

13-68

~~13-68~~

a) Hoogste nut val vanade
 o1 polarisatoren ja
~~het~~ overgaan in een hoge
 se polarisator uidekeen.

$$\tan \alpha_1 = \frac{n_2}{n_1} = 1,33$$

$$\alpha_1 \approx 53,06^\circ$$

$$\alpha_2 = 90^\circ - \alpha_1 = 36,94^\circ$$

$$\tan \alpha_2 = \frac{h}{150\text{m}}$$

$$h = 150\text{m} \cdot \tan 36,94^\circ$$

$$h \approx 110\text{m}$$
