Water cleaning system

- ❖ capable of discharging sterile and pathogenic free (of identifiable bacteria and viruses) water and will provide clean sterile water through a proprietary cleansing process

- ❖ clean water discharge standards by producing sterile water and sterile sludge

Water containers

- ❖ Water pumps
- ❖ Sand is mixed there with dirty water
- ❖ Cludge settles down in the bottom of the containers
- ❖ That space is really cold

Whats new

- ❖ Cleaning method with sand
- ❖ Water pumps purpose
- ❖ How much water can pumps handle
- ❖ Lithuanian food is new for us too

Lecture in Radviliškis municipality building

- ❖ It was interesting but kind of hard to understand
- ❖ We were a little bit sleepy
- ❖ And it was shocking how such a small village can use such a big amount of water in one day

Thanks for the attention !
