

## MY KNOWLEDGE PROFILE

Your task is to create a profile of yourself as a knower and thinker. This is just like a social media profile page, except it will contain information about *what makes you unique as a knower and thinker*. You can design it according to any social media template but modify it as necessary to turn it into “My Knowledge Profile”. Use Microsoft Word or similar software in creating your profile page. When finished, convert your profile into PDF and upload it to ManageBac.

Your knowledge profile should address these *five main questions*:

1. *How do I distinguish between claims that are contestable and claims that are not?*
2. *What shapes my perspective as a knower?*
3. *How am I influenced by the different communities of knowers I belong to?*
4. *What resources do I have as a knower to help me navigate the world?*
5. *Where do my values come from?*

You can use the following questions as ways to elaborate your responses for the main questions. Use these as guides to your thoughts to which you can readily add. You may come up with your own questions as well, if they address the main questions.

- How old are you? How might your age affect your attitude towards gaining knowledge?
- What is your mother tongue? What other languages do you speak? How might your particular languages affect your knowledge?
- What gender are you? Does your gender affect how you see the world and what expectations you have about your knowledge and education?
- Are you urban or rural? How might living in the countryside affect how you have learned and what you know?
- How does your culture influence your habits and view of the world? How does your culture shape your knowledge?
- What is your spiritual world view? How do you think that following a particular religion, or not doing so, affects your knowledge?
