

COGNITIVE APPROACH

– Schema theory

*Below you can see ONE SAQ and ONE ERQ/essay question. As a group, try to find appropriate **terms**, **contents**, and **studies** to answer the questions as effectively as possible. Write your comments on this paper.*

SAQ: Describe schema theory, with reference to one relevant study (N21)

ERQ/essay: Discuss schema theory in relation to cognitive processing (M21 TZ2)

COGNITIVE APPROACH

– Models of memory

*Below you can see ONE SAQ and ONE ERQ/essay question. As a group, try to find appropriate **terms**, **contents**, and **studies** to answer the questions as effectively as possible. Write your comments on this paper.*

SAQ: With reference to one study, outline one model of memory (N20)

ERQ/essay: Evaluate one or more models of memory (N22)

COGNITIVE APPROACH

– Biases in thinking and decision making

*Below you can see ONE SAQ and ONE ERQ/essay question. As a group, try to find appropriate **terms**, **contents**, and **studies** to answer the questions as effectively as possible. Write your comments on this paper.*

SAQ: Describe one study investigating how one bias in thinking and decision-making influences human behaviour (M21 TZ1 & TZ2)

ERQ/essay: Discuss **one or more** biases in thinking and/or decision-making (M19 TZ2 + N23 Z1,Z2 and Z3)

COGNITIVE APPROACH

– Contribution to research methods and ethical considerations

Think of possible studies and contents related to the contribution of research methods and ethical considerations under the cognitive approach. Write down your suggestions to the boxes below. You may use the ERQ/essay question below for ideas.

Discuss one or more ethical considerations in studying reliability of one or more cognitive processes (M23 Z1,Z2 and Z3)

Contribution of research methods	Ethical considerations
