

# Reduce plastic waste

Increase recycling

Together **we** can reduce plastic waste!

This machine **collects**  
bottles and cans and puts them  
into **recycling**.

# Plastic ? OUR problem !

In the face of this, there is 2 solutions:

- reduce the disposable plastic
- increase recycling

## Good things about recycling:

- We save the world!
- Animals don't have to live with plastic in the ocean!

## How to reduce the generation of plastics ?

**Instead of using plastic bags, stores could use cardboard bags to reduce pollution.**

## How to increase its recycling ?

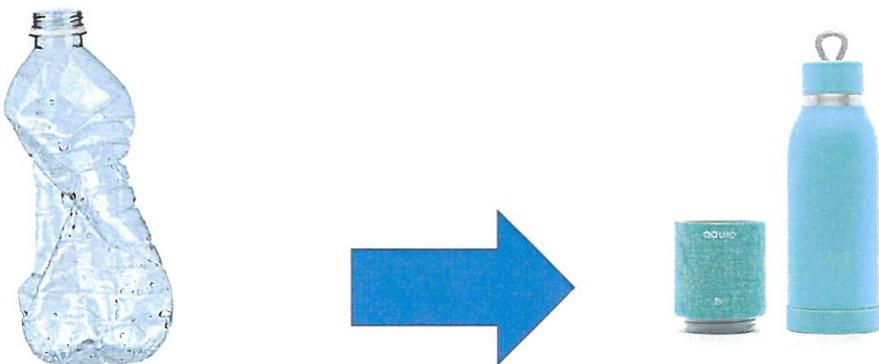

**To increase recycling, we should encourage recycling through play in elementary schools.**

# Plastic recycle

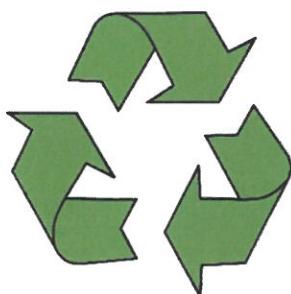

## How to reduce plastic production

- Use recycled plastic effectively
- Increase the usage of other materials than plastic in packaging

## Increasing plastic recycling

- Make more recycling stations
- Spread awareness of the importance of recycling

# Ways to reduce using plastic

Please use wooden single-use cutlery!

Do not use clothes that contain plastic!

# How to increase plastic recycling?

<b>What to do ?</b>	<b>What you should not do ?</b>
Buy recyclable plastic packaging	throw your waste on the ground
Do sorting	Buy one use plastic dishes
Use durable bags	Buy unethically made clothes
Buy second-hand clothes	Buy a new plastic bag everytime
Choose for eco-responsible hygiene products	
Donate your used items	

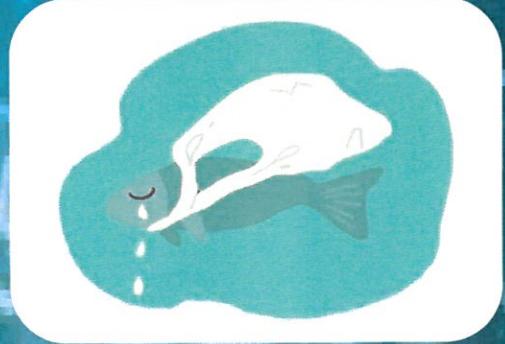

# Reducing the generation of plastic and increasing recycling

Every year 4,8 to 12,7 millions of plastic are thrown away.

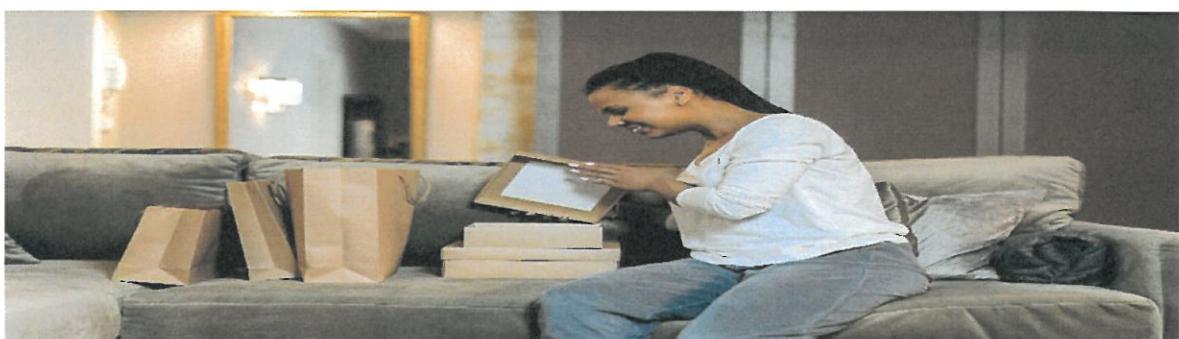

Solution to the problem is not to throw plastic waste in nature. And also try avoiding disposable plastic.

Raising awareness and educating people to reduce the impact of plastics on the environment

Promotion of the use of alternative materials

Promotion of the circular economy to reduce plastic waste and encourage its reuse

Encourage industries to innovate and develop packaging and products less dependent on plastic
