

The Exotics

POKE College also has a variety of exotic animals, including turtles, tortoises, snakes, lizards, frogs, birds, fish, insects and spiders. We receive excellent theory knowledge on these animals, as well as plenty of practical work.

These animals are great for boosting self-confidence, and suppressing any existing fears, for we are encouraged to actively get involved with the animals, which includes handling them – on the animal's terms of course!

Some of our exotic animals are also used in our Green Care activity and are very popular, often unfolding unexpected bonds.
