

HOW BABY BRAINS DEVELOP?

Watch the YouTube video and answer the following questions

(1) By what age is the child's brain approximately 90% of its adult size?

(2) At what age does a baby smile?

(3) What examples of cognitive development can you think of that are associated with the development of the cerebral cortex?

INSIGHT INTO THE TEENAGE BRAIN

Watch the TEDxYouth video and answer the following questions

(1) To what extent can the fMRI studies on sugar and money establish causality?

(2) What is Galván's explanation for why the reward system is less active in adults?

(3) What implications for schools does this research have on our understanding of the teenage brain?
