

Student IA Research Proposal

Student name _____

Make any modifications your teacher suggests before proceeding with your IA. Remember, you don't have to conduct this research yourself, but you do need to understand how a researcher or researchers could investigate your identified issue.

	Student description	Teacher comment
Initial thoughts		
Issue/problem I am interested in		
Population this affects (this cannot be “everybody”)		
What I would expect to find, from my preliminary reading and knowledge		
The practical and/or policy changes that would be needed to help solve this problem for this population		
Practical preparation		
Two pieces of relevant research (give full references)		
Research method I propose and why		
Sampling technique proposed and why		
A brief description of my data collection tool		
How ready do you feel to start writing your proposal?		
Completely ready ☐ Nearly ready ☐ Not ready at all ☐		
If you are not completely ready, ask your questions here.
