

Pair assignment: **POSTER WORK**

Choose one illness/ailment and start searching for information

Answer the following questions:

- Describe the physiology of the illness? What are the symptoms of the illness?
- How do you cure the illness?
- How rare/usual is the illness?
- How many get sick of this illness annually? How many are sick with the illness approximately?
- Is it more common in western countries?

Remember to put the sources under the text. Plagiarism will result in getting both of you a grade F from the assignment.

Evaluation: 1.) Effort and class work 2.) the quality of the poster
