It improved my English skills

Now I have a lot more friends in other countries than what I used to have!

Project was very good

I like to speak English much more now and I am even more eager to travel and work abroad.

After project I think I got some confidence to speak english more.

I got new friends and learned more English.

Saw anothee culture

I learned a lot about business stuff in EU and also about Portugese culture.

I didn't expect to have so much friends there and so much fun. I'm became much more open to different kultures.

It was nice to meet new peoples and learn about other cultures.

I got an amazing experience to travell the whole new country and to know something about it. The positive impacts I got was that I want to go visit to Portugal again.

At least my english Skillä are better now and I got couple of friend from portugal

I'm more open to make new friends from other countries.

My English skills got better and meeting new people is always fun

Free vacation and studies about wind mills and solar power

It was nice to see the other culture and get to meet some new people and make new international friends!

I made new friends, got new experiences and learned new things

I became more brave

Tell briefly, if there were some negative experiences for you during the project. How could these experiences have been avoided by developing the project?

More information and in time

For me, the time when portugese students came to Finland was awful. Also no one told us more than two months before they came and WE HEARD ABOUT IT FROM THE (portugese) STUDENTS NOT THE (finnish) TEACHERS!! I think that wasn't okay at all and it didn't feel nice. I think I would have enjoyed the experience a lot more if it happened for example during the january or late march/april.

I liked project

The schedule was sometimes a little bit messy and the information about changes in it didn't reach everybody. Maybe daily common meetings could have helped or something.

Sometimes we didnt know well enough where we where heading so I'd like more information but overall I think it went well.

Nothing

PLEASE SAME AGED PARTNERS

I didn't have any negative experiences.

Somepeople language skills, my partners mom didn't speak at all english.

Timing, expecially in Finland, was not good at all. We had thousand things to do because of examweek and Wanhojen tanssit and then portugueses came also and it was very hard to take care of own things and also to out guests.

I didnt like my new partner and about that that I got to known it too late. I want to say that everyone have to adhere to take part in both trips like Finns did.

I didn't have

The timing for portugese students to come here to Finland because we had those promdances and everything.

My host family didn't speak any English neither did my partner so it was difficult to find ways to communicate. I think that in these kinds of projects every partner should speak at least some English so all the communication wouldn't be via google translate.

All the systems didn't work well in Portugal

Sometimes communicating was difficult but we handed it well after all. Only minus would be the timing of portuguese students trip to Finland because it was on our exam week and during prom so it gave us difficulties to find time to arrange something to do for our partners.
