

Group assignment: **POSTER WORK**

Choose one illness/ailment and start searching for information

Answer the following questions:

- History of the illness (Who found it? When? How?)
- Describe the physiology of the illness? What are the symptoms of the illness i.e. what it causes in your body?
- How do you cure the illness? How do you treat the illness?
- How rare/usual is the illness? How many get sick of this illness annually? How many are sick with the illness right now approximately?
- Is it more common in some parts of the world than others? (For example being overweight is more common in Europe -> We suffer more from diabetes and cardiovascular diseases)

Remember to put the sources under the text. Plagiarism will result in getting you a grade F from the assignment.

Evaluation: 1.) Effort and class work 2.) quality of the poster and information value
