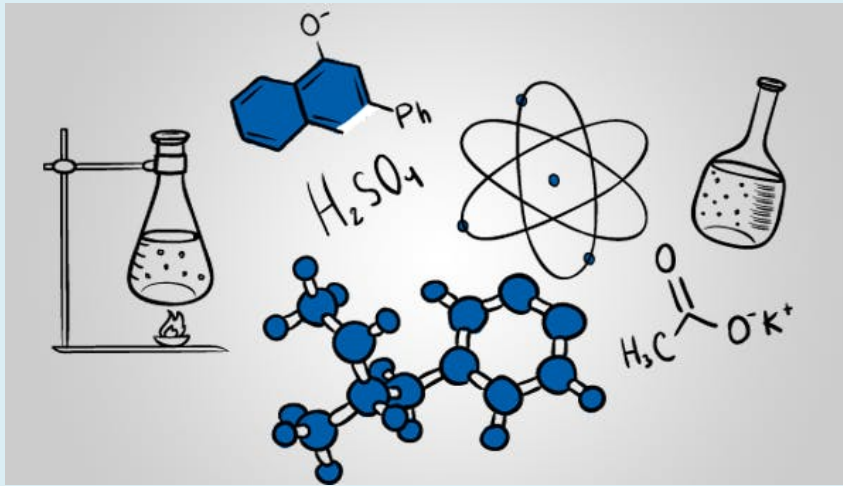

1. Took some water from the river
2. Put it on a special glass
3. We put it on the microscope
4. Saw some small organisms

Result

- Not many organisms
- Water is quite clean

Chemistry

The teacher gave us water from the sink and the water from the Niauduva River.

Actions

1. Put some water from the river to test tube
2. Added some PO_4
3. Took indicator
4. Put in water

Result

- Water from the river is clean

**Thank you for
attention 😊**
